Hi Kyle,

Additional questions:

1. Regarding your request:

Please edit the Project Description to read “proposes to construct (install) and operate two offshore wind farm projects totaling approximately 2,840 megawatt (“MW”) in the designated Renewable Energy Lease Area OCS-A 0499.”

Can you provide a breakdown of the total 2,840 MW for Project 1 and Project 2?

As described in the FEIS, Project 1 is anticipated to be approximately 1,510 MW and Project 2 is anticipated to be approximately 1,330MW.

“The proposed Atlantic Shores South Project (consisting of Project 1 and Project 2) described in the COP and this Final EIS would be approximately 1,510 megawatts (MW) for Project 1; the number of MW is yet to be determined for Project 2. Atlantic Shores has a goal for Project 2 of 1,327 MW...”

The final size of both projects is subject to change based on numerous factors including ongoing state offshore wind solicitation outcomes.

2. This is concerning the recent Vineyard 1 blade incident. Are you planning to use GE Vernova

blades for the Atlantic Shores turbine blades? If yes, please discuss any steps you are taking/planning to take to prevent a similar incident, if any.

Atlantic Shores has announced its selection of Vestas as our preferred turbine supplier for Project 1. Refer to <https://atlanticshoreswind.com/atlantic-shores-selects-vestas-as-preferred-turbine-supplier-for-its-1-5-gw-project-in-new-jersey/>

Atlantic Shores has not yet announced a preferred turbine supplier for Project 2.

3. Regarding:

Point of Contact:

Kyle Hilberg

Kyle.Hilberg@atlanticshoreswind.com

Do I keep Jennifer Daniels as the addressee of the final permit and remove Stephanie Wilson from the cc and include you instead?

Jen Daniels should remain the addressee of the final permit. Please keep Stephanie and I both in CC if possible.

Thanks,

Frank
