Basis of Presentation The unaudited consolidated financial statements of the Company have been prepared in accordance with the U.S. Generally Accepted Accounting Principles (“U.S. GAAP”). The Company is a development stage enterprise devoting substantial efforts to establishing a new business, financial planning, raising capital, and research into products or services which may become part of the Company’s product or service portfolio. A development stage company is defined as one in which all efforts is devoted substantially to establishing a new business and, even if planned principal operations have commenced, revenues are insignificant.

Note 2: Summary of Significant Accounting Policies

Cash and Cash Equivalents Due to no current operations, there has been no change in our cash or cash equivalents. For purposes of reporting within the statements of cash flows, the Company considers all cash on hand, cash accounts not subject to withdrawal restrictions or penalties, and all highly liquid debt instruments purchased with a maturity of six months or less to be cash and cash equivalents.

Lease ASC Topic 842, “Leases” requires recognition of leases on the balance sheets as right-of-use (“ROU”) assets and lease liabilities. ROU assets represent the Company’s right to use underlying assets for the lease terms and lease liabilities represent the Company’s obligation to make lease payments arising from the leases. Operating lease ROU assets and operating lease liabilities are recognized based on the present value and future minimum lease payments over the lease term at commencement date. The Company’s future minimum lease payments used to determine the Company’s lease liabilities mainly include minimum lease rent payments. Leases with a lease term of 12 months or less at inception are not recorded on the Company’s balance sheet and are expensed on a straight-line basis over the lease term in the Company’s statement of operations. As most of the Company’s leases do not provide an implicit rate, the Company uses its estimated incremental borrowing rate based on the information available at commencement date in determining the present value of lease payments.

Stock-Based Compensation. The Company accounts for stock-based compensation in accordance with ASC 718 Compensation - Stock Compensation (“ASC 718”). ASC 718 addresses all forms of share-based payment (“SBP”) awards including shares issued under employee stock purchase plans and stock incentive shares. Under ASC 718, awards result in a cost that is measured at fair value on the awards’ grant date, based on the estimated number of awards that are expected to vest and will result in a charge to operations.

Loss per Share Basic earnings (loss) per share are computed by dividing income available to common shareholders by the weighted average number of common shares available. Diluted earnings (loss) per share is computed similar to basic earnings per share except that the denominator is increased to include the number of additional common shares that would have been outstanding if the potential common shares had been issued and if the additional common shares were dilutive.

Income Taxes Income tax expense is based on pretax financial accounting income. Deferred tax assets and liabilities are recognized for the expected tax consequences of temporary differences between the tax bases of assets and liabilities and their reported amounts. Valuation allowances are recorded to reduce deferred tax assets to the amount that will more likely than not be realized.

The Company accounts for uncertainty in income taxes using a two-step approach to recognizing and measuring uncertain tax positions. The first step is to evaluate the tax position for recognition by determining if the weight of available evidence indicates that it is more likely than not that the position will be sustained on audit, including resolution of related appeals or litigation processes, if any. The second step is to measure the tax benefit as the largest amount that is more than 50% likely of being realized upon settlement. The Company classifies the liability for unrecognized tax benefits as current to the extent that the Company anticipates payment (or receipt) of cash within one year. Interest and penalties related to uncertain tax positions are recognized in the provision for income taxes and selling, general and administrative expenses.

Note 3- Going Concern The accompanying financial statements have been prepared assuming the continuation of the Company as a going concern. The Company has not yet established an ongoing source of revenues sufficient to cover its operating costs and is dependent on debt and equity financing to fund its operations. Management of the Company is making efforts to raise additional funding until a registration statement relating to an equity funding facility is in effect. While management of the Company believes that it will be successful in its capital formation and planned operating activities, there can be no assurance that the Company will be able to raise additional equity capital or be successful in the development and commercialization of the products or services it develops or initiates collaboration agreements thereon. The accompanying financial statements do not include any adjustments to reflect the possible future effects on the recoverability and classification of assets or the amounts and classification of liabilities that may result from the possible inability of the Company to continue as a going concern.

Note 4 Management's Discussion and Analysis or Plan of Operation Management's Discussion and Analysis of Financial Condition and Results of Operations, which we refer to as MD&A, is intended to help readers understand Drone Services USA, Inc. MD&A is provided as a supplement to, and should be read in conjunction with, our financial statements and the accompanying notes.
