# “MirrorLESS” Video Mirror System

Advanced ‘Mirrorless’ Technology for Advanced Operator Performance & Safety

Cameras and LCD screens replace traditional mirrors for a safer, more cost-effective solution to reducing blind spots.

Give your drivers enhanced safety and reduced risk with the new Safe Fleet MirrorLESS Video Mirror System. Get superior clarity and a wider field of view regardless of weather and lighting conditions. Benefit from incredible operational savings and system longevity.

## High-resolution and high-dynamic range cameras:

- Provide enhanced visibility in all weather conditions
- Eliminate Lateral blind spots, and reduce glare
- Reduce ‘Mirror Strikes’ – lowering operational costs
- Deliver a more aerodynamic vehicle profile for improved fuel efficiency

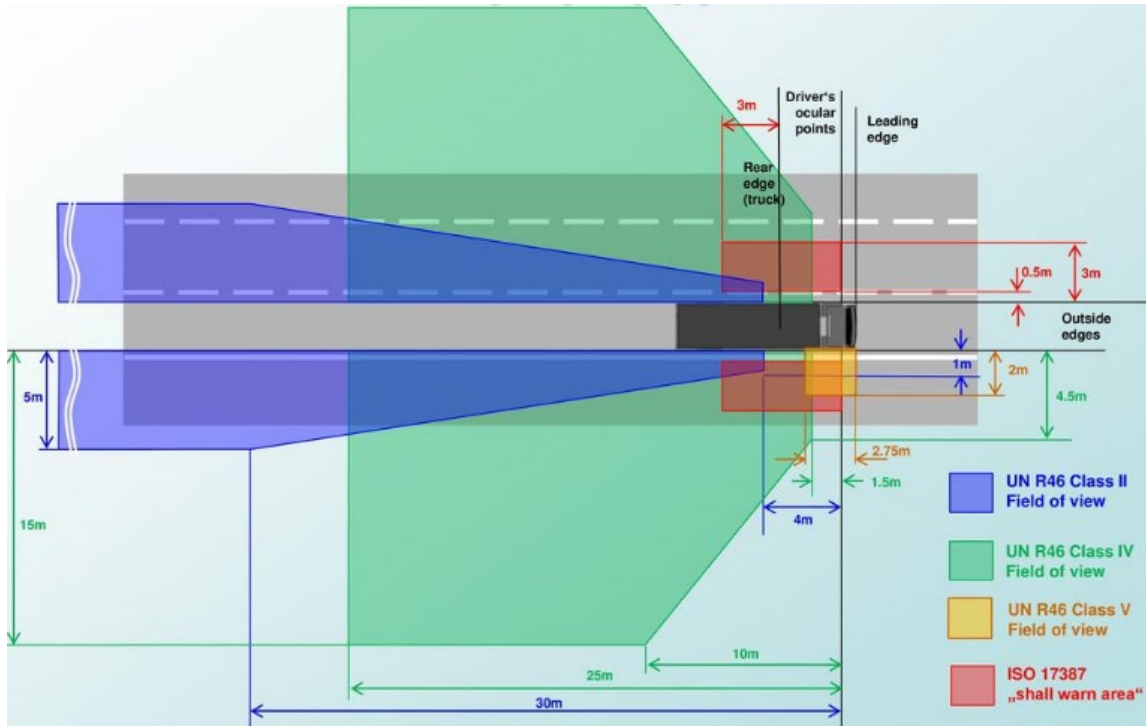

Exterior mounted cameras are IP67K to ensure weatherproof. They are mounted high about drip rail and have narrow profile to reduce strikes with on road objects.

**Monitors are mounted to optimize vision for driver / operators.**

Safe Fleet mirrorLESS system meets or exceeds FMVSS 111 vision requirements for mirrors on commercial vehicles. Additionally, the system has been developed and designed to also meet R46 standard. This standard covers indirect vision devices and installations in the EU.

