

Loftus Peak Global Disruption Fund

Investing | Future Focused

Research Ratings:

June 2024 Update

Founded in 2014, Loftus Peak is a global equities fund manager with a focus on investment in listed disruptive businesses. We have extensive experience and bring significant discipline to the process. Our Australian Securities Exchange listed Fund (**ASX code: LPGD**) comprises some of the best and fastest-growing companies in the world – companies that we believe are driving change across all industries globally, constructed on the basis of strict criteria and included at carefully determined valuations. Holdings include large capitalisation names like Microsoft and Google (Alphabet) as well as many others that we expect to be household names in the future, such as Advanced Micro Devices and Qualcomm. This approach to investment across a wide range of global industries lowers the concentration risk inherent in the typical Australian portfolio, with its heavy skew toward banks, resources and the Australian dollar.

Review and Performance

The Fund gained +5.8% net-of-fees in June, outperforming the MSCI All Countries World Index (in AUD) from Bloomberg by +4.0%. The month was dotted with economic data pointing to a weakening consumer and a softer economy – all positive signs that give the green light to Powell and the Federal Reserve to cut rates in the back half of the year. For the full financial year, the Fund gained +41.4% net-of-fees while the benchmark grew +19.3%, outperformance of +22.1%. Apple overtook **Microsoft** as the largest company in the world by market capitalisation. Less than a week later, Apple was supplanted by Nvidia. The chip company then sold off with Microsoft retaking its position from Apple by the end of the month. All three companies are jostling to leverage artificial intelligence (AI) to entice users and investors.

¹ Net-of-fees performance for the Fund is based on end-of-month redemption prices after the deduction of fees and expenses and the reinvestment of all distributions. Investment return and the principal value fluctuate, so your units, when sold, may be worth more or less than the original cost. For further details, please refer to the Fund's Product Disclosure Statement and Target Market Determination.

² The benchmark for the Fund is the MSCI All Countries World Index (net) as expressed in AUD from Bloomberg.

³ Outperformance is shown as the Loftus Peak (Net) minus the Benchmark.

Contributors and Detractors to Return

Taiwan Semiconductor Manufacturing (TSMC) was the largest single contributor for the month, adding +1.7% to the Fund. TSMC dominates the fabrication of high-end logic chips. For the last year, demand for datacentre semiconductors from companies like **Advanced Micro Devices** and Nvidia (some of TSMC's largest customers) have helped push revenues higher. More recently, Apple's integration of AI (which requires newer, better chips) as well as the broader cyclical recovery of smartphones has bolstered TSMC's top line. Monthly net revenue for May was the third highest ever and was up +30.1% year-over-year. TSMC has also obtained approval for another USD10.3 billion in subsidies from the Japanese government for the construction of a fabrication plant in Japan.

Amazon was the second largest contributor, adding +0.7% to the Fund. Despite being the largest cloud provider in the world, Amazon's AI offering has generally been considered second-rate compared to competitors like **Alphabet** and Microsoft. As much as Microsoft and Alphabet are better positioned to monetise their own AI products to consumers, a large amount of third party AI workloads will nevertheless find their way onto Amazon Web Services (AWS) given its scale and existing relationships with a significant number of businesses and governments. Across June the share price rose to reflect this. The advertising segment of Amazon's ecommerce business also continues to perform strongly. The company recently hit all-time highs, creeping ahead of the previous high in 2021. Microsoft achieved this a year ago while Alphabet did likewise in January this year.

Broadcom was the third best performer of the month, contributing +0.6% to the Fund. The company reported earnings in the first half of the month, posting a strong beat off the back of inflecting demand for AI products. Historically, Broadcom designs the infrastructure behind datacentres, including the switches and adapters. Adding to this are ramping application specific integrated circuits (ASICs) for AI end uses.

Key Facts

Unit Prices

Date	30 June 2024
Entry Price (in AUD)	4.6751
Exit Price (in AUD)	4.6517

These ASICs are a less flexible but ultimately cheaper (at scale) alternative to graphics processing units (GPUs). Alphabet's TPU chips are among Broadcom's ASIC offerings.

