

Alternative Reporting Standard: Disclosure Guidelines for the Pink[®] Market

Federal and state securities laws require issuers to provide *current information* to the public markets. With a view to facilitating compliance with these laws, OTC Markets Group has created these Disclosure Guidelines (“Guidelines”)¹ that set forth the disclosure obligations that make up the “Alternative Reporting Standard” for Pink companies. Companies on the Pink Market that do not make disclosure directly to the SEC (via EDGAR), a banking regulator, or a non-U.S. regulatory authority may provide disclosure under our “Alternative Reporting Standard.” We use information provided by companies under these Guidelines to designate the appropriate tier in the Pink Market: Current Information or Limited Information.²

Pink Current Information Tier

To qualify for the Current Information Tier:

1. **Subscribe to the OTC Disclosure & News Service:** To submit an application, visit [Gateway](#) to sign in or create a new account. Allow OTC Markets Group 2-4 weeks to process your application and provide authorized user credentials to OTCIQ.
2. **Publish Initial Disclosure:** Upload the following documents through OTCIQ:
 - *Annual Report* for the most recently completed fiscal year.
 - *All Quarterly Reports* for the Current Fiscal Year.

Annual or Quarterly Reports are composed of:

- **Disclosure Statements:** Disclosure information pursuant to these Guidelines for the applicable period. Available as a fillable form beginning on page 4 of these Guidelines.
- **Financial Statements:** Qualifying Financial Statements in accordance with the Financial Statement Requirements specified in Item 9 of these Guidelines.

Qualifying Financial Statements include:

- Audit Letter, if audited
- Balance Sheet
- Statement of Income
- Statement of Cash Flows
- Statement of Retained Earnings (Statement of Changes in Stockholders’ Equity)
- Notes to Financial Statements

3. **Publish Attorney Letter:** If financial statements are not audited by a PCAOB registered firm, companies must retain U.S. counsel to review their disclosure and provide a letter to OTC Markets Group with respect to adequate current information by providing the following:
 - **Attorney Letter Agreement:** The attorney for the company must submit a signed Attorney Letter Agreement according to the [Attorney Letter Agreement Instructions](#).

¹ These Guidelines have been designed to encompass the “current information” requirements under state and federal securities laws, such as Rules 10b-5 and 15c2-11 of the Securities Exchange Act of 1934 (“Exchange Act”) as well as Rule 144 of the Securities Act of 1933 (“Securities Act”), and state Blue Sky laws. However, these Guidelines have not been reviewed by the U.S. Securities and Exchange Commission or any state securities regulator. These Guidelines do not constitute legal advice, and OTC Markets Group makes no assurance that compliance with our disclosure requirements will satisfy any legal requirements. These Guidelines may be amended from time to time, in the sole and absolute discretion of OTC Markets Group, with or without notice.

² OTC Markets Group may require companies with securities designated as “Caveat Emptor” or other compliance flags to make additional disclosures to qualify for the Pink Current Information tier.

- **Attorney Letter:** After the attorney reviews the company's disclosure, publish the "Attorney Letter With Respect to Current Information" through OTCIQ. Attorney Letters must be in accordance with the [Attorney Letter Guidelines](#).
4. **Verify Profile:** Verify the Company Profile through OTCIQ. This includes the complete list of current officers, directors, and service providers; outstanding shares; a business description; contact information; and the names of all company insiders and beneficial owners of 10% or more of the outstanding units or shares of any class of any equity security of the issuer.
 5. **OTC Markets Group Processing of Reports:** Allow OTC Markets Group to process the posted documents (typically three to five business days) and provide any comments. Companies will only be evaluated for Current Information once all required documentation has been submitted. A new Attorney Letter is required upon amendment of any referenced report.
 6. **Ongoing Requirements:** To qualify for Current Information on an ongoing basis, companies must:
 - Publish reports through OTCIQ on the following schedule:
 - Quarterly Report within **45 days** of the quarter end
 - Annual Report within **90 days** of the fiscal year end
 - Attorney Letter within **120 days** of the fiscal year end if financial statements are unaudited.
 - Maintain a Verified Profile. At least once every six months, review and verify the Company Profile through OTCIQ.
 - Maintain Transfer Agent Verified share data. If your transfer agent participates in the [Transfer Agent Verified Shares Program](#), then your securities must have current share data verified by the transfer agent.
 - Maintain an Active standing in the Company's State of Incorporation.

Pink Limited Information Tier

Companies that do not meet the requirements of the Pink Current Information tier set forth above may still qualify for the Pink Limited Information Tier by meeting the following minimum disclosure requirements.

1. **Annual Financial Statements:** Publish one set of Qualifying Annual Financial Statements which cover the past 2 completed fiscal years, provided the most recently completed fiscal year is within the past 16 months.
2. **Verified Profile:** The Company must verify the Company Profile through OTCIQ, including, but not limited to, a complete list of officers, directors, and service providers; outstanding shares; a business description; contact information; and the name of all company insiders. "Company Insiders" shall include the beneficial owner of 10% or more of the outstanding units or shares of any class of any equity security of the issuer.

