TESLA TO BUILD NEW DEALERSHIP IN MONTEBELLO

MONTEBELLO, CA – The City of Montebello is excited to announce that Tesla has submitted building plans for a new, full-service sales, service, and delivery center within our city. The new facility, located at 1345 N. Montebello Blvd., will offer a wide range of services, including sales, service, and delivery of new Tesla vehicles.

Strategically located off the I-60 Freeway, the site will be approximately 11 miles east of downtown Los Angeles, further enhancing Tesla's presence in the region. The City of Montebello is working closely with Tesla to ensure a smooth activation of the new location.

"Tesla's decision to establish a new location in Montebello underscores our city's appeal as a prime location for leading businesses," said Montebello Mayor, Scarlet Peralta. "This investment aligns with our commitment to sustainable development and reinforces Montebello's position as a forward-thinking community."

"We are thrilled to welcome Tesla to Montebello," said Montebello City Manager, Raul Alvarez. "This new center will not only provide our residents with greater access to cutting-edge electric vehicles and products but also stimulate economic growth and create job opportunities in our city."

Joseph Palombi, Director of Montebello's Planning and Community Development Department, said. "We are eager to support this significant addition to our city and look forward to the positive contributions it will make to our local economy and the environment."

The City of Montebello looks forward to the successful completion of this project and the benefits it will bring to our community.

The City of Montebello was founded in 1920 and is located eight miles southeast of downtown Los Angeles. Its history dates back to the days of the Franciscan missionaries and today boasts a full array of services including police, fire and one of the region's largest public transportation systems, Montebello Bus Lines. The City's multicultural resident population is approximately 65,000 covering a footprint of approximately four square miles.
