

503B Semaglutide

Office Use
Multi-dose Vials

Transforming Health and Wellness with Cutting-edge Pharmaceutical Solutions

Empowering Lives Through Innovative Weight Management and Lifestyle Improvement Medications

**MEDWELL
GROUP**

we are dedicated to revolutionizing healthcare and weight management. drugs, lead by our revolutionary Semaglutide product. As a leader in pharmaceutical sales, we bring the future of personal health and fitness to your doorstep.

Our Distinctive Edge

Legal In-Office Use

Our "Office Use" Semaglutide, compliant with FDA regulations, is available in multi-dose vials for multiple patient use. This ensures immediate product availability for your clients and adherence to health and safety regulations.

Quality Control

Each base material is DMF certified, ensuring accuracy and consistency. This method supports large-scale, superior production with uniform quality. This approach produces stable supplies and rapid production cycles, maintaining high standards.

No Supply Issue

Our FDA 503B outsourcing facility partners leverages automated manufacturing processes, producing larger, consistent batches for a reliable supply chain.

What's the difference?

503B Semaglutide Manufacturer vs. 503A Semaglutide Pharmacy

Cleaner. Safer. Better.

Our 503B Semaglutide In-Office Use is a superior product in every way

503B Semaglutide

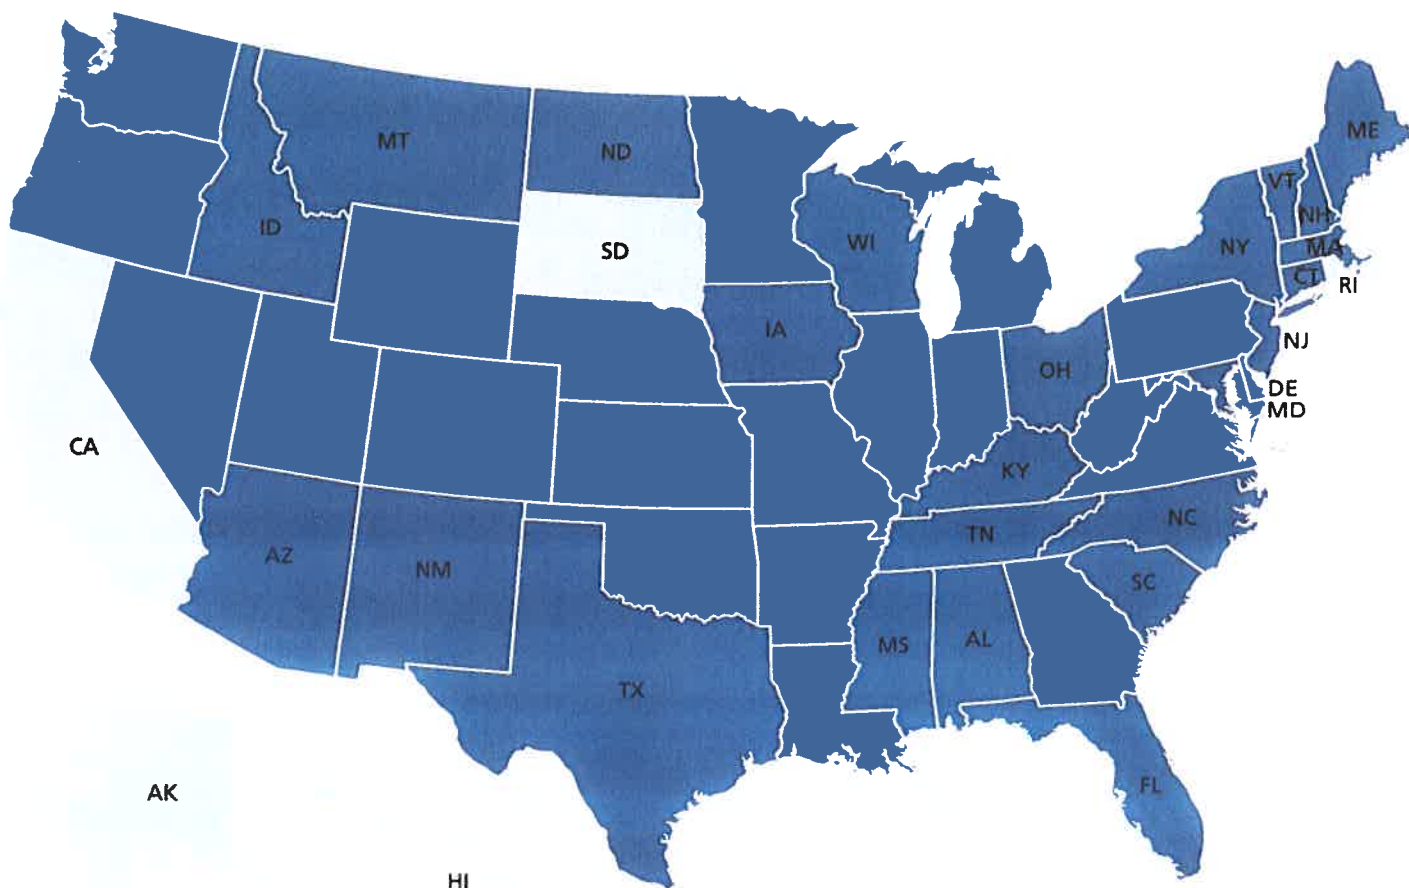

- ✓ **No Additives**
No salt base/Vitamins. 5% variance per FDA regulation
- ✓ **FDA Regulated, Unmatched Purity**
Dual inspected DMF certified raw material.
- ✓ **Flexible Dosing**
Non-patient specific - No ordering hassle or patient specific tracking
- ✓ **In-Office Use**
LEGAL in-office use from initial consult to long term patient
- ✓ **Consistent Quality**
Robotic manufacturing facility - no contamination/human error
- ✓ **Increased Supply**
Large batch sizes reducing supply issues
- ✓ **Save Money in Bulk**
Bulk discounts available

503A Pharmacy

- ✗ **Contains Additives**
Salt base additives AND/OR Vitamin additives
- ✗ **Less Regulation**
10% variance per board of pharmacy regulation (below FDA)
- ✗ **Dosing Hassle**
Patient specific ordering slows treatment and is strictly regulated by the state BOP
- ✗ **Patient Specific**
Scripted non-office use product
- ✗ **Inconsistent Quality**
Human compounding allows for human error
- ✗ **Small Orders**
Patient specific manufacturing creates small batch sizes
- ✗ **No Bulk Discounts**
Patient specific ordering eliminates volume pricing
