The self-regulatory organization may choose to attach as Exhibit 5 proposed changes to rule text in place of providing it in Item I and which may otherwise be more easily readable if provided separately from Form 19b-4. Exhibit 5 shall be considered part of the proposed rule change

**Partial Amendment**

Add Remove View

--

If the self-regulatory organization is amending only part of the text of a lengthy proposed rule change, it may, with the Commission's permission, file only those portions of the text of the proposed rule change in which changes are being made if the filing (i.e. partial amendment) is clearly understandable on its face. Such partial amendment shall be clearly identified and marked to show deletions and additions.

Item 1. Text of Proposed Rule Change

a) BOX Exchange LLC (the “Exchange”), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”)<sup>1</sup> and Rule 19b-4 thereunder,<sup>2</sup> proposes to amend BOX Rule 5050 (Series of Options Contracts Open for Trading) to amend the strike interval for options on SPDR® Gold Shares (“GLD”). A notice of the proposed rule change for publication in the Federal Register is attached hereto as Exhibit 1 and the text of the amended Exchange Rules is attached hereto as Exhibit 5.

b) Not applicable to application of any other Exchange rule.

c) Not applicable.

Item 2. Procedures of the Self-Regulatory Organization

The proposed rule change was approved by officers of the Exchange pursuant to authority delegated by the Exchange Board of Directors (“Board”). No further action is necessary for the filing of the proposed rule change.

Questions regarding this rule filing may be directed to Chris Zaremba, General Counsel for the Exchange, at (617) 235-2102.

Item 3. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

a) Purpose

The Exchange proposes to amend BOX Rule 5050 (Series of Options Contracts Open for Trading) to amend the strike interval for options on SPDR® Gold Shares (“GLD”).

---

<sup>1</sup> 15 U.S.C. 78s(b)(1).

<sup>2</sup> 17 CFR 240.19b-4.

Specifically, the Exchange proposes to amend IM-5050-1(b) to allow for the interval between strike prices of series of options on Exchange-Traded Fund Shares (“ETFs” or “Units”)<sup>3</sup> of SPDR® Gold Shares or “GLD” to be \$1 or greater, including where the strike price is greater than \$200.

Currently, IM-5050-1(b) provides that,

For series of options on Exchange Traded Fund Shares that satisfy the criteria set forth in Rule 5020(h), the interval of strike prices may be \$1 or greater where the strike price is \$200 or less or \$5 or greater where the strike price is over \$200. Notwithstanding any other provision regarding the interval of strike prices of series of options on Exchange-Traded Fund Shares in this rule, the interval of strike prices on SPDR® S&P 500® ETF (“SPY”), iShares S&P 500 Index ETF (“IVV”), PowerShares QQQ Trust (“QQQ”), iShares Russell 2000 Index Fund (“IWM”), and the SPDR® Dow Jones® Industrial Average ETF (“DIA”) options will be \$1 or greater.

At this time, the Exchange proposes to modify the interval setting regime to be \$1 or greater where the strike price is greater than \$200 for GLD options, similar to SPY, IVV, QQQ, IWM and DIA. The Exchange believes that the proposed rule change would make GLD options easier for investors and traders to use and more tailored to their investment needs.

GLD is an Exchange-Traded Fund Share designed to closely track the price and performance of the price of gold bullion. GLD is widely quoted as an indicator of gold stock prices and is a significant indicator of overall economic health. Investors use GLD to diversify their portfolios and benefit from market trends. Additionally, GLD is a leading product in its asset class that trades within a “complex” where, in addition to the underlying security, there are multiple instruments available for hedging such as, COMEX Gold Futures; Gold Daily Futures; iShares GOLD Trust; SPDR GOLD

---

<sup>3</sup> See BOX Rule 5020(h).

Minishares Trust; Aberdeen Physical Gold Trust; and GraniteShares Gold Shares.

Accordingly, the Exchange believes that offering a wider base of GLD options affords traders and investors important hedging and trading opportunities, particularly in the midst of current price trends. The Exchange believes that not having the proposed \$1 strike price intervals above \$200 in GLD significantly constricts investors' hedging and trading possibilities. The Exchange therefore believes that by having smaller strike intervals in GLD, investors would have more efficient hedging and trading opportunities due to the lower \$1 interval ascension. The proposed \$1 interval above the \$200 strike price, will result in having at-the-money series based upon the underlying ETF moving less than 1%. The Exchange believes that the proposed strike setting regime is in line with the slower movements of broad-based indices.

