1 - General information

Hafnia Tankers Ltd. (the "Company") is a private limited company incorporated on October 15, 2013 in the Republic of the Marshall Islands.

The Company and its subsidiaries (together, the "Group") provide seaborne transportation of petroleum products worldwide.

The Company currently holds Class A Units representing approximately 64.9% of the outstanding membership interests of the Company's direct subsidiary Hafnia Tankers LLC, while the balance of Hafnia Tankers LLC's outstanding membership interests consists of exchangeable Class B and Class C Units held by existing investors representing an interest of approximately 34.8% and 0.3%, respectively, which are presented as non-controlling interests in the Company's financial statements.

2 - Significant Accounting Policies

Basis of Preparation

These unaudited condensed consolidated financial statements for the three and nine months ended September 30, 2018 and 2017 have been prepared in accordance with International Accounting Standard ("IAS") 34 "Interim Financial Reporting" as issued by the International Accounting Standards Board ("IASB"). Certain information and footnote disclosures required by International Financial Reporting Standards as issued by the IASB ("IFRS") for a complete set of annual financial statements have been omitted, and therefore, these unaudited condensed consolidated financial statements should be read in conjunction with the Group's annual consolidated financial statements for the year ended December 31, 2017.

Accounting Policies

These condensed consolidated financial statements have been prepared using the same accounting policies and methods as were applied in the preparation of the Group's financial statements for the year ended December 31, 2017 except for the adoption of IFRS 15 - "Revenue from contracts with customers" effective January 1, 2018. The standard has changed the recognition pattern of revenue for voyage charters from recognizing revenue on a "discharge-to-discharge"-basis to a "load-to-discharge"-basis. Since the Group has no direct voyage charters, but either operates its vessels in pools or time charter the vessels out, the adoption of the new standard has had an immaterial impact.

Accounting Standards and Interpretations Not Yet Adopted

The IASB has issued new or revised accounting standards (IAS and IFRS) and interpretations (IFRICs) that are not compulsory for the Group in the preparation of the financial statements for the current period. None of them are expected to have a material impact on the financial reporting for the Group.

• IFRS 16 "Leases"

IFRS 16 is effective from January 1, 2019. The standard will change the recognition of leases. The standard is not expected to have a material effect on the Group's financial statement. The Group currently carries 5 Time-Charter contracts as operating leases, which will result in a right of use asset and related lease liability being recorded as IFRS 16 comes to effect. This will result in a reclassification of costs associated with these operating leases from "Charter Hire" to either "Depreciations" and/or "Financial expenses".

Goodwill has been allocated for impairment testing purposes to the following cash-generating units (CGUs): short-range ("SR"), medium-range ("MR") and long-range 1 ("LR1"). As of September 30, 2018, the value in use for the SR, MR and LR1 CGUs was largely equal to its carrying amounts and thus no impairment losses have been recognized during the period ended September 30, 2018. Please refer to note 4 for further information.

Contract values for vessels under construction are related to newbuild contracts which were acquired as a result of the merger between BTS Tanker Partners Limited and Hafnia Tankers LLC on December 31, 2013 (the "Combination"). The value of the contracts was added to the cost of vessels under construction on a straight line until the time when the vessels were delivered. The final vessel was delivered in the second quarter of 2017.

Vessels are pledged to secure the bank loans of the Group.

In accordance with IAS 36 Impairment of Assets, the Group has determined its cash-generating units (CGUs) based on the vessel classes, namely SR, MR and LR1. As of September 30, 2018, the fair value less cost to sell, determined on the basis of the independent broker valuations, of the SR, MR and LR1 vessels were less than their carrying amounts and accordingly, a value in use calculation was performed. The significant assumptions applied in determining the value in use of the SR, MR and LR1 fleet are the future charter rates, vessel operating expenses and the discount rate. The Group estimated the future cash flows of the SR, MR and LR1 CGUs based on a combination of the current time charter rates for the next three years and the most recent ten-year historical average for one-year time charter rates for periods thereafter. The Company estimated the operating expenses based on budgets agreed with third party technical managers for 2018, adjusted for an escalation factor. The future cash flows were then discounted to their present value.

As of September 30, 2018 the value in use for the SR, MR and LR1 CGU's was largely equal to its carrying amounts and thus no impairment losses have been recognized during the period ended September 30, 2018.

As of September 30, 2018, the Group had 6 vessels under construction through its participation in a Joint Venture, with expected delivery in 2019 and 2020.

We consider that the carrying amount of the bank loans to approximate their fair value due to the interest rates being at floating rates.

Summary of borrowing arrangements

For the nine months ended September 30, 2018 the Group repaid USD 31,950 as part of Sale and Leaseback transactions for 2 LR1 vessels. Subsequently the group has entirely repaid its senior credit facility of USD 86,000, that was associated with the Vessels.

Furthermore the Group paid installments amounting to USD 37,859 in total across the Group's outstanding loans. The Carrying amount as of September 30, 2018 has a non-cash impact related to amortization of financing fees across the Group's loan facilities, amounting to USD 2,854.

The interest rates on the bank loans are LIBOR plus a margin ranging from 2.25% to 2.60% and are to be repaid in quarterly installments with a balloon payment at the end of the seventh year.

The bank loans are secured by first priority mortgages on vessels and are subject to the following significant financial covenants:

- Working Capital above zero
- A minimum liquidity above USD 10,000 and above 5% of total debt
- Equity above USD 100,000 and above 30% of the total assets

The Group was fully compliant with all loan covenants at September 30, 2018.

The Group is subject to a minimum security value clause under which the vessel values must not exceed a percentage of the debt. The Group was fully compliant with this clause at September 30, 2018.

The following table summarizes the current contractual maturities of the Group's bank loans and presents the total principal amount based on the earliest date on which the Group can be required to pay.

12 - Derivatives

As all of the Groups debt has variable interest rates, the Group is exposed to fluctuations in interest rates.

Therefore, in order to protect the Group from significant increases in interest rates, the Group has entered into several interest rate caps with a strike of 3% against the three months LIBOR rate. The interest rate caps has a notional amount of USD 300,000 (representing 50% of peak debt) with the last cap expiring in 2023.

The underlying risk of the interest rate cap is the three months LIBOR, which is identical to the hedged risk component (i.e. the variable interest rate on the debt).

The hedge ratio of the hedging relationship was determined based on the policy to hedge up to 75% of the exposure at the time the hedge was established, and on the fact that Management believe that there is some correlation between freight rates and interest rates.

The Group does not consider the hedge relationship to include sources of inefficiency, as there is no difference in interest rate benchmark, or credit risk between the interest rate cap and the debt, the nominal amount of the hedging instrument represents 50% of the exposure, and hence there is no risk of over hedging, and the term of the hedging instrument does not exceed the term of the loans.

The Group pays quarterly interests on the interest rate cap. The fair market value of the total hedging agreements as of September 30, 2018 was a liability of USD 1,052. The fair market value of the hedging agreement is comprised of discounted premiums, a liability of USD 5,286, and the value of the hedging instruments, USD 4,234.

13 - Fair value measurement

Except for the hedge agreements entered into in the second quarter of 2015 and the first quarter of 2016, no assets or liabilities are measured at fair value after initial recognition, and the carrying values of financial instruments approximate their respective fair values. Therefore, no additional disclosure related to fair value measurement has been provided in these financial statements.

14 - Subsequent events

There have been no significant events after the balance sheet date at September 30, 2018.

The Condensed Consolidated Financial Statements were authorized for issuance by the Board of Directors on November 21, 2018.
