

# PRESS RELEASE

## 09.12.2024

The Electrica Group announces that it is subject to a cyber attack. Teams of specialists are working closely with national cybersecurity authorities to manage and resolve the incident, aiming to address the situation as quickly as possible, identifying the source of the attack and limiting its impact.

We would like to emphasize that the Group's critical systems have not been affected, and any disruptions that may occur in the interaction with our consumers are the result of protective measures for internal infrastructure. These measures are temporary and are designed to ensure the security of the entire system.

At this time, all specific response protocols have already been activated in accordance with internal procedures and current regulations. Our main priority is to maintain continuity in the distribution and supply of electricity, as well as to protect the managed personal data and the operational data of all entities within the Electrica Group.

We will continue to keep the public informed about the evolution of the situation's developments and the measures being taken to resolve it. In this context, we recommend that our consumers remain vigilant about any suspicious messages received on behalf of the company and avoid providing personal data through unsecured channels.

---

*Electrica Group is a key player in the electricity supply, distribution and production market in Romania, as well as one of the most important players in the energy services sector.*

*Electrica Group provides services to about 3.9 million users and has national coverage - with a coverage of 18 counties from three geographical areas for the distribution of electricity: Northern Transylvania, Southern Transylvania, Northern Muntenia, and across the country for the supply of electricity and for energy maintenance and services.*

*As of July 2014, Electrica has become a company with private majority capital, listed on the Bucharest and London stock exchanges. Electrica is the only listed Romanian company in the field of electricity distribution and supply in Romania.*
