#### Hypothetical Interim Payment per Security

Valuation Date on which Worst Performer Exceeds Initial Underlying Value	Premium	Hypothetical Redemption
November 28, 2025	10.00%	\$1,100.00

If the closing value of the worst performer is greater than or equal to its initial underlying value on the valuation date before the final valuation date, then the securities will be automatically redeemed prior to maturity and you will receive a premium following that valuation date.

#### Hypothetical Payment at Maturity per Security

Assumes the securities have not been automatically redeemed prior to maturity

Hypothetical Worst Underlying Return on Final Valuation Date	Hypothetical Payment at Maturity
75.00%	\$1,400.00
50.00%	\$1,400.00
25.00%	\$1,400.00
0.00%	\$1,400.00
-0.01%	\$1,000.00
-10.00%	\$1,000.00
-25.00%	\$1,000.00
-25.01%	\$749.90
-50.00%	\$500.00
-100.00%	\$0.00

## Selected Risk Considerations

- You may lose a significant portion or all of your investment. If the securities are not automatically redeemed prior to maturity, your payment at maturity will depend on the final underlying value of the worst performer on the final valuation date. If the final underlying value of the worst performer on the final valuation date is less than its trigger value, you will lose 1% of the stated principal amount of the securities for every 1% by which the worst performer has declined from its initial underlying value.
- Your potential return on the securities is limited to the applicable premium payable upon automatic early redemption or at maturity.
- The return on the securities depends solely on the performance of the worst performer. As a result, the securities are subject to the risks of each of the underlyings and will be negatively affected if any one performs poorly.
- The securities do not pay interest.
- You will be subject to risks relating to the relationship among the underlyings. The less correlated the underlyings, the more likely it is that any one of the underlyings will perform poorly over the term of the securities. All that is necessary for the securities to perform poorly is for one of the underlyings to perform poorly.
- You will not benefit in any way from the performance of any better performing underlying.
- The securities offer downside exposure, but no upside exposure, to the underlyings.
- You will not receive dividends or have any other rights with respect to the underlyings.
- The securities are particularly sensitive to the volatility of the closing values of the underlyings on or near the valuation dates.
- The securities are unsecured debt securities and are subject to the credit risk of Citigroup Global Markets Holdings Inc. and Citigroup Inc. If Citigroup Global Markets Holdings Inc. defaults on its obligations under the securities and Citigroup Inc. defaults on its guarantee obligations, you may not receive anything owed to you under the securities.
- The securities will not be listed on any securities exchange and you may not be able to sell them prior to maturity.
- The estimated value of the securities on the pricing date is less than the issue price. For more information about the estimated value of the securities, see the accompanying preliminary pricing supplement.
- The value of the securities prior to maturity will fluctuate based on many unpredictable factors.
- The Russell 2000<sup>®</sup> Index is subject to risks associated with small capitalization stocks.
- The issuer and its affiliates may have conflicts of interest with you.
- The U.S. federal tax consequences of an investment in the securities are unclear.

The above summary of selected risks does not describe all of the risks associated with an investment in the securities. You should read the accompanying preliminary pricing supplement and product supplement for a more complete description of risks relating to the securities.
