The Company assumes the NAIC Model Act reserves at the same rate as prescribed in RSMo 381.072 of fifteen cents per thousand of retained risk or as required of foreign insurers by state regulations. Thus, the amounts above are related to the differences in the amortization schedules to restore statutory premium reserves "SPR".

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Revenue recognition and related expenses - Premiums are recognized as earned at the time of the closing of the related real estate transaction. Premiums on title insurance policies written by agents are recognized primarily when policies are reported to the Company. In addition, where reasonable estimates can be made, the Company accrues for policies issued but not reported until after period end. The Company believes that reasonable estimates can be made based on policy issuance information from our affiliated agent. In this accrual, future transactions are not being estimated. The Company is estimating revenues on policies that have already been issued by the affiliated agent but not yet reported to or received by the Company. In addition, the Company has in place an excess of loss ceded reinsurance agreement which is on a claims made basis. Establishment of statutory premium reserves as well as other expenses incurred in connection with issuing the policies are charged to operations as an expense in the current period.

In addition, the company uses the following accounting policies:

- (1) Short-term investments are stated at amortized cost.
- (2) Bonds not backed by other loans are stated at amortized cost.
- (3) Common stocks are stated at market except those investments in stocks of uncombined subsidiaries and affiliates in which the Company has an interest of 20% or more are carried on the statutory purchase method.
- (4) Preferred Stocks: None
- (5) Mortgage Loans on Real Estate are stated at the aggregate carrying value less accrued interest.
- (6) Loan-backed securities are stated at the lower of fair market value or cost.

- (7) Investment in Subsidiaries, Controlled or Affiliated Companies are valued using the underlying statutory equity, as adjusted, or audited GAAP equity, adjusted for certain non-admitted assets, as appropriate for each individual investment, in accordance with NAIC SAP No. 97, Investments in Subsidiary, Controlled and Affiliated Entities, A Replacement of SSAP No. 88. The net change in the subsidiaries' equity is included in the change in net unrealized capital gains or losses.
- (8) Interest in Joint Ventures: None
- (9) Derivatives: None
- (10) The Company does not utilize anticipated investment income as a factor in premium deficiency calculations
- (11) Unpaid losses and loss adjustment expense are determined on the individual claim level and are based on management's best estimate of ultimate losses and loss adjustment expenses more likely than not to be incurred in administering the claim. Such liabilities are necessarily based on assumptions and estimates. While management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liability are continually reviewed and any adjustments are reflected in the period determined.
- (12) Changes in Capitalization Policy: Not applicable
- (13) Pharmaceutical Rebate Receivables: None

20. Fair Value Measurements

A. The Fair Values Measurements and Disclosures Topic of the FASB ASC defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous, market for the asset or liability in an orderly transaction between market participants at the measurement date. The Fair Values Measurements Topic establishes a three-level fair value hierarchy that prioritizes the inputs used to measure fair value. This hierarchy requires entities to maximize the use of observable inputs when possible. The three levels of inputs used to measure fair value are as follows:

- Level 1 – quoted prices in active markets for identical assets or liabilities;
- Level 2 – observable inputs other than quoted prices included in Level 1, such as quoted prices for similar assets and liabilities in active markets; quoted prices for identical or similar assets and liabilities in markets that are not active; or other inputs that are observable or can be corroborated by observable market data; and
- Level 3 – unobservable inputs that are supported by little or no market activity and that are significant to the fair values of the assets or liabilities, including certain pricing models, discounted cash flow methodologies and similar techniques that use significant unobservable inputs.

(4) As of September 30, 2024, the reported fair value of the Company's investment in Level 3 common stock includes 507 shares of common stock Federal Home Loan Bank of Des Moines ("FHLB") consisting of membership shares with the FHLB at \$100 par value. Privately held securities are valued at the last transaction price closest to the balance sheet date. Fair values of issues traded on public exchanges are based on the market price in such exchanges at the balance sheet date. The fair values of cash and short-term investments consist of certificates of deposits, money market savings accounts carried at cost which approximates fair value. Mortgage loans on real estate and other invested assets are established utilizing comparable prices for similar assets in active and inactive markets or other inputs that are observable or can be corroborated by observable market data.
