The Corporation shall deliver as soon as reasonably practicable after delivery to the Corporation of such certificates, or after such agreement and indemnification, to such holder of Series A Convertible Preferred Stock at the address of the holder on the stock books of the Corporation, a certificate or certificates for the number of shares of Common Stock to which the holder shall be entitled as aforesaid. 4) Issuer's Business, Products and Services

A. Summarize the issuer's business operations (If the issuer does not have current operations, state "no operations")

The Company has been engaged in organizational efforts and obtaining initial financing. The Company seeks to serve as a vehicle to pursue a business combination and has made no efforts thus far to identify a possible business combination. As a result, the Company has not conducted negotiations or entered into a letter of intent concerning any target business. The business purpose of the Company is to seek the acquisition of or merger with an existing company.

The Company, based on proposed business activities, is a "blank check" company. The U.S. Securities and Exchange Commission (the SEC) defines those companies as "any development stage company that is issuing a penny stock, within the meaning of Section 3 (a)(51)-1 of the Securities Exchange Act of 1934, as amended (the Exchange Act), and that has no specific business plan or purpose, or has

indicated that its business plan is to engage in a merger or acquisition with an unidentified company or companies or other entity or person." Under SEC Rule 12b-2 under the Exchange Act, the Company also qualifies as a shell company, because it has no or nominal assets (other than cash) and no or nominal operations. Many states have enacted statutes, rules and regulations limiting the sale of securities of "blank check" companies in their respective jurisdictions. Management does not intend to undertake any efforts to cause a market to develop in our securities, either debt or equity.

The Company current business plan is to serve as a vehicle to investigate and, if such investigation warrants, acquire a target company or business seeking the perceived advantages of being a publicly held corporation. The Company's principal business objective for the next 12 months and beyond such time will be to achieve long-term growth potential through a combination with a business rather than immediate, short-term earnings. The Company will not restrict its potential candidate target companies to any specific business, industry or geographical location and, thus, may acquire any type of business. The company may merge with or acquire another company in which the promoters, management, or promoters' or managements' affiliates or associates, directly or indirectly, have an ownership interest. We anticipate that our controlling shareholder will receive cash for the sale of its shares plus a minority equity stake in the post-merger company. We anticipate the Company will get a new director, new business plan of an operating company and fresh capital to pay expenses. A business combination would help us grow and cease to be a shell company.

The analysis of new business opportunities will be undertaken by, or under the supervision of, Thomas DeNunzio, our sole officer and director. As of this date, the Company has not entered into any definitive agreement with any party, nor have there been any specific discussions with any potential business combination candidate regarding business opportunities for the Company. The Company has unrestricted flexibility in seeking, analyzing and participating in potential business opportunities.

B. List any subsidiaries, parent company, or affiliated companies.

Note 2 - Summary of Significant Accounting Policies

Basis of Presentation

This summary of significant accounting policies is presented to assist in understanding the Company's financial statements. These accounting policies conform to accounting principles, generally accepted in the United States of America, and have been consistently applied in the preparation of the financial statements.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the

reported amounts of revenues and expenses during the reporting period. In the opinion of management, all adjustments necessary in order to make the financial statements not misleading have been included. Actual results could differ from those estimates.

Cash and Cash Equivalents

The Company considers all highly liquid investments with an original maturity of three months or less when purchased to be cash equivalents. Cash and cash equivalents at June 30, 2024 and December 31, 2023 were \$0 for both periods.

Income Taxes

The Company accounts for income taxes under ASC 740, "*Income Taxes*." Under the asset and liability method of ASC 740, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statements carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period the enactment occurs. A valuation allowance is provided for certain deferred tax assets if it is more likely than not that the Company will not realize tax assets through future operations. No deferred tax assets or liabilities were recognized at June 30, 2024 and December 31, 2023.

Basic Earnings (Loss) Per Share

The Company computes basic and diluted earnings (loss) per share in accordance with ASC Topic 260, *Earnings per Share*. Basic earnings (loss) per share is computed by dividing net income (loss) by the weighted average number of common shares outstanding during the reporting period. Diluted earnings (loss) per share reflects the potential dilution that could occur if stock options and other commitments to issue common stock were exercised or equity awards vest resulting in the issuance of common stock that could share in the earnings of the Company.

The Company does not have any potentially dilutive instruments as of June 30, 2024 and, thus, anti-dilution issues are not applicable.

Fair Value of Financial Instruments

The Company's balance sheet includes certain financial instruments. The carrying amounts of current assets and current liabilities approximate their fair value because of the relatively short period of time between the origination of these instruments and their expected realization.

ASC 820, *Fair Value Measurements and Disclosures*, defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. ASC 820 also establishes a fair value hierarchy that distinguishes between (1) market participant assumptions developed based on market data obtained from independent sources (observable inputs) and (2) an entity's own assumptions about market participant assumptions developed based on the best information available in the circumstances (unobservable inputs). The fair value hierarchy consists of three broad levels, which gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy are described below:

- Level 1 - Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.
- Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly, including quoted prices for similar assets or liabilities in active markets;

quoted prices for identical or similar assets or liabilities in markets that are not active; inputs other than quoted prices that are observable for the asset or liability (e.g., interest rates); and inputs that are derived principally from or corroborated by observable market data by correlation or other means.
- Level 3 - Inputs that are both significant to the fair value measurement and unobservable.