 - Review and Verify the Company's profile information through OTCIQ at least once every 12 months.
 - Maintain Transfer Agent Verified share data. If your transfer agent participates in the [Transfer Agent Verified Shares Program](#), then your securities must have current share data verified by the transfer agent.

On March 30, 2020, the Company effected a reverse split of its common shares of 1 new share for each 1,000,000 shares. The Company reduces the number of authorized shares to 5,000,000 common and 1,000,000 preferred.

On March 11, 2021, the Company designated 100,000 and issued 100,000 Series A-1 preferred shares. Each share of Series A-1 preferred is entitled to voting rights and power equal to 90% of the total voting power of the Company. The Series A-1 shares holds approval on any changes in the designation and certain parts of the articles of the Company. On April 28, 2022 the Series A-1 preferred we cancelled by a summary judgment issued in the State of Nevada. In addition 128,000 shares of commons tock were cancelled.

NOTE 2- SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

This summary of significant accounting policies is presented to assist in understanding the Company's financial statements. These accounting policies conform to accounting principles generally accepted in the United States of America and have been consistently applied in the preparation of the financial statements. It is the opinion of management that all adjustments necessary to make the financial statements not misleading have been included in these financial statements

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the balance sheet. Actual results could differ from those estimates.

Principles of Consolidation

The consolidated financial statements of the Company include the Company and its wholly-owned subsidiary ISee Sports, Inc. All material intercompany balances and transactions have been eliminated.

Cash and Cash Equivalents

GEN2 considers all highly liquid investments purchased with an original maturity of three months or less to be cash equivalents.

Foreign currency translation

The Company's functional and reporting currency is in U.S. dollars. The consolidated financial statements of the Company are translated to U.S. dollars in accordance with ASC 830-30, "*Foreign Currency Translation*". Monetary assets and liabilities denominated in foreign currencies are translated using the exchange rate prevailing at the balance sheet date. Gains and losses arising on translation or settlement of foreign currency denominated transactions or balances are included in the determination of income. The Company has not, to the date of these consolidated financial statements, entered into derivative instruments to offset the impact of foreign currency fluctuations.

Inventories

Inventories consisting of finished goods, are stated at the lower of cost of market using the first-in; first-out (FIFO) cost method of accounting.

Revenue Recognition

The Company did not receive any revenue during the three months ended July 31, 2024 and 2023.

Property, Equipment and Intangible Assets

Property and equipment are carried at cost, less accumulated depreciation. Additions are capitalized and maintenance and repairs are charged to expense as incurred. Intangible assets consist of a patent application purchased and is carried at cost, less accumulated amortization. Depreciation and amortization is provided principally on the straight-line basis method over the estimated useful lives of the assets which is estimated at 36 months. Patent applications submitted after June 8, 1995 have duration of 20 years. Due to the potential changes in technology the Company has elected to amortize the patent application over 15 years.

Impairment of long-lived assets

The Company reviews the carrying value of its long-lived assets annually or whenever events or changes in circumstances indicate that the historical-cost carrying value of an asset may no longer be appropriate. The Company assesses recoverability of the asset by comparing the undiscounted future net cash flows expected to result from the asset to its carrying value. If the carrying value exceeds the undiscounted future net cash flows of the asset, an impairment loss is measured and recognized. An impairment loss is measured as the difference between the net book value and the fair value of the long-lived asset. Fair value is estimated based upon either discounted cash flow analysis or estimated salvage value.

Basic and diluted net income per share

Basic and diluted net income per share calculations are calculated on the basis of the weighted average number of common shares outstanding during the year. They include the dilutive effect of common stock equivalents in years with net income. Basic and diluted net income per share are the same due to the net loss in the three months ended July 31, 2024 and 2023.

Income Taxes

GEN2 recognizes deferred tax assets and liabilities based on differences between the financial reporting and tax basis of assets and liabilities using the enacted tax rates and laws that are expected to be in effect when the differences are expected to be recovered. GEN2 provides a valuation allowance for deferred tax assets for which it does not consider realization of such assets to be more likely than not.

Fair Value of Financial Instruments

The Company's financial instruments consist of cash and cash equivalents, accounts payable and accrued expenses and shareholder loans. The carrying amount of these financial instruments approximates fair value due either to length of maturity or interest rates that approximate prevailing market rates unless otherwise disclosed in these financial statements.

Financial assets and liabilities recorded at fair value in our condensed consolidated balance sheets are categorized based upon a fair value hierarchy established by GAAP, which prioritizes the inputs used to measure fair value into the following levels:

Level 1— Quoted market prices in active markets for identical assets or liabilities at the measurement date.

Level 2— Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets and liabilities in markets that are not active; or other inputs that are observable and can be corroborated by observable market data.

Level 3— Inputs reflecting management's best estimates and assumptions of what market participants would use in pricing assets or liabilities at the measurement date. The inputs are unobservable in the market and significant to the valuation of the instruments.

