

## ZimVie Announces the Release of RealGUIDE® 5.4 Software Update

July 31, 2024

### Latest Update for ZimVie's RealGUIDE® Dental Implant Software Suite Introduces New Features to Drive Provider Efficiency and Savings

PALM BEACH GARDENS, Fla., July 31, 2024 (GLOBE NEWSWIRE) -- ZimVie Inc. (Nasdaq: ZIMV), a global life sciences leader in the dental market, today announced the release of its RealGUIDE® 5.4 software. The update is now available in all markets where RealGUIDE is sold, enhancing ZimVie's current RealGUIDE software suite for treatment planning and implant restoration.

RealGUIDE 5.4 now helps users manage procedural risk more effectively and plan complex cases in a fraction of the time. The most significant enhancement in this version is one-click nerve detection and automated bone and tooth segmentation. This empowers clinicians with greater case insights and treatment planning confidence, as well as significant time savings. Additionally, RealGUIDE 5.4 introduces new restorative design workflows meeting the evolving needs of the most demanding clinics and dental laboratories. New amplified CAD workflows empower labs to create the most attractive designs in implant dentistry. Now with an automated 'split-bar' toolset, this new feature makes the creation of complex multi-material prostheses for full-mouth rehabilitation intuitive and efficient. Additionally, new cloud-based design libraries offer improved accessibility for the restorative professional.

"This most recent version of RealGUIDE software underscores ZimVie's commitment to innovation and empowers healthcare providers to deliver exceptional dental care with greater efficiency, safety, and esthetic outcomes, thereby lowering the cost and improving the quality of implant dentistry," said Vafa Jamali, President and Chief Executive Officer, ZimVie. "Our goal is to drive guided surgery to be the standard of excellence for all implant cases and subsequently drive greater adoption of implant dentistry."

#### About RealGUIDE

RealGUIDE is a software suite that offers precise planning, designing, and predictable placement of dental implants and restorations. It consists of several software modules that may be combined as desired for a thorough diagnosis, intended implant positioning, advanced surgical guide design, and cutting-edge restorative design and manufacturing. For more information, please visit the [RealGUIDE](#) website.
