Centerline and Fog Line Striping Scheduled to Take Place in Newport on Sept. 10

Centerline and fog line striping is tentatively scheduled to be conducted throughout Newport on Tuesday, Sept. 10 starting at 8 a.m., weather permitting. The striping will take place on a number of high-use streets throughout the city. Work is expected to take place all day.

No road or lane closures are expected due to this work, but vehicle, bicycle and pedestrian traffic are asked to take extra precaution when encountering areas with road work.

In total, approximately 24 miles of streets in Newport will receive centerline or fog line striping, which is essential to safety measures by providing clear and visible lines, helping to reduce the risk of accidents.

For questions regarding this project, please contact the City of Newport's Public Works Department at 541-574-5874.
