Detailed Report

Activities Related to Defined Contributions Plans

Metropolitan employees may participate in both 457(b) and 401(k) deferred compensation plans. Metropolitan has offered the 457(b) plan since February 1977, and the 401(k) plan since May 1985. Pursuant to the Administrative Code, the General Manager is designated to carry out the powers, duties, and responsibilities of the Plan Administrator. The General Manager has delegated authority to the Human Resources Group Manager to act as the Plan Administrator. The CAO, CFO, and Treasury & Debt Manager serve as Plan Trustees and a Deferred Compensation Advisory Committee (DCAC) provides oversight and advises the Plan Administrator on plan activities.

CalPERS Defined Benefit Pension Plan

Metropolitan originally contracted with CalPERS as a Local Miscellaneous agency on January 1, 1945, to administer its pension plan. The plan provides employees with a defined benefit upon retirement based on years of service, age, and salary. Effective July 1, 1971, Metropolitan adopted the 2% age 60 benefit formula. The formula was amended on December 28, 1997, to provide 2% at age 55. Effective January 1, 2012 contract was amended to implement a 5-year vesting schedule for represented members. Represented classic members pay their full employee contribution for their first 5 years of employment before receiving employer-paid member contributions (EPMC), and unrepresented classic members continue to receive EPMC from date of hire (DOH). Effective January 1, 2013 Pension Reform changes required that all "new" members to the CalPERS system be enrolled in the 2% at age 62 formula.

The CalPERS employer rate is set annually based on an actuarial valuation performed by a CalPERS actuary. Many factors are used in determining the employer rate including the number of employees, age of employees, payroll, and investment return. Each actuarial valuation reflects all prior differences between actual and assumed experience and adjusts the contribution rates as needed. This valuation is based on an investment return assumption of 6.8 percent, which was adopted by the board in November 2021.

Effective July 1, 2017, the unfunded accrued liability (UAL) is now reported as a dollar amount instead of added to the employer rate and is determined by looking at the Market Value of Assets of the plan and comparing it with the accrued liability of that plan**. To the extent that the assets are different from the liability, the plan will also be assessed as an unfunded liability payment. The purpose of the unfunded liability payment is to stabilize the assets and liabilities over time. The total employer contribution is the sum of the normal cost rate applied to an employer's reported payroll plus the UAL payment. These two components are the required contribution amount that employers pay CalPERS to fund their employees' pension benefits.

Metropolitan's Employer Contribution Rates

Below is a history of Metropolitan's employer contribution rates and recent projected employer rates from the actuarial valuation, not including employer-paid member contributions (EPMC).

Public Employees' Pension Reform Act (PEPRA)

As of January 1, 2013, the Public Employee Pension Reform Act (PEPRA) mandates that all "new" PERS members be hired under the 2% at age 62 formula and requires that they pay the full employee cost. For the period of July 1, 2023, through June 30, 2024, the full employee cost is 8% percent. There are currently 941 employees enrolled in this new formula as of December 2023, which is an increase of 116 employees from CY 2022. The cost of EPMC has declined by an overall 21.6% since the implementation of the 5-year time-in-grade vesting schedule for classic members, and the passage of PEPRA for new members.

Changes since the Prior Year's Valuation

There were no significant changes in actuarial assumptions or policies since the prior year's valuation.

Funding History

Each year CalPERS actuaries calculate a funded ratio comparing the market value of assets to liabilities. The funded ratios change from year-to-year and are now based on the market value of assets. The market value of assets is calculated according to the present day liquidation value of held

assets and represents the short term solvency of the plans. For the fiscal year ending 6/30/2023, CalPERS investment returns fund 56 percent of the retirement benefits. This directly impacts the employer contribution rate. The public employee pension is 67 percent funded by investment earnings and member contributions.