## Typical Camera Options

### Featuring:

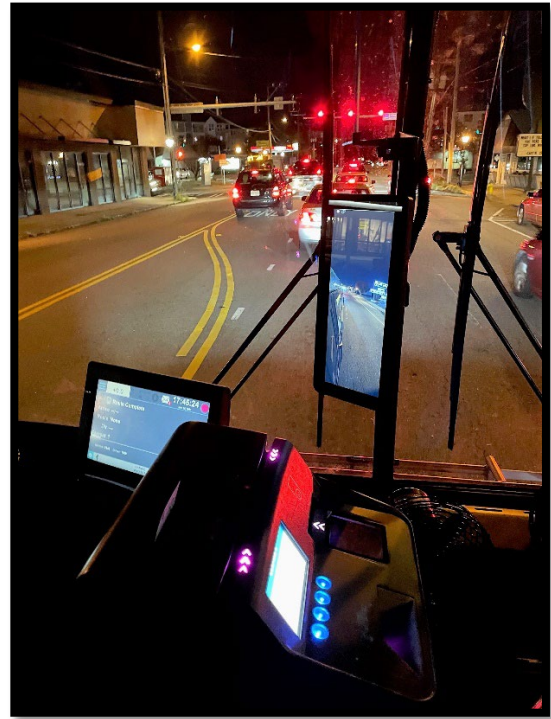

- Up to 3 cameras in one housing unit on each side
- Heated camera lenses for defrosting
- Cameras denoted by class according to FMVSS 111 and R46 standards
- Cameras cover FOV requirements of Class II and Class IV and optional A-pillar blind spot camera
  - Camera 1 replaces the Class II FOV
  - Camera 2 replaces Class IV area
  - The forward camera displays forward A-pillar blind spot when triggered

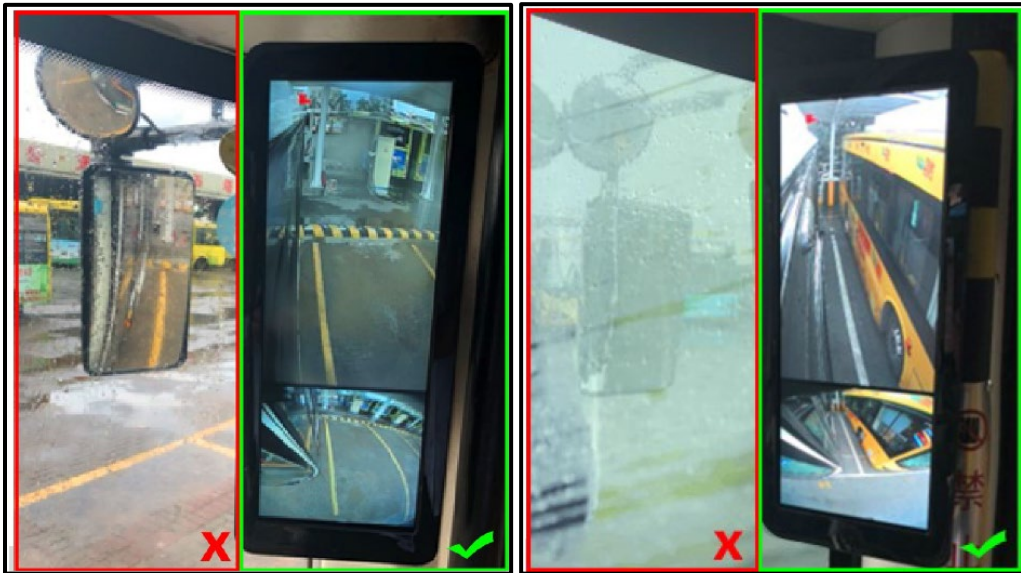

Picture below provides clear comparison to additional field of view Safe Fleet's mirrorLESS system provides compared to traditional mirror installation.

**Safe Fleet mirrorLESS system provide superior views around vehicle in low light conditions compared to traditional mirrors. The built-in camera processor provides excellent clarity in low light conditions. The monitor automatically dims during these conditions it is also equipped with manual dimmer for customized driver convenience.**

The Safe Fleet mirrorLESS system provides superior views around vehicle in inclement weather conditions. With a built-in heater, air nozzle, and hydrophobic lens, it keeps the lens clear of ice, snow, and rain leaving the driver with unobstructed views.

- Air Nozzle
- Heated Lens
- Hydrophobic lens coating
