#### Comments:

Pioneer Mill was the last of the Burdekin factories to commence production, starting on 18 June. Operations across all four mills are now steady after some initial commissioning issues.

Inkerman Mill exceeded budget this week, while Invicta and Kalamia mills both met budget.

Just under 317,000 tonnes of cane were processed for the week, bringing the season-to-date total for the Burdekin factories to just over 405,000 tonnes.

The dry weather has provided favourable harvesting conditions.

The average weekly CCS was 13.56, which was above budget, helped by the cool, dry conditions.

The highest CCS sample of 16.95 was from a rake of KQ228-P in the Causeway (Inkerman) productivity district.

With the school holidays now in full swing, parents and carers are reminded of the dangers of children playing on or near the cane rail network.
