Xcana Petroleum Corporation
Notes to the Financial Statements
For the Period Ended June 30, 2022

Note 1 - Organization and Operations

Nature of Business and Continuance of Operations.

Xcana Petroleum Corporation. (the “Company”) , was originally incorporated in the State of Utah in 1980, as LaPlate Oil and Mining, Inc., and changed its name to Gold Coast Resources, Inc. in 1982. The Company's State of incorporation was changed in December, 1996 to the State of Nevada. In December, 1998, the Company's name was changed to Global DataTel, Inc. On July 18, 2006 the Company changed its name to Cana Petroleum Corporation, and on February 07, 2007 the Company changed its name to Xcana Petroleum Corporation.

The Company is currently seeking new business opportunities in several sectors, and has a December 31 year end.

These financial statements have been prepared on a going concern basis, which assumes the Company will continue to realize its assets and discharge its liabilities in the normal course of business. The continuation of the Company as a going concern is dependent upon the continued financial support from its shareholders, the ability of the Company to obtain necessary equity financing to continue operations, and the attainment of profitable operations. As of June 30, 2022, the Company has working capital deficit of \$231,808 and has an accumulated deficit totaling \$321,140, and has not yet generated any revenue from operations. These factors raise substantial doubt regarding the Company’s ability to continue as a going concern. These financial statements donot include any adjustments to the recoverability and classification of recorded asset amounts and classification of liabilities that mightbe necessary should the Company be unable to continue as a going concern.

The Company’s management plans to raise funds in the next 12 months through a combination of debt financing and equity financing by way of private placement.

Note 2 - Significant and Critical Accounting Policies and Practices

a) Basis of Presentation

These financial statements of the Company have been prepared in accordance with generally accepted accounting principles in the United States and are expressed in US dollars. The Company’s fiscal year end is December 31.

b) Use of Estimates

The preparation of financial statements in conformity with United States generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. The Company regularly evaluates estimates and assumptions related to stock-based compensation and deferred income tax asset valuation allowances.

The Company bases its estimates and assumptions on current facts, historical experience and various other factors that it believes to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities and the accrual of costs and expenses that are not readily apparent from other sources. The actual results experienced by the Company may differ materially and adversely from the Company’s estimates. To the extent there are material differences between the estimates and the actual results, future results of operations will be affected.

c) Reclassification

Certain prior period amounts have been reclassified to conform to current period presentation.

d) Cash and Cash Equivalents

The Company considers all highly liquid instruments with an original maturity of three months or less at the time of issuance to be cash equivalents.

e) Financial Instruments

The Company's financial instruments consist principally of cash and cash equivalents, accounts payable and accrued liabilities, short-term debts and due to related parties. Pursuant to ASC 820, *Fair Value Measurements and Disclosures* and ASC 825, *Financial Instruments* the fair value of the Company's cash equivalents is determined based on "Level 1" inputs, which consist of quoted prices in active markets for identical assets.

f) Loss Per Common Share

Basic EPS is computed by dividing net income (loss) available to common shareholders (numerator) by the weighted average number of shares outstanding (denominator) during the period. Diluted EPS gives effect to all dilutive potential common shares outstanding during the period using the treasury stock method and convertible preferred stock using the if-converted method. In computing Diluted EPS, the average stock price for the period is used in determining the number of shares assumed to be purchased from the exercise of stock options or warrants. Diluted EPS excludes all dilutive potential shares if their effect is anti-dilutive. At June 30, 2022, the Company has no potentially dilutive securities outstanding.

g) Foreign Currency Translation

The Company's planned operations will be in the United States, which results in exposure to market risks from changes in foreign currency exchange rates. The financial risk is the risk to the Company's operations that arise from fluctuations in foreign exchange rates and the degree of volatility of these rates. Currently, the Company does not use derivative instruments to reduce its exposure to foreign currency risk. The Company's functional currency for all operations worldwide is the U.S. dollar. Nonmonetary assets and liabilities are translated at historical rates and monetary assets and liabilities are translated at exchange rates in effect at the end of the year. Revenues and expenses are translated at average rates for the year. Gains and losses from translation of foreign currency financial statements into U.S. dollars are included in current results of operations.

h) Revenue Recognition

ASU No. 2014-09, Revenue from Contracts with Customers ("Topic 606"), became effective for the Company on January 1, 2018. The Company's revenue recognition disclosure reflects its updated accounting policies that are affected by this new standard. The Company applied the "modified retrospective" transition method for open contracts for the implementation of *Topic 606*. The Company made no adjustments to its previously-reported total revenues, as those periods continue to be presented in accordance with its historical accounting practices under *Topic 605, Revenue Recognition*.

The Company will recognize revenue according to *Topic 606* in a manner that reasonably reflects the delivery of its services and products to customers in return for expected consideration and includes the following elements:

- executed contracts with the Company's customers that it believes are legally enforceable;
- identification of performance obligations in the respective contract;
- determination of the transaction price for each performance obligation in the respective contract;
- allocation the transaction price to each performance obligation; and
- recognition of revenue only when the Company satisfies each performance obligation.