Considering the fact that \$1 intervals already exist below the \$200 price point and that GLD have consistently inclined in price toward the \$200 level, the Exchange believes that continuing to maintain the current \$200 level (above which intervals increase 500% to \$5), may have a negative effect on investing, trading and hedging opportunities, and volume. The Exchange believes that the investing, trading, and hedging opportunities available with GLD options far outweighs any potential negative impact of allowing GLD options to trade in more finely tailored intervals above the \$200 price point. The proposed strike setting regime would permit strikes to be set to more closely reflect the increasing value in the underlying and allows investors and traders to roll open positions from a lower strike to a higher strike in conjunction with the price movements of the underlying ETF. Under the current rule, where the next higher available series would be \$5 away above a \$200 strike price, the ability to roll such positions would be impaired. Accordingly, to move a position from a \$200 strike

to a \$205 strike under the current rule, an investor would need for the underlying product to move 2.5%, and would not be able to execute a roll up until such a large movement occurred. The Exchange believes that with the proposed rule change, the investor would be in a significantly safer position of being able to roll his open options position from a \$200 to a \$201 strike price, which is only a 0.5% move for the underlying. As a result, the proposed rule change will allow the Exchange to better respond to customer demand for GLD strike price more precisely aligned with the smaller, longer-term incremental increases in the underlying ETF. The Exchange believes that the proposed rule change, like the other strike price programs currently offered by the Exchange, will benefit investors by providing investors the flexibility to more closely tailor their investment and hedging decisions using GLD options.

Moreover, by allowing series of GLD options to be listed in \$1 intervals between strike prices over \$200, the proposal will moderately augment the potential total number of options series available on the Exchange. However, the Exchange believes it and the Options Price Reporting Authority (“OPRA”) have the necessary systems capacity to handle any potential additional traffic associated with this proposed rule change. The Exchange also believes that Participants will not have a capacity issue due to the proposed rule change. In addition, the Exchange represents that it does not believe that this expansion will cause fragmentation of liquidity, but rather, believes that finer strike intervals will serve to increase liquidity available as well as price efficiency by providing more trading opportunities for all market participants.

b) Statutory Basis

The Exchange believes that the proposal is consistent with the requirements of Section 6(b) of the Securities Exchange Act of 1934 (the “Act”),<sup>4</sup> in general, and Section 6(b)(5) of the Act,<sup>5</sup> in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest. In particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest.

In particular, the proposed rule change will allow investors to more easily use GLD options. Moreover, the proposed rule change would allow investors to better trade and hedge positions in GLD options where the strike price is greater than \$200, and ensure that investors in both options are not at a disadvantage simply because of the strike price. The Exchange believes the proposed rule change is consistent with Section 6(b)(1) of the Act, which provides that the Exchange be organized and have the capacity to be able to carry out the purposes of the Act and the rules and regulations thereunder, and the rules of the Exchange. The proposal allows the Exchange to respond to customer demand to allow GLD options to trade in \$1 intervals above a \$200 strike price. The Exchange does not believe that the proposed rule would create additional capacity issues or affect market functionality. As noted above, ETF options trade in wider \$5 intervals

---

<sup>4</sup> 15 U.S.C. 78f(b).

<sup>5</sup> 15 U.S.C. 78f(b)(5).

above a \$200 strike price, whereby options at or below a \$200 strike price trade in \$1 intervals. This creates a situation where contracts on the same option class effectively may not be able to execute certain strategies such as, for example, rolling to a higher strike price, simply because of the \$200 strike price above which options intervals increase by 500%. This proposal remedies the situation by establishing an exception to the current ETF interval regime for GLD options to allow such options to trade in \$1 or greater intervals at all strike prices.

The Exchange believes that the proposed rule change, like other strike price programs currently offered by the Exchange, will benefit investors by giving them increased flexibility to more closely tailor their investment and hedging decisions. By way of example, GLD is a leading product in its asset class and it trades within a “complex” where, in addition to the underlying security, there are multiple instruments available for hedging such as, COMEX Gold Futures; Gold Daily Futures; iShares GOLD Trust; SPDR GOLD Minishares Trust; Aberdeen Physical Gold Trust; and GraniteShares Gold Shares.

With regard to the impact of this proposal on system capacity, the Exchange believes it and OPRA have the necessary systems capacity to handle any potential additional traffic associated with this proposed rule change. The Exchange believes that its Participants will not have a capacity issue as a result of this proposal. Further, the Exchange believes the proposal does not unfairly discriminate among market participants, as all market participants will be treated in the same manner under this proposal.

