These consolidated financial statements have been prepared on a going concern basis, which implies the Company will continue to realize its assets and discharge its liabilities in the normal course of business. The continuation of the Company as a going concern is dependent upon the continued financial support from its shareholders, the ability of the Company to obtain necessary debt or equity financing to continue operations, and the attainment of profitable operations. There is no guarantee that the Company will be successful in these efforts. These consolidated financial statements do not include any adjustments to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue as a going concern.

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Accounting

These consolidated financial statements present the balance sheets, statements of operations, stockholders' deficit and cash flows of the Company. These financial statements are presented in United States dollars and have been prepared in accordance with accounting principles generally accepted in the United States. The Company's financial statements are prepared using the accrual method of accounting. The Company has elected a December 31 fiscal year end.

Use of Estimates and Assumptions

The preparation of these financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates. The results of operations and cash flows for the periods shown are not necessarily indicative of the results to be expected for the full year. The Company regularly evaluates estimates and assumptions related to valuation of license, stock-based compensation, and deferred income tax asset valuation allowances.

Cash and Cash Equivalents

The Company considers all highly liquid investments with maturity of three months or less when purchased to be cash equivalents.

Digital Assets

The Company owns the following significant digital assets:

Category	Description	Amount
1ai	Token 110,700,000 @ \$0.000369	\$ 40,848
APO	Token 1,500,000 @ \$0.60	\$ 900,000
EGGE tokens	Token 800,000,000 @ \$0.10	\$80,000,000

Financial Instruments and Fair Value Measures

ASC 820, "Fair Value Measurements and Disclosures" requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. ASC 820 establishes a fair value hierarchy based on the level of independent, objective evidence surrounding the inputs used to measure fair value. A financial instrument's categorization within the fair value hierarchy is based upon the lowest level of input that is significant to the fair value measurement. ASC 820 prioritizes the inputs into three levels that may be used to measure fair value:

Level 1

Level 1 applies to assets or liabilities for which there are quoted prices in active markets for identical assets or liabilities.

Level 2

Level 2 applies to assets or liabilities for which there are inputs other than quoted prices that are observable for the asset or liability such as quoted prices for similar assets or liabilities in active markets; quoted prices for identical assets or liabilities in markets with insufficient volume or infrequent transactions (less active markets); or model-derived valuations in which significant inputs are observable or can be derived principally from, or corroborated by, observable market data.

Level 3

Level 3 applies to assets or liabilities for which there are unobservable inputs to the valuation methodology that are significant to the measurement of the fair value of the assets or liabilities.

The Company's financial instruments consist principally of cash, accounts payable and accrued liabilities, convertible debenture, stock-settled debt obligation, and amounts due to related parties. Pursuant to ASC 820, the fair value of cash is determined based on "Level 1" inputs, which consist of quoted prices in active markets for identical assets. The recorded values of all other financial instruments approximate their current fair values because of their nature and respective maturity dates or durations. Unless otherwise noted, it is management's opinion that the Company is not exposed to significant interest, currency or credit risks arising from these financial statements.

Gain / Loss on Investments

The Company used the fair value in recording each class of financial instruments including Investment - Acquired

companies, Digital Assets (Tokens), Shares Receivable. The Fair Value is obtained from quoted market prices, discounted cash flow models and option pricing models, as appropriate.

There is a significant change in the value of asset due to cancellation of share receivable and due to the material decrease of the price / Fair Value of Starfleet Innotech Inc. (SFIO) shares.

Stock-based Compensation

The Company records stock-based compensation in accordance with ASC 718 “Compensation – Stock Compensation” and ASC 505, “Equity Based Payments to Non-Employees”, using the fair value method. All transactions in which goods or services are the consideration received for the issuance of equity instruments are accounted for based on the fair value of the consideration received or the fair value of the equity instrument issued, whichever is more reliably measurable.

Loss per Share

The Company computes net loss per share in accordance with ASC 260, “Earnings per Share”, which requires presentation of both basic and diluted earnings per share (“EPS”) on the face of the statements of operations. Basic EPS is computed by dividing net loss available to common shareholders (numerator) by the weighted average number of shares outstanding (denominator) during the period. Diluted EPS gives effect to all dilutive potential common shares outstanding during the period using the treasury stock method and convertible preferred stock using the if-converted method. In computing diluted EPS, the average stock price for the period is used in determining the number of shares assumed to be purchased from the exercise of stock options or warrants. Diluted EPS excludes all dilutive potential shares if their effect is anti-dilutive.

Comprehensive Loss

ASC 220, “Comprehensive Income”, establishes standards for the reporting and display of comprehensive loss and its components in the consolidated financial statements. As of March 31, 2021 and at December 31, 2020, the Company had no items representing comprehensive income or loss.

Income Taxes

A deferred tax asset or liability is recorded for all temporary differences between financial and tax reporting and net operating loss carry forwards. Deferred tax expense (benefit) results from the net change during the year of deferred tax assets and liabilities. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Deferred tax assets and liabilities are adjusted for the effects of changes in tax laws and rates on the date of enactment.

When required, the Company records a liability for unrecognized tax positions, defined as the aggregate tax effect of differences between positions taken on tax returns and the benefits recognized in the financial statements. Tax positions are measured at the largest amount of benefit that is greater than fifty percent likely of being realized upon ultimate settlement. No tax benefits are recognized for positions that do not meet this threshold. The Company has no uncertain tax positions that require the Company to record a liability. The Company’s tax years ended December 31, 2020 and December 31, 2019 remain subject to examination by Federal and state jurisdictions.

The Company recognizes penalties and interest associated with tax matters as part of the income tax provision and includes accrued interest and penalties with the related tax liability in the balance sheet. The Company had no accrued penalties and interest as of December 31, 2020 or as of December 31, 2019.

Recently Issued Accounting Pronouncements

The Company has implemented all new accounting pronouncements that are in effect and that may impact its financial statements and does not believe that there are any other new accounting pronouncements that have been issued that might have a material impact on its financial position or results of operations.
