10. UNITED STATES TAX CONSIDERATIONS

Section 871(m) Withholding Tax

The U.S. Treasury Department has issued regulations under which amounts paid or deemed paid on certain financial instruments that are treated as attributable to U.S.-source dividends could be treated, in whole or in part depending on the circumstances, as a "dividend equivalent" payment that is subject to tax at a rate of 30 per cent. (or a lower rate under an applicable treaty). We have determined that, as of the issue date of the Notes, the Notes will not be subject to withholding under these rules. In certain limited circumstances, however, it is possible for United States alien holders to be liable for tax under these rules with respect to a combination of transactions treated as having been entered into in connection with each other even when no withholding is required. United States alien holders should consult their tax advisor concerning these regulations, subsequent official guidance and regarding any other possible alternative characterisations of their Notes for United States federal income tax purposes. See "*United States Tax Considerations – Dividend Equivalent Payments*" in the Base Prospectus for a more comprehensive discussion of the application of Section 871(m) to the Notes.

KEY INFORMATION ON THE ISSUER
Who is the Issuer of the Securities?
<p>Domicile and legal form, law under which the Issuer operates and country of incorporation: GSW is a limited liability company established under the laws of Germany on November 6, 1991. GSW has its seat in Frankfurt am Main and has been registered under the number HRB 34439 in the commercial register of the local court of Frankfurt. Its LEI is 549300CRL28LF3CSEA14.</p>
<p>Issuer's principal activities: GSW's business principally consists of issuing fungible securities (including warrants, certificates and structured bonds), carrying out financial transactions and auxiliary transactions for financial transactions and arranging hedging transactions with affiliated companies to hedge against any market risks. It does not carry out any other operating business activities.</p>
<p>Major shareholders, including whether it is directly or indirectly owned or controlled and by whom: GSW is directly wholly-owned by The Goldman Sachs Group, Inc. ("GSG").</p>
<p>Key directors: The managing directors of GSW are Michael Schmitz and Lennart Wilhelm.</p>
<p>Statutory auditors: GSW's statutory auditor is Mazars GmbH & Co. KG Wirtschaftsprüfungsgesellschaft Steuerberatungsgesellschaft, Theodor-Stern-Kai 1, 60596 Frankfurt am Main, Germany.</p>
What is the key financial information regarding the Issuer?
<p>The financial information of GSW has not been included in the Base Prospectus as it is consolidated into the audited consolidated financial statements of The Goldman Sachs Group, Inc. ("GSG") which are incorporated by reference into the Base Prospectus.</p>
<p>Qualifications in audit report on historical financial information: Not applicable; there are no qualifications in the audit report of GSW on its historical financial information.</p>
What are the key risks that are specific to the Issuer?
<p>The Issuer is subject to the following key risks:</p>

- The payment of any amount due on the Securities is subject to the credit risk of the Issuer and Guarantor. The Securities are the Issuer's unsecured obligations and the Guarantee is the Guarantor's unsecured obligation. Investors are dependent on the Issuer's and Guarantor's ability to pay all amounts due on the Securities, and therefore investors are subject to the Issuer's and Guarantor's credit risk and to changes in the market's view of the Issuer's creditworthiness. Neither the Securities nor the Guarantee are bank deposits, and neither are insured or guaranteed by any compensation or deposit protection scheme. The value of and return on the Securities will be subject to the Issuer's credit risk and to changes in the market's view of the Issuer's creditworthiness.
- GSG and its consolidated subsidiaries ("**Goldman Sachs**") is a leading global investment banking, securities and investment management group and faces a variety of significant risks which may affect the Issuer's and the Guarantor's ability to fulfil their obligations under the Securities, including market risks, liquidity risks, credit risks, operational risks, legal and regulatory risks, competition risks and market developments and general business environment risks.
- Investors are exposed to the risks relating to the creditworthiness of GSW due to the nature of GSW as an issuance vehicle with limited assets. Besides issuing fungible securities GSW does not carry out any further operating business activity and the issued share capital of GSW amounts to EUR 51,129.19 (DM 100,000.00) only. Investors are therefore exposed to a significantly greater credit risk by purchasing the securities compared to an issuer equipped with significantly more capital. In an extreme case, i.e. the insolvency of GSW, an investment in a security issued by GSW may mean the complete loss of the invested amount (risk of total loss), if the risk cannot be absorbed by a guarantee issued by GSG in favour of the investors.
- Investors are exposed to the risks relating to the creditworthiness of GSW due to the dependency of GSW on hedging and related lending arrangements. To hedge its claims arising from the issued securities, GSW enters into hedging transactions with GSI and potentially going forward with other Goldman Sachs entities. In connection therewith, GSW is exposed to the risk of default and insolvency risk of the parties with whom GSW concludes hedging transactions or related lending transactions. Since GSW enters into such hedging and lending transactions primarily with Goldman Sachs entities, GSW is exposed to a so-called cluster risk. Therefore, an illiquidity or insolvency of companies affiliated with GSW may directly result in an insolvency of GSW.
- Investors are exposed to the risk relating to the creditworthiness of GSW as a subsidiary of GSG. An insolvency of GSW may occur despite of the fact that GSW is a subsidiary of GSG. A potential failure of GSG or a company affiliated with GSG and measures taken in accordance with the U.S. Resolution Regimes may also affect GSW. Except for the guarantee of GSG or another Goldman Sachs entity no further credit enhancement is provided. As a consequence, in case the hedging arrangements prove to be insufficient to satisfy the claims of all holders and the guarantor fails to satisfy the liabilities arising from the guarantee, investors may lose parts of their investment or their entire investment (risk of total loss).