Finally, the Exchange notes the proposed rule change is substantively the same as a rule change proposed by Nasdaq ISE, LLC (“ISE”) which the Commission recently approved.<sup>6</sup>

Item 4. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Rather, the Exchange believes that the proposed rule change will result in additional investment options and opportunities to achieve the investment and trading objectives of market participants seeking efficient trading and hedging vehicles, to the benefit of investors, market participants, and the marketplace in general. Specifically, the Exchange believes that GLD options investors and traders will significantly benefit from the availability of finer strike price intervals above a \$200 price point. In addition, the interval setting regime the Exchange proposes to apply to GLD options is currently applied to SPY, IVV, QQQ, IWM and DIA options, which are similarly popular and widely traded ETF products and track indexes at similarly high price levels. Thus, the proposed strike setting regime for GLD options will allow options on this actively traded ETF with index levels at corresponding price levels to trade pursuant to the same strike setting regime. This will permit investors to employ similar investment and hedging strategies for each of these options.

The Exchange does not believe the proposal will impose any burden on inter-market competition, as nothing prevents other options exchanges from proposing similar rules to make a finer strike price intervals above a \$200 price point available

---

<sup>6</sup> See Securities Exchange Act Release No. 100447 (June 28, 2024), 89 FR 55293 (July 3, 2024) (SR-ISE-2024-17).

for GLD options. The Exchange notes that the proposed rule change is not a novel proposal, as the Commission recently approved a substantively identical proposal of another exchange.<sup>7</sup> Further, the Exchange does not believe the proposal will impose any burden on intramarket competition, as all market participants will be treated in the same manner under this proposal.

Item 5. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

The Exchange has neither solicited nor received comments on the proposed rule change.

Item 6. Extension of Time Periods for Commission Action

Not applicable.

Item 7. Basis for Summary Effectiveness Pursuant to Section 19(b)(3) or for Accelerated Effectiveness Pursuant to Section 19(b)(2)

This proposed rule change does not significantly affect the protection of investors or the public interest, does not impose any significant burden on competition, and, by its terms, does not become operative for 30 days after the date of the filing, or such shorter time as the Commission may designate if consistent with the protection of investors and the public interest. The Exchange provided the Commission with written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, prior to the date of filing the proposed rule change as required by Rule 19b-4(f)(6).<sup>8</sup> The proposed rule change is substantially similar in all material respects to a proposal submitted by ISE that was recently approved by the Commission.<sup>9</sup> The Exchange believes that this proposed rule change, which is

---

<sup>7</sup> Id.

<sup>8</sup> 17 CFR 240.19b-4(f)(6).

<sup>9</sup> See supra note 6.

essential for competitive purposes and to promote a free and open market for the benefit of investors, does not raise any new, unique or substantive issues from those raised in the other exchange cited above filing.

The Exchange believes the proposed rule change does not significantly affect the protection of investors or the public interest. As noted above, the proposed rule change will allow investors to more easily use GLD options. Moreover, the proposed rule change would allow investors to better trade and hedge positions in GLD options where the strike price is greater than \$200, and ensure that investors in both options are not at a disadvantage simply because of the strike price. The proposal allows the Exchange to respond to customer demand to allow GLD options to trade in \$1 intervals above a \$200 strike price. The Exchange does not believe that the proposed rule would create additional capacity issues or affect market functionality. As noted above, ETF options trade in wider \$5 intervals above a \$200 strike price, whereby options at or below a \$200 strike price trade in \$1 intervals. This creates a situation where contracts on the same option class effectively may not be able to execute certain strategies such as, for example, rolling to a higher strike price, simply because of the \$200 strike price above which options intervals increase by 500%. This proposal remedies the situation by establishing an exception to the current ETF interval regime for GLD options to allow such options to trade in \$1 or greater intervals at all strike prices, to the benefit of investors.

The Exchange believes that the proposed rule change, like other strike price programs currently offered by the Exchange, will benefit investors by giving them increased flexibility to more closely tailor their investment and hedging decisions. As noted above, GLD is a leading product in its asset class and it trades within a

“complex” where, in addition to the underlying security, there are multiple instruments available for hedging such as, COMEX Gold Futures; Gold Daily Futures; iShares GOLD Trust; SPDR GOLD Minishares Trust; Aberdeen Physical Gold Trust; and GraniteShares Gold Shares. In addition, the interval setting regime the Exchange proposes to apply to GLD options is currently applied to SPY, IVV, QQQ, IWM and DIA options, which are similarly popular and widely traded ETF products and track indexes at similarly high price levels. Thus, the proposed strike setting regime for GLD options will allow options on this an actively traded ETF with index levels at corresponding price levels to trade pursuant to the same strike setting regime. This will permit investors to employ similar investment and hedging strategies for each of these options.

