Quibble with Kibbles: 'Forever chemicals' in pet food packaging add to perils at home

By [Sydney Evans](/news-insights/our-experts/sydney-evans) (EWG), [Anthony Lacey](/who-we-are/our-team/anthony-lacey) (EWG)

NOVEMBER 3, 2022

- New tests suggest the presence of PFAS at elevated levels in some pet food bags.
- Dust from PFAS-laced net food bags can add to household contamination