Qualcomm was the worst performing holding for the month, detracting -0.3% from the Fund. Qualcomm sold off along with Nvidia (and most of the broader semiconductor sector). We remain bullish. The company is exposed to a cyclical recovery in smartphones as well as the continuing secular expansion into the internet-of-things and automotive end markets. These tailwinds underpin our valuations.

June also saw the much-anticipated launch of Microsoft's Copilot+ PC, which contains Qualcomm's Snapdragon X Elite. This chip - hailed as the hardware behind the first AI PC - is also (arguably) the first meaningful instance of Windows on ARM. This month, we had the chance to test the product ourselves. The improvement to battery life from the ARM architecture is meaningful, bringing Windows products into comparability with Apple devices. The foray into PCs is added optionality for a stock which already has a robust growth story.

The Australian dollar appreciated +0.4% against the US dollar over the month, so the Fund's US dollar positions decreased. As at 28 June 2024, the Fund carried a foreign currency exposure of 96.4%.

Selected Contributors and Detractors

Portfolio Construction

At June month end, the Fund was 98.2% invested in 28 holdings with the balance in cash exposure. The Fund has a high exposure to large capitalisation names which are highly cash generative with strong balance sheets. Focusing on high quality companies helps the Fund to withstand difficult periods in the market and drive strong, long-term outcomes for investors.

Top 10 Holdings (in alphabetical order)	
Alphabet	Netflix
Amazon	Qualcomm
AMD	Roku
Meta	Samsung
Microsoft	Taiwan Semiconductor

Capitalisation USD	
Mega Cap > \$100b	74.1%
Large Cap \$50-100b	10.7%
Mid Cap \$2-50b	13.3%
Small Cap < \$2b	0.0%

RATINGS DISCLAIMERS

LONSEC: The rating issued May 2024 for MMC0110AU is published by Lonsec Research Pty Ltd ABN 11 151 658 561 AFSL 421 445 (Lonsec). Ratings are general advice only, and have been prepared without taking account of your objectives, financial situation or needs. Consider your personal circumstances, read the product disclosure statement and seek independent financial advice before investing. The rating is not a recommendation to purchase, sell or hold any product. Past performance information is not indicative of future performance. Ratings are subject to change without notice and Lonsec assumes no obligation to update. Lonsec uses objective criteria and receives a fee from the Fund Manager. The Loftus Peak Global Disruption Fund's Target Market Determination is available at <http://www.loftuspeak.com.au> in the downloads tab. It describes who this financial product is likely to be appropriate for (i.e. the target market), and any conditions around how the product can be distributed to investors. It also describes the events or circumstances where the Target Market Determination for this financial product may need to be reviewed.

The Team

Alex Pollak

CIO and Founder

With 25 years' experience in disruptive business models gained during a career with Macquarie Bank, Alex heads one of the best-performing teams in global investment management in Australia.

He was instrumental in bringing both Seek and Carsales.com to the Australian stock market. He has a deep understanding of the mechanisms through which disruption changes business models and the impact it has on company valuation.

Anshu Sharma

Portfolio Manager and Founder

Anshu began his career as an analyst in global disruption investment more than fifteen years ago. This was soon followed by portfolio manager responsibilities across information technology and communications services sectors, before taking on the Portfolio Manager role at Loftus Peak as one of the founders of the firm in 2014.

Being mentored by the best in this space early on in his career, and having travelled extensively to meet hundreds of global companies, Anshu brings a wealth of experience to investing in disruption.

Rick Steele

CEO

Drawing on more than 30 years in funds management and government Rick is the CEO of Loftus Peak. After a successful career in the Australian Treasury, Rick held senior positions in a number of financial services firms in Australia, including more than a decade at BT Funds Management.

Rick is also Chairman of CitizenBlue, an impact enterprise operating a container recycling service for its environmental members.
