Notes to the Condensed Interim Consolidated Financial Statements

For the three and six months ended June 30, 2024 and 2023

(Unaudited - Expressed in Canadian dollars, except where noted)

1. NATURE OF OPERATIONS AND GOING CONCERN

Tectonic Metals Inc. (the "Company" or "Tectonic") was incorporated on April 7, 2017 under the laws of the British Columbia Business Corporations Act. The Company's head office is at 1400 - 1199 West Hastings Street, Vancouver, British Columbia, V6E 3T5.

The Company is listed on the TSX Venture Exchange ("TSX-V") trading under the symbol "TECT", is co-listed on the United States ("US") OTCQB trading under the symbol "TETOF" and is co-listed on the Frankfurt Stock Exchange trading under the symbol "T15B".

The Company's principal business activities include the acquisition and exploration of mineral exploration and evaluation assets in the US and Canada. The Company has not yet determined whether its exploration and evaluation assets contain ore reserves that are economically recoverable. The recoverability of the amounts shown for exploration and evaluation assets are dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete the development of those reserves and upon future profitable production. To date, the Company has not earned any revenues and is in the exploration stage.

These unaudited condensed interim consolidated financial statements for three and six months ended June 30, 2024 and 2023 (the "financial statements") are prepared on a going concern basis, which contemplates that the Company will be able to continue operations for the foreseeable future and be able to realize its assets and discharge its liabilities in the normal course of business. For the three and six months ended June 30, 2024, the Company incurred a net loss and comprehensive loss of \$646,738 and \$1,457,653, respectively (2023 - \$484,036 and \$1,483,253, respectively). As at June 30, 2024, the Company has a deficit of \$40,247,723 (December 31, 2023 - \$38,790,070) and working capital of \$602,088 (December 31, 2023 - \$1,996,734). There is no certainty that additional financing at terms that are acceptable to the Company will be available, and an inability to obtain financing would have a direct impact on the Company's ability to continue as a going concern. These conditions indicate a material uncertainty that may cast significant doubt on the Company's ability to continue as a going concern. Management intends to finance its operations with the proceeds from equity financings, and its current working capital.

These financial statements do not reflect the adjustments to the carrying values and classifications of assets and liabilities that would be necessary if the Company were unable to realize its assets and settle its liabilities as a going concern in the normal course of operations. Such adjustments could be material.

2. BASIS OF PREPARATION

a) Statement of compliance

These financial statements were approved by the Board of Directors and authorized for issue on August 28, 2024.

These financial statements have been prepared in accordance with IFRS Accounting Standards ("IFRS Accounting Standards") as issued by the International Accounting Standards Board and interpretations of the International Financial Reporting Interpretations Committee, applicable to the preparation of interim financial statements including International Accounting Standard 34 *Interim Financial Reporting*. These financial statements do not include all disclosures required for annual audited financial statements. Accordingly, they should be read in conjunction with the notes to the Company's audited financial statements for the years ended December 31, 2023 and 2022 (the "Annual Financial Statements").

b) Basis of presentation

These financial statements have been prepared on a historical cost basis. In addition, except for cash flow information, these financial statements have been prepared using the accrual method of accounting.

c) Functional and presentational currency

These financial statements are presented in Canadian dollars ("CAD") which is the functional and presentational currency of the Company and its subsidiaries. References to "USD" or "US\$" are to US dollars.

2. BASIS OF PREPARATION (continued)

d) Basis of consolidation

These financial statements include the financial information of the Company and entities controlled by the Company. All intercompany transactions and balances are eliminated on consolidation. Control exists where the parent entity has power over the investee and is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Subsidiaries are included in the consolidated financial statements from the date control commences until the date control ceases. The accounting policies of subsidiaries are changed where necessary to align them with the policies adopted by the Company.

A summary of the Company's subsidiaries included in these financial statements as at June 30, 2024 is as follows:

	Functional currency	Ownership percentage
District Metals LLC	CAD	100%
Tectonic Resources LLC	CAD	100%

e) Reclassification of prior amounts

The Company has reclassified certain comparative information on the condensed interim consolidated statements of loss and comprehensive loss and condensed interim consolidated statements of cash flows to conform with current period presentation.

