Person Called/Company	Telephone Number		
Ray Andrew Buckeye Cellulose	904-584-1420		

General Subject
Bleaching processes at non-wood pulp mills.

TOPICS DISCUSSED AND ACTION TAKEN

I called Ray to discuss the type of bleaching system Buckeye Cellulose uses at its Memphis, cotton linter facility. He explained that they use a CEH stage, similar to the Lumberton plant. The Memphis facility does scrub the vents from the C stage, similar to the Lumberton plant.
