¹ = Bontebok – 100% pure bontebok as determined by the nuclear test, using microsatellite markers and incorporating a 90% threshold.

² = Hybrid – animals below the threshold for bontebok DNA. These animals pose a high risk to the pure bontebok population.

³ = Blesbok – 100% pure blesbok as determined by the nuclear test, using microsatellite markers.

We thank you for your support and hope to be of service in the future.