Non-scheduled Early Repayment Amount: The Securities may be redeemed prior to the scheduled maturity (i) at the Issuer's option (a) if the Issuer determines a change in applicable law has the effect that performance by the Issuer or its affiliates under the Securities or hedging transactions relating to the Securities has become (or there is a substantial likelihood in the immediate future that it will become) unlawful or impracticable (in whole or in part), or (b) where applicable, if the Calculation Agent determines that certain additional disruption events or adjustment events as provided in the terms and conditions of the Securities have occurred or (ii) upon notice by a Holder declaring such Securities to be immediately repayable due to the occurrence of an event of default which is continuing.

In such case, the Non-scheduled Early Repayment Amount payable on such unscheduled early redemption shall be, for each Calculation Amount of each Security, (A) in the case of (i) above, an amount equal to the Calculation Amount, multiplied by the result of (x) the fair market value of the Preference Share on the date on which the Notes are scheduled for unscheduled early redemption divided by (y) the fair market value of the Preference Share on the Issue Date; and (B) in the case of (ii) above, an amount representing the suitable market value of the Calculation Amount of each Security taking into account all relevant factors less all costs incurred by the Issuer or any of its affiliates in connection with such early redemption, including those related to unwinding of any underlying and/or related hedging arrangement.

Qualifications in audit report on historical financial information: Not applicable; there are no qualifications in the audit report of GSI on its historical financial information

Risk factors associated with the Guarantor:

- Goldman Sachs is a leading global investment banking, securities and investment management firm that faces a variety of significant risks which may affect GSI's ability to fulfil its obligations under the Securities, including market and credit risks, liquidity risks, business activities and industry risks, operational risks and legal, regulatory and reputational risks.
- GSI is a wholly-owned subsidiary of the Goldman Sachs group and a key banking subsidiary of the Goldman Sachs group. As a result it is subject to a variety of risks that are substantial and inherent in its businesses including risks relating to economic and market conditions, regulation, Brexit, market volatility, liquidity, credit markets, concentration of risk, credit quality, composition of client base, derivative transactions, operational infrastructure, cyber security, risk management, business initiatives, operating in multiple jurisdictions, conflicts of interest, competition, changes in underliers, personnel, negative publicity, legal liability, catastrophic events and climate change.
- GSI is subject to the Bank Recovery and Resolution Directive, which is intended to enable a range of actions to be taken by a resolution authority in relation to credit institutions and investment firms considered by the resolution authority to be at risk of failing and where such action is necessary in the public interest. The resolution powers available to the resolution authority include powers to (i) write down the amount owing, including to zero, or convert the Securities into other securities, including ordinary shares of the relevant institution (or a subsidiary) – the so-called "bail-in" tool; (ii) transfer all or part of the business of the relevant institution to a "bridge bank"; (iii) transfer impaired or problem assets to an asset management vehicle; and (iv) sell the relevant institution to a commercial purchaser. In addition, the resolution authority is empowered to modify contractual arrangements, suspend enforcement or termination rights that might otherwise be triggered. The resolution regime is designed to be triggered prior to insolvency, and holders of Securities may not be able to anticipate the exercise of any resolution power by the resolution authority. Further, holders of Securities would have very limited rights to challenge the exercise of powers by the resolution authority, even where such powers have resulted in the write down of the Securities or conversion of the Securities to equity..

What are the key risks that are specific to the Securities?

Risk factors associated with the Securities: The Securities are subject to the following key risks:

- Depending on the performance of the Underlying Asset, you may lose some or all of your investment.
- The market price of your Securities prior to maturity may be significantly lower than the purchase price you pay for them. Consequently, if you sell your Securities before the stated scheduled redemption date, you may receive far less than your original invested amount.
- Your Securities may be redeemed in certain extraordinary circumstances set out in the conditions of the Securities prior to scheduled maturity and, in such case, the early redemption amount paid to you may be less than the amount you paid for the Securities and might be zero.
- The value of and return on your Securities is dependent on the change in the fair market value of the Preference Shares on the valuation date from their fair market value on the initial valuation date. The fair market value of the Preference Shares will depend (amongst other things) on the redemption amount payable under the Preference Shares. Such amount will be determined by reference to a particular payout formula, and will depend on the performance of one or more underlying assets (the "**Preference Share Underlying(s)**"). As a purchaser of the Securities you are therefore exposed to the performance of the Preference Share Underlying(s), which may be subject to unpredictable change over time.
- Equity indices are comprised of a synthetic portfolio of shares, and as such, the performance of a Preference Share Underlying which is an equity index is dependent upon the macroeconomic factors relating to the shares that underlie such equity index, such as interest and price levels on the capital markets, currency developments, political factors as well as company-specific factors such as earnings position, market position, risk situation, shareholder structure and distribution policy, as well as the index composition, which may change over time.
- Past performance of the Preference Share Underlying(s) is not indicative of future performance. You should not regard any information about the past performance of the Preference Share Underlying(s) as indicative of the range of, or trends in, fluctuations in the Preference Share Underlying that may occur in the future. The Preference Share Underlying(s) may perform differently (or the same) as in the past, and this could have material adverse effect on the value of and return on your Securities.

- Your ability to participate in any positive change in the value of the Preference Share Underlying(s) over the term of the Preference Shares will be limited, no matter how much the level, price, rate or other applicable value of the Preference Share Underlying(s) may rise beyond the cap level over the life of the Preference Shares. Accordingly, the value of and return on the Preference Shares and, in turn, the Securities may be significantly less than if you had purchased the Preference Share Underlying(s) directly.
