

NEWS RELEASE

EVgo and GM Surpass 2,000 Public Fast Charging Stalls in the U.S.

2024-12-04

Together, the companies doubled their fast-charging footprint over the last year, expanding nationwide access to public fast charging

LOS ANGELES--(BUSINESS WIRE)-- EVgo Inc. (NASDAQ: EVGO) (“EVgo” or the “Company”), one of the nation’s largest providers of public fast charging infrastructure for electric vehicles (EVs), and General Motors (GM) have surpassed 2,000 public fast charging stalls opened through their ongoing metropolitan charging collaboration. To date, EVgo and GM have built fast charging stalls in more than 390 locations in 45 metropolitan markets across 32 states as part of a longstanding collaboration to broaden access to public charging in amenity-rich locations, such as grocery stores, retail centers and city centers, while also serving customers who are unable to charge at home or work, such as renters and those living in multifamily dwellings.

With their 2,000 th stall now open, EVgo and GM are well on

their way toward completing a total of 2,850 DC fast charging stalls nationwide, which will also include **400 public fast charging stalls** at flagship destinations across major metropolitan markets in states such as Arizona, California, Florida, Georgia, Michigan, New York and Texas. The companies celebrated the opening of their 1,000 th public fast charging stall **in August 2023** in Woodbridge, Illinois, a suburb of Chicago, and continued this momentum in 2024, doubling their EV charging footprint in just over one year.

EVgo and GM’s 2,000 th stall is part of a newly opened station that features five 350kW fast chargers capable of

serving up to 10 vehicles simultaneously. Conveniently located off Interstate 215, this charging station offers drivers multiple nearby amenities including retail shopping options, as well as coffee shops and dining destinations in Murrieta, CA. This site was awarded funding by the California Energy Commission under its FAST program.

“EVgo’s longstanding collaboration with GM has helped us bring public charging to communities in more than 30 states across the U.S., and as we work to deploy our first flagship destinations next year, we are thrilled to celebrate today’s milestone of reaching 2,000 fast charging stalls built through this program,” said EVgo President, Dennis Kish. “Working with trusted automakers like GM has accelerated the buildout of our nationwide network, inspiring range confidence for today’s EV drivers and the drivers we will welcome to the EVgo network in the years to come.”

“Our collaboration with EVgo underscores our dedication to providing EV drivers with the best possible experience by expanding fast charging infrastructure across the country,” said Wade Sheffer, Vice President, GM Energy. “We look forward to continuing to offer premium charging experiences for years to come.”
