Note 1. Material accounting policy information

The consolidated financial statements for the interim half-year reporting period ended 30 June 2024 have been prepared in accordance with Singapore Financial Reporting Standard ("FRS") 34, Interim Financial Reporting.

These financial statements do not include all the notes of the type normally included in annual financial statements. Accordingly, these financial statements are to be read in conjunction with any public announcements made by the company during the interim reporting period.

The principal accounting policies adopted are consistent with those of disclosed in the audited financial statements for the reporting year ended 31 December 2023, except for change in presentation currency in accordance with IAS 8 Accounting Policies and IAS 21 The Effects of Changes in Foreign Exchange Rates which allows for an entity to present its financial statements in any currency, so long as it is translated in accordance with IAS 21. The change in presentation currency from Singapore Dollars to Australian Dollars was announced on 4 March 2024 and was carried out for the purpose of giving investors and other stakeholders a clearer understanding of Xamble's performance over time. There is no change of functional currency and the report is presented in Australian Dollars.

Changes and adoption of financial reporting standards

For the current reporting period the consolidated entity has adopted all of the new or revised Singapore Financial Reporting Standards that are mandatory for the current reporting period. The new or revised standards applicable to the group are as follows:

<u>FRS No.</u>	<u>Title</u>
FRS 1	Presentation of Financial Statements- amendment relating to Classification of Liabilities as Current or Non-current
FRS 1	Disclosure of Accounting Policies - Amendments to FRS 1 and FRS Practice Statement 2 Making Materiality Judgements
FRS 8	Definition of Accounting Estimates - Amendments to the Conceptual Framework for Financial Reporting

Note 2. Segment Reporting

For management purposes, the group is organised into the following major strategic operating segments that offer different products and services: (1) Enterprise, (2) Agencies, (3) SME. Such a structural organisation is determined by the nature of risks and returns associated with each business segment and it defines the management structure as well as the internal reporting system. It represents the basis on which the management reports the primary segment information that is available and that is evaluated regularly by the chief operating decision maker in deciding how to allocate resources and in assessing the performance. They are managed separately because each business requires different strategies.

The principal segments and type of products and services are as follows:

(1) Enterprise	Enables advertisers to engage social media influencers to promote their products and services.
(2) Agencies	Digital marketing agency specializing in social media strategy and campaign management for advertisers, as well as performance marketing agency focusing on the manufacture and construction of advertising devices across various media.
(3) Small and Medium-sized Enterprises ("SME")	Live commerce enabler aiming to provide merchants and their customers with a seamless and automated livestream shopping experience.

Segment revenues are allocated based on the country in which the customer is located. The group has a large number of customers to which it provides both products and services. The group does not rely on any single customer to a significant portion of revenues. Segment results consist of costs directly attributable to a segment as well as those that can be allocated on a reasonable basis.

Inter-segment sales are measured on the basis that the entity actually used to price the transfers. Internal transfer pricing policies of the group are as far as practicable based on market prices. The accounting policies of the operating segments are the same as those described in the significant accounting policies.