With regard to the impact of this proposal on system capacity, the Exchange believes it and OPRA have the necessary systems capacity to handle any potential additional traffic associated with this proposed rule change. The Exchange believes that its Participants will not have a capacity issue as a result of this proposal.

Further, the Exchange believes the proposal does not impose any significant burden on competition, as all market participants will be treated in the same manner under this proposal. As noted above, the proposed rule change is substantively the same as a rule change proposed by ISE, which the Commission recently approved.<sup>10</sup>

For the foregoing reasons, this rule filing qualifies as a “non-controversial” rule change under Rule 19b-4(f)(6), which renders the proposed rule change effective upon filing with the Commission. At any time within 60 days of the filing of this proposed

---

<sup>10</sup> Id.

rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

The Exchange requests that the Commission waive the 30 day operative delay period. Waiver of the operative delay is consistent with the protection of investors and the public interest because it will ensure fair competition among the exchanges by allowing the Exchange to implement the proposal at the same time as its competitor exchanges, thus creating competition among GLD options throughout the industry.

For the foregoing reasons, this rule filing qualifies for immediate effectiveness as a “non-controversial” rule change under paragraph (f)(6) of Rule 19b-4 of the Act.

Item 8. Proposed Change Based Upon Rules of Another Self-Regulatory Organization or of the Commission

As discussed above, the Exchange believes that the proposed rule change is substantially similar in all material respects to a proposal submitted by ISE that was recently approved by the Commission.<sup>11</sup>

Item 9. Security-Based Swap Submissions Filed Pursuant to Section 3C of the Act

Not applicable.

Item 10. Advance Notices Filed Pursuant to Section 806(e) of the Payment, Clearing and Settlement Supervision Act

Not applicable.

Item 11. Exhibits

5. Text of the Proposed Rule Change.

**EXHIBIT 1**

SECURITIES AND EXCHANGE COMMISSION  
(Release No. 34- ; File No. SR-BOX-2024-18)

Self-Regulatory Organizations; BOX Exchange LLC; Notice of Filing of Proposed Rule Change to amend the strike interval for options on SPDR® Gold Shares.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”),<sup>1</sup> and Rule 19b-4 thereunder,<sup>2</sup> notice is hereby given that on [DATE], BOX Exchange LLC (the “Exchange”) filed with the Securities and Exchange Commission (“Commission”) the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend BOX Rule 5050 (Series of Options Contracts Open for Trading) to amend the strike interval for options on SPDR® Gold Shares (“GLD”). The text of the proposed rule change is available from the principal office of the Exchange, at the Commission’s Public Reference Room and also on the Exchange’s Internet website at <https://rules.boxexchange.com/rulefilings>.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has

---

<sup>1</sup> 15 U.S.C. 78s(b)(1).

<sup>2</sup> 17 CFR 240.19b-4.

prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend BOX Rule 5050 (Series of Options Contracts Open for Trading) to amend the strike interval for options on SPDR® Gold Shares (“GLD”).

Specifically, the Exchange proposes to amend IM-5050-1(b) to allow for the interval between strike prices of series of options on Exchange-Traded Fund Shares (“ETFs” or “Units”)<sup>3</sup> of SPDR® Gold Shares or “GLD” to be \$1 or greater, including where the strike price is greater than \$200.

Currently, IM-5050-1(b) provides that,

For series of options on Exchange Traded Fund Shares that satisfy the criteria set forth in Rule 5020(h), the interval of strike prices may be \$1 or greater where the strike price is \$200 or less or \$5 or greater where the strike price is over \$200. Notwithstanding any other provision regarding the interval of strike prices of series of options on Exchange-Traded Fund Shares in this rule, the interval of strike prices on SPDR® S&P 500® ETF (“SPY”), iShares S&P 500 Index ETF (“IVV”), PowerShares QQQ Trust (“QQQ”), iShares Russell 2000 Index Fund (“IWM”), and the SPDR® Dow Jones® Industrial Average ETF (“DIA”) options will be \$1 or greater.