A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement.

The Company analyzed the conversion option for derivative accounting and beneficial conversion features consideration and noted one variable convertible note qualified as a derivative and thus tainted the fixed conversion notes requiring the notes to be accounted for as derivative liabilities.

Financial assets and liabilities measured at fair value on a recurring basis are summarized below as of July 31, 2024 and April 30, 2024:

	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
As of April 30, 2024

None				
Liabilities				
Derivative liability	\$ -	\$ -	\$ 1,616,106	\$ 1,616,106

As of July 31, 2024				
None

Derivative liability	\$ --	\$ --	\$ 1,616,106	\$ 1,616,106

Beneficial Conversion Features

The intrinsic value of a beneficial conversion feature inherent to a convertible note payable, which is not bifurcated and accounted for separately from the convertible note payable and may not be settled in cash upon conversion, is treated as a discount to the convertible note payable. This discount is amortized over the period from the date of issuance to the date the note is due using the effective interest method. If the note payable is retired prior to the end of its contractual term, the unamortized discount is expensed in the period of retirement to interest expense. In general, the beneficial conversion feature is measured by comparing the effective conversion price, after considering the relative fair value of detachable instruments included in the financing transaction, if any, to the fair value of the common shares at the commitment date to be received upon conversion.

Recently Issued Accounting Pronouncements

In July 2017, the FASB issued ASU No. 2017-11, “*Earnings Per Share (Topic 260); Distinguishing Liabilities from Equity (Topic 480); Derivatives and Hedging (Topic 815): (Part I) Accounting for Certain Financial Instruments with Down Round Features, (Part II) Replacement of the Indefinite Deferral for Mandatorily Redeemable Financial Instruments of Certain Nonpublic Entities and Certain Mandatorily Redeemable Noncontrolling Interests with a Scope Exception*”. The ASU was issued to address the complexity associated with applying generally accepted accounting principles (GAAP) for certain financial instruments with characteristics of liabilities and equity. The ASU, among other things, eliminates the need to consider the effects of down round features when analyzing convertible debt, warrants and other financing instruments. As a result, a freestanding equity-linked financial instrument (or embedded conversion option) no longer would be accounted for as a derivative liability at fair value as a result of the existence of a down round feature. The amendments are effective for fiscal years beginning after December 15, 2018 and should be applied retrospectively. Early adoption is permitted, including adoption in an interim period. The Company is currently evaluating the implementation date and the impact of this amendment on its financial statements.

NOTE 3 - GOING CONCERN

As shown in the accompanying financial statements, GEN2 has an accumulated deficit of \$7,797,657 and \$7,782,393 and negative working capital of \$4,315,797 and \$4,300,533 as of July 31, 2024 and April 30, 2024, respectively. Unless profitability and increases in stockholders' equity continues, these conditions raise substantial doubt as to GEN2's ability to continue as a going concern. The July 31, 2024 and 2023 financial statements do not include any adjustments that might be necessary if GEN2 is unable to continue as a going concern. Management plans to continue to raise funds through debt and equity financing to grow the business to profitability.

The Company did not have revenue for the three months ended July 31, 2024 and 2023.

NOTE 5- RELATED PARTY TRANSACTIONS

NOTE 10 – FAIR VALUE MEASUREMENTS AND DERIVATIVE LIABILITIES

As defined in (Financial Accounting Standards Board ASC 820), fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (exit price). The Company utilized the market data of similar entities in its industry or assumptions that market participants would use in pricing the asset or liability, including assumptions about risk and the risks inherent in the inputs to the valuation technique. These inputs can be readily observable, market corroborated, or generally unobservable. The Company classifies fair value balances based on the observability of those inputs. FASB ASC 820 establishes a fair value hierarchy that prioritizes the inputs used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurement) and the lowest priority to unobservable inputs (level 3 measurement).

The three levels of the fair value hierarchy are as follows:

- Level 1 – Quoted prices are available in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions for the asset or liability occur in sufficient frequency and volume to provide pricing information on an ongoing basis. Level 1 primarily consists of financial instruments such as exchange-traded derivatives, marketable securities and listed equities.
- Level 2 - Pricing inputs are other than quoted prices in active markets included in level 1, which are either directly or indirectly observable as of the reported date and includes those financial instruments that are valued using models or other valuation methodologies. These models are primarily industry-standard models that consider various assumptions, including quoted forward prices for commodities, time value, volatility factors, and current market and contractual prices for the underlying instruments, as well as other relevant economic measures. Substantially all of these assumptions are observable in the marketplace throughout the full term of the instrument, can be derived from observable data or are supported by observable levels at which transactions are executed in the marketplace. Instruments in this category generally include non-exchange-traded derivatives such as commodity swaps, interest rate swaps, options and collars.
- Level 3 – Pricing inputs include significant inputs that are generally less observable from objective sources. These inputs may be used with internally developed methodologies that result in management’s best estimate of fair value.
