Comments:

The Herbert mills put through just under 105,000 tonnes of cane for the week. This was below budget due to the recent wet weather and the associated cane supply gaps.

Daily loading is starting to increase as the wet weather begins to clear.

Macknade Mill recommenced cane processing mid-week and Victoria Mill's factory processes are stabilising.

Cane trains are now operating around the clock, across our cane rail network. Please remember to use your train brain and always give way to cane trains.