3. MATERIAL ACCOUNTING POLICIES

The accounting policies applied in the preparation of these financial statements are consistent with those applied and disclosed in the notes to the Annual Financial Statements.

4. SIGNIFICANT ACCOUNTING ESTIMATES AND JUDGEMENTS

The preparation of the financial statements requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities and expenses. Management continually evaluates these judgments, estimates and assumptions based on experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Actual results may differ from these estimates and judgments which may cause a material adjustment to the carrying amounts of assets and liabilities. The Company's interim results are not necessarily indicative of its results for a full year. The critical judgements and estimates applied in the preparation of these financial statements are consistent with those applied and disclosed in the notes to the Annual Financial Statements.

Title to exploration and evaluation assets involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyancing history characteristic of many exploration and evaluation assets. The Company has investigated title to all of its exploration and evaluation assets and to the best of its knowledge, title to the properties is in good standing.

a) Tibbs

On June 15, 2017, the Company entered into a mining lease and option agreement with Tibbs Creek Gold, LLC ("TCG") for a 100% interest in the surface and subsurface rights to State of Alaska Mining Claims in the Fairbanks Recording District, Alaska ("Tibbs" or "Tibbs Property"). The agreement grants Tibbs a 2.5% net smelter return ("NSR"), of which 1.5% can be purchased for US\$1,500,000. The initial term of the lease is ten years.

13. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (continued)

The Company's financial instruments are exposed in varying degrees to a variety of financial risks. The Board of Directors approves and monitors the risk management processes as follows:

a) Credit risk

Credit risk is the risk of financial loss to the Company if a counterparty fails to meet an obligation under contract. Credit risk exposure arises with respect to the Company's cash. The risk exposure is limited because the Company places its instruments in institutions of high credit worthiness within Canada.

b) Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company does not hold any financial instruments with variable interest rates, other than cash and, therefore, is not exposed to significant interest rate risk.

c) Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting obligations associated with its financial liabilities. As the Company's operations do not generate cash, financial liabilities are discharged using funding through the issuance of common stock or debt as required. As at June 30, 2024, the Company had sufficient cash on hand to discharge its financial liabilities as they become due but will require additional funding to continue operations.

d) Foreign exchange risk

Foreign exchange risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

The Company is exposed to foreign currency risk to the extent that monetary assets and liabilities held by the Company are not denominated in its functional currency. The Company does not manage currency risk through hedging or other currency management tools.

A summary of the Company's financial instruments held in USD, expressed in Canadian dollars is as follows:

	June 30, 2024	December 31, 2023
	\$	\$
Cash	63,776	650,167
Accounts payable and accrued liabilities	(100,505)	(371,061)
	(36,729)	279,106

As at June 30, 2024, a 5% change in the foreign exchange rates would result in a recovery of approximately \$1,836 (December 31, 2023 - impact of \$13,955) to the financial instruments denominated in USD. The Company has no hedging agreements in place with respect to foreign exchange rates.

14. CAPITAL MANAGEMENT

The Company considers capital to include items within shareholders' equity. The Company's objective when managing capital is to safeguard the Company's ability to continue as a going concern such that it can provide returns for shareholders and benefits for other stakeholders. The management of the capital structure is based on the funds available to the Company in order to support the acquisition, exploration and evaluation of mineral properties and to maintain the Company in good standing with the various regulatory authorities. In order to maintain or adjust its capital structure, the Company may issue new shares, sell assets to settle liabilities or issue debt instruments. The Company monitors its capital structure and makes adjustments in light of changes in economic conditions and the risk characteristics of the underlying assets.

14. CAPITAL MANAGEMENT (continued)

The properties in which the Company currently has an interest are in the exploration stage and are not positive cash-flow generating; as such, the Company has historically relied on the equity markets to fund its activities. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable. The Company is not subject to any capital restrictions and the Company's approach to capital management has not changed.
