

July 19, 2024

Meeting Notes

- On July 19, 2024, I met via Teams with Kari Mavian, Global Director of Regulatory Advocacy and Policy for the Dow Corporation. This meeting was held at the request of Ms. Mavian.
- Ms. Mavian asked whether I could share information about EPA's consideration of public comments on EPA's March 2024 proposed rule under TSCA 8(d). I said I could not share any information about this deliberative process.
- I shared with Ms. Mavian that EPA would conduct stakeholder meetings prior to the initiation of prioritization for additional chemicals in fall 2024.
- Ms. Mavian and I discussed options for submitting unpublished health and safety data for chemicals in the proposed TSCA 8(d) rule prior to finalization of the rule. I said I would investigate this and contact Ms. Mavian when I had more information.
- Ms. Mavian asked about the opening of the reporting period for EPA's TSCA 8(a)(7) rule. Ms. Mavian noted that OCSPP AA Freedhoff mentioned this topic in a recent speech. I responded that, if necessary, EPA would provide additional information in a timely manner to potential reporters under the rule.