At this time, the Exchange proposes to modify the interval setting regime to be \$1 or greater where the strike price is greater than \$200 for GLD options, similar to SPY, IVV, QQQ, IWM and DIA. The Exchange believes that the proposed rule change would make GLD options easier for investors and traders to use and more tailored to their investment needs.

---

<sup>3</sup> See BOX Rule 5020(h).

GLD is an Exchange-Traded Fund Share designed to closely track the price and performance of the price of gold bullion. GLD is widely quoted as an indicator of gold stock prices and is a significant indicator of overall economic health. Investors use GLD to diversify their portfolios and benefit from market trends. Additionally, GLD is a leading product in its asset class that trades within a “complex” where, in addition to the underlying security, there are multiple instruments available for hedging such as, COMEX Gold Futures; Gold Daily Futures; iShares GOLD Trust; SPDR GOLD Minishares Trust; Aberdeen Physical Gold Trust; and GraniteShares Gold Shares. Accordingly, the Exchange believes that offering a wider base of GLD options affords traders and investors important hedging and trading opportunities, particularly in the midst of current price trends. The Exchange believes that not having the proposed \$1 strike price intervals above \$200 in GLD significantly constricts investors’ hedging and trading possibilities. The Exchange therefore believes that by having smaller strike intervals in GLD, investors would have more efficient hedging and trading opportunities due to the lower \$1 interval ascension. The proposed \$1 interval above the \$200 strike price, will result in having at-the-money series based upon the underlying ETF moving less than 1%. The Exchange believes that the proposed strike setting regime is in line with the slower movements of broad-based indices. Considering the fact that \$1 intervals already exist below the \$200 price point and that GLD have consistently inclined in price toward the \$200 level, the Exchange believes that continuing to maintain the current \$200 level (above which intervals increase 500% to \$5), may have a negative effect on investing, trading and hedging opportunities, and volume. The Exchange believes that the investing, trading, and hedging opportunities available with GLD options far outweighs any potential negative

impact of allowing GLD options to trade in more finely tailored intervals above the \$200 price point. The proposed strike setting regime would permit strikes to be set to more closely reflect the increasing value in the underlying and allows investors and traders to roll open positions from a lower strike to a higher strike in conjunction with the price movements of the underlying ETF. Under the current rule, where the next higher available series would be \$5 away above a \$200 strike price, the ability to roll such positions would be impaired. Accordingly, to move a position from a \$200 strike to a \$205 strike under the current rule, an investor would need for the underlying product to move 2.5%, and would not be able to execute a roll up until such a large movement occurred. The Exchange believes that with the proposed rule change, the investor would be in a significantly safer position of being able to roll his open options position from a \$200 to a \$201 strike price, which is only a 0.5% move for the underlying. As a result, the proposed rule change will allow the Exchange to better respond to customer demand for GLD strike price more precisely aligned with the smaller, longer-term incremental increases in the underlying ETF. The Exchange believes that the proposed rule change, like the other strike price programs currently offered by the Exchange, will benefit investors by providing investors the flexibility to more closely tailor their investment and hedging decisions using GLD options. Moreover, by allowing series of GLD options to be listed in \$1 intervals between strike prices over \$200, the proposal will moderately augment the potential total number of options series available on the Exchange. However, the Exchange believes it and the Options Price Reporting Authority (“OPRA”) have the necessary systems capacity to handle any potential additional traffic associated with this proposed rule change. The Exchange also believes that Participants will not have a capacity issue due to the

proposed rule change. In addition, the Exchange represents that it does not believe that this expansion will cause fragmentation of liquidity, but rather, believes that finer strike intervals will serve to increase liquidity available as well as price efficiency by providing more trading opportunities for all market participants.

## 2. Statutory Basis

The Exchange believes that the proposal is consistent with the requirements of Section 6(b) of the Securities Exchange Act of 1934 (the “Act”),<sup>4</sup> in general, and Section 6(b)(5) of the Act,<sup>5</sup> in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest. In particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest.

In particular, the proposed rule change will allow investors to more easily use GLD options. Moreover, the proposed rule change would allow investors to better trade and hedge positions in GLD options where the strike price is greater than \$200, and ensure that investors in both options are not at a disadvantage simply because of the strike price. The Exchange believes the proposed rule change is consistent with Section 6(b)(1) of the Act, which provides that the Exchange be organized and have the capacity to be able to carry out the purposes of the Act and the rules and regulations thereunder,

---

<sup>4</sup> 15 U.S.C. 78f(b).

