Selected Risk Considerations

- You may not receive any return on your investment in the notes.
- The notes do not pay interest.
- Your potential return on the notes is limited to the applicable premium payable upon automatic early redemption or at maturity.
- The notes may be automatically redeemed prior to maturity, limiting the term of the notes.
- Although the notes provide for the repayment of the stated principal amount at maturity, you may nevertheless suffer a loss on your investment in real value terms.
- The performance of the notes will depend on the closing values of the underlying solely on the valuation dates, which makes the notes particularly sensitive to volatility in the closing values of the underlying on or near the valuation dates.
- You will not receive dividends or have any other rights with respect to the underlying.
- The notes are subject to the credit risk of Citigroup Global Markets Holdings Inc. and Citigroup Inc. If Citigroup Global Markets Holdings Inc. defaults on its obligations under the notes and Citigroup Inc. defaults on its guarantee obligations, you may not receive anything owed to you under the notes.
- The notes will not be listed on any securities exchange and you may not be able to sell them prior to maturity.
- Sale of the notes prior to maturity may result in a loss of principal.
- The estimated value of the notes on the pricing date will be less than the issue price. For more information about the estimated value of the notes, see the accompanying preliminary pricing supplement.
- The value of the notes prior to maturity will fluctuate based on many unpredictable factors.
- The issuer and its affiliates may have conflicts of interest with you.
- The iShares® iBoxx® \$ High Yield Corporate Bond ETF is subject to significant risks, including interest rate-related and credit-related risks.
- Our offering of the notes is not a recommendation of the underlying.
- Even if the underlying pays a dividend that it identifies as special or extraordinary, no adjustment will be required under the notes for that dividend unless it meets the criteria specified in the accompanying product supplement.
- The notes will not be adjusted for all events that may have a dilutive effect on or otherwise adversely affect the closing value of the underlying.
- The notes may become linked to an underlying other than the original underlying upon the occurrence of a reorganization event or upon the delisting of the underlying shares of the underlying.
- The value and performance of the underlying shares of the underlying may not completely track the performance of the underlying index that the underlying seeks to track or the net asset value per share of the underlying.
- Changes that affect the underlying may affect the value of your notes.

The above summary of selected risks does not describe all of the risks associated with an investment in the notes. You should read the accompanying preliminary pricing supplement and product supplement for a more complete description of risks relating to the notes.