Fair value estimates discussed herein are based upon certain market assumptions and pertinent information available to management as of June 30, 2024. The respective carrying value of certain on-balance-sheet financial instruments approximated their fair values due to the short-term nature of these instruments. These financial instruments include accrued expenses.

Related Parties

The Company follows ASC 850, *Related Party Disclosures*, for the identification of related parties and disclosure of related party transactions.

Share-Based Compensation

ASC 718, "*Compensation – Stock Compensation*", prescribes accounting and reporting standards for all share-based payment transactions in which employee services are acquired. Transactions include incurring liabilities, or issuing or offering to issue shares, options, and other equity instruments such as employee stock ownership plans and stock appreciation rights. Share-based payments to employees, including grants of employee stock options, are recognized as compensation expense in the financial statements based on their fair values. That expense is recognized over the period during which an employee is required to provide services in exchange for the award, known as the requisite service period (usually the vesting period).

The Company accounts for stock-based compensation issued to non-employees and consultants in accordance with the provisions of ASC 505-50, "*Equity – Based Payments to Non-Employees*." Measurement of share-based payment transactions with non-employees is based on the fair value of whichever is more reliably measurable: (a) the goods or services received; or (b) the equity instruments issued. The fair value of the share-based payment transaction is determined at the earlier of performance commitment date or performance completion date.

The Company had no stock-based compensation plans as of June 30, 2024.

The Company's stock-based compensation for the periods ended June 30, 2024 and June 30, 2023 was \$0 for both periods.

Recently Issued Accounting Pronouncements

In February 2016, the FASB issued ASU 2016-02, *Leases (Topic 842)*. ASU 2016-02 is amended by ASU 2018-01, ASU 2018-10, ASU 2018-11, ASU 2018-20 and ASU 2019-01, which FASB issued in January 2018, July 2018, July 2018, December 2018 and March 2019, respectively (collectively, the amended ASU 2016-02). The amended ASU 2016-02 requires lessees to recognize on the balance sheet a right-of-use asset, representing its right to use the underlying asset for the lease term, and a lease liability for all leases with terms greater than 12 months. The recognition, measurement, and presentation of expenses and cash flows arising from a lease by a lessee have not significantly changed from current GAAP. The amended ASU 2016-02 retains a distinction between finance leases (i.e. capital leases under current GAAP) and operating leases. The classification criteria for distinguishing between finance leases and operating leases will be substantially similar to the classification criteria for distinguishing between capital leases and operating leases under current GAAP. The amended ASU 2016-02 also requires qualitative and quantitative disclosures designed to assess the amount, timing, and uncertainty of cash flows arising from leases. A modified retrospective transition approach is permitted to be used when an entity adopts the amended ASU 2016-02, which includes a number of optional practical expedients that entities may elect to apply.

We have no assets and or leases and do not believe we will be impacted in the foreseeable future by the newly adopted accounting standard(s) mentioned above.

The Company has implemented all new accounting pronouncements that are in effect and that may impact its financial statements and does not believe that there are any other new pronouncements that have been issued that might have a material impact on its financial position or results of operations.

Note 3 - Going Concern

The Company's financial statements are prepared in accordance with generally accepted accounting principles applicable to a going concern that contemplates the realization of assets and liquidation of liabilities in the normal course of business.

The Company demonstrates adverse conditions that raise substantial doubt about the Company's ability to continue as a going concern for one year following the issuance of these financial statements. These adverse conditions are negative financial trends, specifically operating loss, working capital deficiency, and other adverse key financial ratios.

The Company has not established any source of revenue to cover its operating costs. Management plans to fund operating expenses with related party contributions to capital. There is no assurance that management's plan will be successful. The financial statements do not include any adjustments relating to the recoverability and classification of recorded assets, or the amounts and classification of liabilities that might be necessary in the event that the Company cannot continue as a going concern.

Note 4 - Income Taxes

The Company has not recognized an income tax benefit for its operating losses generated based on uncertainties concerning its ability to generate taxable income in future periods. The tax benefit for the period presented is offset by a valuation allowance established against deferred tax assets arising from the net operating losses, the realization of which could not be considered more likely than not. In future periods, tax benefits and related deferred tax assets will be recognized when management considers realization of such amounts to be more likely than not. As of June 30, 2024, the Company has incurred a net loss of approximately \$154,787 which resulted in a net operating loss for income tax purposes.

On December 22, 2017, the Tax Cuts and Jobs Act of 2017 was signed into law. This legislation reduced the federal corporate tax rate from the previous 35% to 21%.

Due to the change in ownership provisions of the Tax Reform Act of 1986, net operating loss carryforwards for Federal income tax reporting purposes are subject to annual limitations. Should a change in ownership occur, net operating loss carryforwards may be limited as to use in future years.

Note 5 - Commitments and Contingencies

The Company follows ASC 450-20, *Loss Contingencies*, to report accounting for contingencies. Liabilities for loss contingencies arising from claims, assessments, litigation, fines and penalties and other sources are recorded when it is probable that a liability has been incurred and the amount of the assessment can be reasonably estimated. There were no commitments or contingencies as of June 30, 2024
