

Statement on Cybersecurity

Purpose

At Benson Hill, Information Security is committed to protecting employees, partners and the company from illegal or damaging actions by individuals, either knowingly or unknowingly.

Policy

We have a procedure in place in the case that a theft, data breach or exposure containing Protected data or Sensitive data occurs. The Board of Directors, specifically the Audit and Risk Committee oversees this risk and would be notified of the theft, breach or exposure. IT, along with the designated forensic team, will analyze the breach or exposure to determine the root cause.

We follow National Institute of Standards and Technology (NIST) guidelines to protect and prevent future occurrences. A communication plan has been developed to inform necessary parties of any such incident. We also have information security training for our staff on an annual basis and any time a change is made to our standard operating procedure.