The Company has not made any sales as of June 30, 2022.

i) Income Taxes

The Company accounts for income taxes using the asset and liability method in accordance with ASC 740, *Income Taxes*. The asset and liability method provides that deferred tax assets and liabilities are recognized for the expected future tax consequences of temporary differences between the financial reporting and tax bases of assets and liabilities, and for operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using the currently enacted tax rates and laws that will be in effect when the differences are expected to reverse. The Company records a valuation allowance to reduce deferred tax assets to the amount that is believed more likely than not to be realized.

j) Stock-Based Compensation

We estimate the fair value of each stock option award at the grant date by using the Black-Scholes option pricing model and common shares based on the market price of the Company's common stock on the date of the share grant. The fair value determined represents the cost for the award and is recognized over the vesting period during which an employee is required to provide service in exchange for the award. As share-based compensation expense is recognized based on awards ultimately expected to vest, we reduce the expense for estimated forfeitures based on historical forfeiture rates. Previously recognized compensation costs may be adjusted to reflect the actual forfeiture rate for the entire award at the end of the vesting period. Excess tax benefits, if any, are recognized as an addition to paid-in capital.

k) Subsequent Events

The Company's management reviewed all material events from June 30, 2022, through the issuance date of these financial statements for disclosure consideration.

l) Recent Accounting Pronouncements

In August 2014, the FASB issued ASU No. 2014-15, "Disclosure of Uncertainties About an Entity's Ability to Continue as a Going Concern" ("ASU 2014-15"), which requires management to perform interim and annual assessments of an entity's ability to continue as a going concern within one year of the date the financial statements are issued and provides guidance on determining when and how to disclose going concern uncertainties in the financial statements.

Certain disclosures will be required if conditions give rise to substantial doubt about an entity's ability to continue as a going concern. ASU 2014-15 applies to all entities and is effective for annual and interim reporting periods ending after December 15, 2016, with early adoption permitted. This standard has no material effect on our financial statements

In March 2016, the FASB issued an ASU amending the accounting for stock-based compensation and requiring excess tax benefits and deficiencies to be recognized as a component of income tax expense rather than equity. This guidance also requires excess tax benefits to be presented as an operating activity on the statement of cash flows and allows an entity to make an accounting policy election to either estimate expected forfeitures or to account for them as they occur. The ASU is effective for reporting periods beginning after December 15, 2016, with early adoption permitted, this standard has no material effect on our financial statements.

In November 2016, the FASB issued ASU 2016-18, Statement of Cash Flows (Topic 230): Restricted Cash, which requires restricted cash to be presented with cash and cash equivalents on the statement of cash flows and disclosure of how the statement of cash flows reconciles to the balance sheet if restricted cash is shown separately from cash and cash equivalents on the balance sheet.

ASU 2016-18 is effective for interim and annual periods beginning after December 15, 2017, with early adoption permitted. The Company is in the process of evaluating the impact of this ASU on its CFS.

In January 2017, the FASB issued an ASU 2017-01, Business Combinations (Topic 805) Clarifying the Definition of a Business. The amendments in this update clarify the definition of a business with the objective of adding guidance to assist entities with evaluating whether transactions should be accounted for as acquisitions or disposals of assets or businesses. The definition of a business affects many areas of accounting including acquisitions, disposals, goodwill, and consolidation.

The guidance is effective for interim and annual periods beginning after December 15, 2017 and should be applied prospectively on or after the effective date. The Company is in the process of evaluating the impact of this ASU on its CFS.

In October 2017, FASB issued ASU 2017-11, Earnings Per Share (Topic 260) Distinguishing Liabilities from Equity (Topic 480) Derivatives and Hedging (Topic 815): I. Accounting for Certain Financial Instruments with Down Round Features, II. Replacement of the Indefinite Deferral for Mandatorily Redeemable Financial Instruments of Certain Nonpublic Entities and Certain Mandatorily Redeemable Noncontrolling Interests with a Scope Exception. Part I of this ASU changes the classification analysis of certain equity-linked financial instruments (or embedded features) with down round features and clarifies existing disclosure requirements. Part II does not have an accounting effect. The ASU is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2018 with early adoption permitted. Management is currently evaluating the potential impact of these changes on the CFS of the Company.

As of June 30, 2022, there are no recently issued accounting standards not yet adopted that would have a material effect on the Company's financial statements to have a material impact on the Company's CFS.

Note 3— Going Concern

The Company's financial statements have been prepared assuming that it will continue as a going concern, which contemplates continuity of operations, realization of assets, and liquidation of liabilities in the normal course of business.

As reflected in the financial statements, the Company had an accumulated deficit of \$321,140 at June 30, 2022, a net loss of \$7,642 and net cash used in operating activities of \$0 for the reporting period then ended. These factors raise substantial doubt about the Company's ability to continue as a going concern.

The Company is attempting to commence operations to be able to generate sufficient revenue through the acquisition of a suitable company; however, the Company's cash position is not sufficient to support the Company's daily operations. Management intends to raise additional funds by way of a private or public offering. While the Company believes in the viability of its strategy to commence operations and generate sufficient revenue and in its ability to raise additional funds, there can be no assurances to that effect.

The ability of the Company to continue as a going concern is dependent upon the Company's ability to further implement a business plan and generate sufficient revenue and its ability to raise additional funds by way of a public or private offering.

The financial statements do not include any adjustments related to the recoverability and classification of recorded asset amounts or the amounts and classification of liabilities that might be necessary should the Company be unable to continue as a going concern.
