Comments

Proserpine Mill processed just over 42,400 tonnes for the week.

This was below budget due to extended stoppages to repair a failed shaft on the juice clarifier and a tube leak in Boiler 4. There was also an extended stop caused by industrial action on Friday.

Average weekly CCS came in slightly above budget at 14.21 units.

The highest CCS was 16.72 units from a rake of plant Q240 from the Lethebrook productivity district.

Please remember to use your train brain and always take care around our cane rail network. A fully loaded cane train can take up to one kilometre to pull up. Our cane trains work around the clock, seven days a week.