<sup>5</sup> 15 U.S.C. 78f(b)(5).

and the rules of the Exchange. The proposal allows the Exchange to respond to customer demand to allow GLD options to trade in \$1 intervals above a \$200 strike price. The Exchange does not believe that the proposed rule would create additional capacity issues or affect market functionality. As noted above, ETF options trade in wider \$5 intervals above a \$200 strike price, whereby options at or below a \$200 strike price trade in \$1 intervals. This creates a situation where contracts on the same option class effectively may not be able to execute certain strategies such as, for example, rolling to a higher strike price, simply because of the \$200 strike price above which options intervals increase by 500%. This proposal remedies the situation by establishing an exception to the current ETF interval regime for GLD options to allow such options to trade in \$1 or greater intervals at all strike prices.

The Exchange believes that the proposed rule change, like other strike price programs currently offered by the Exchange, will benefit investors by giving them increased flexibility to more closely tailor their investment and hedging decisions. By way of example, GLD is a leading product in its asset class and it trades within a “complex” where, in addition to the underlying security, there are multiple instruments available for hedging such as, COMEX Gold Futures; Gold Daily Futures; iShares GOLD Trust; SPDR GOLD Minishares Trust; Aberdeen Physical Gold Trust; and GraniteShares Gold Shares.

With regard to the impact of this proposal on system capacity, the Exchange believes it and OPRA have the necessary systems capacity to handle any potential additional traffic associated with this proposed rule change. The Exchange believes that its Participants will not have a capacity issue as a result of this proposal. Further, the Exchange believes the proposal does not unfairly discriminate among market

participants, as all market participants will be treated in the same manner under this proposal.

Finally, the Exchange notes the proposed rule change is substantively the same as a rule change proposed by Nasdaq ISE, LLC (“ISE”) which the Commission recently approved.<sup>6</sup>

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Rather, the Exchange believes that the proposed rule change will result in additional investment options and opportunities to achieve the investment and trading objectives of market participants seeking efficient trading and hedging vehicles, to the benefit of investors, market participants, and the marketplace in general. Specifically, the Exchange believes that GLD options investors and traders will significantly benefit from the availability of finer strike price intervals above a \$200 price point. In addition, the interval setting regime the Exchange proposes to apply to GLD options is currently applied to SPY, IVV, QQQ, IWM and DIA options, which are similarly popular and widely traded ETF products and track indexes at similarly high price levels. Thus, the proposed strike setting regime for GLD options will allow options on this actively traded ETF with index levels at corresponding price levels to trade pursuant to the same strike setting regime. This will permit investors to employ similar investment and hedging strategies for each of these options.

The Exchange does not believe the proposal will impose any burden on inter-market competition, as nothing prevents other options exchanges from proposing

<sup>6</sup> See Securities Exchange Act Release No. 100447 (June 28, 2024), 89 FR 55293 (July 3, 2024) (SR-ISE-2024-17).

similar rules to make a finer strike price intervals above a \$200 price point available for GLD options. The Exchange notes that the proposed rule change is not a novel proposal, as the Commission recently approved a substantively identical proposal of another exchange.<sup>7</sup> Further, the Exchange does not believe the proposal will impose any burden on intramarket competition, as all market participants will be treated in the same manner under this proposal.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

The Exchange has neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Pursuant to Section 19(b)(3)(A) of the Act<sup>8</sup> and Rule 19b-4(f)(6)<sup>9</sup> thereunder, the Exchange has designated this proposal as one that effects a change that: (i) does not significantly affect the protection of investors or the public interest; (ii) does not impose any significant burden on competition; and (iii) by its terms, does not become operative for 30 days after the date of the filing, or such shorter time as the Commission may designate if consistent with the protection of investors and the public interest.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the

Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

#### IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

##### Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an e-mail to [rule-comments@sec.gov](mailto:rule-comments@sec.gov). Please include File Number SR-BOX-2024-18 on the subject line.

##### Paper Comments

- Send paper comments in triplicate to Elizabeth M. Murphy, Secretary, Securities and Exchange Commission, 100 F Street, NE, Washington, DC 20549-1090.

All submissions should refer to File Number SR-BOX-2024-18. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method.

The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, on business

days between the hours of 10 a.m. and 3 p.m., located at 100 F Street, NE, Washington, DC 20549. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly.

All submissions should refer to File Number SR-BOX-2024-18 and should be submitted on or before [date 21 days from publication in the Federal Register].

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.<sup>10</sup>

Kevin M. O'Neill  
Deputy Secretary
