Bigger Planes Coming to Wichita Falls Regional Airport Flights

Wichita Falls, Texas- The City of Wichita Falls is proud to announce American Airlines wholly owned subsidiary, Envoy is now servicing the Wichita Falls Regional Airport with larger aircraft.

The larger aircraft is the Embraer 170. It offers more room for passengers and larger overhead storage bins for today's carry-on-sized baggage. Passengers will be checking less carry-on luggage than before with the old CRJ-700 aircraft.

The new aircraft will begin servicing Wichita Falls to Dallas customers on the afternoon flight on November 5, 2024.

For more information on the aircraft, you can find it by clicking [here](#).
