CONCORDIS GROUP, INC.
and Subsidiary
Notes to the Condensed Consolidated Financial Statements
March 31, 2023
(unaudited)

NOTE 1 – NATURE OF OPERATIONS

Company Background

Concordis Group, Inc. (the “Company,” “we,” “us,” “our,” or “Concordis”), was incorporated in the State of Maryland on October 31, 2008 as Kingsbury Financial Group, Inc. On January 14, 2009, the Company changed its name to Concordis Group Inc.

On or about February 15, 2015, the Company successfully closed a Share Exchange transaction (the “Share Exchange”) with the shareholders of GC Blackstone, Inc. (“Blackstone”), a Delaware corporation. Blackstone was incorporated on March 18, 2014 under the laws of the state of Delaware and has been operating as a wholly owned subsidiary of Concordis since the Share Exchange. Blackstone operates in the Dallas, Texas area building commercial properties.

Nature of Operations

The operations of Blackstone focus on design, architectural and engineering services. The core of the business is land development and construction of buildings related to hospitality, healthcare, retail, schools and office buildings.

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of presentation

The Company follows the accrual basis of accounting in accordance with generally accepted accounting principles in the United States of America and has a year-end of December 31.

Management further acknowledges that it is solely responsible for adopting sound accounting practices, establishing and maintaining a system of internal accounting control and preventing and detecting fraud. The Company’s system of internal accounting control is designed to assure, among other items, that 1) recorded transactions are valid; 2) valid transactions are recorded; and 3) transactions are recorded in the proper period in a timely manner to produce financial statements which present fairly the financial condition, results of operations and cash flows of the Company for the respective periods being presented.

The unaudited condensed consolidated financial statements of the Company for the year ended December 31, 2022 have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and pursuant to the requirements for reporting on Form 10-K and Regulation S-X. Accordingly, they do not include all the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements.

Going Concern and Liquidity

At March 31, 2023, the Company had \$160,806 in cash. Net income for the year ended December 31, 2022 was \$925,831 and working capital surplus was \$512,078 at December 31, 2022. As a result, there is no substantial doubt about our ability to continue as a going concern. The accompany financial statements have been prepared assuming that the Company is a going concern.

Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its wholly owned subsidiary, Blackstone. All significant intercompany balances and transactions have been eliminated in the consolidation. The consolidated financial statements included herein, presented in accordance with United States generally accepted accounting principles (“GAAP”) and stated in United States dollars, have been prepared by the Company, pursuant to the rules and regulations of the Securities and Exchange Commission.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosure of contingent liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Cash and Cash Equivalents

The Company considers all highly liquid investments with original maturities of three months or less to be cash equivalents.

Allowance for Doubtful Accounts

The Company establishes an allowance for doubtful accounts to ensure trade and notes receivable are not overstated due to non-collectability. The Company's allowance is based on a variety of factors, including age of the receivable, significant one-time events, historical experience, and other risk considerations. The Company had no allowance at March 31, 2023 or December 31, 2022.

Inventory

Inventory is valued at the lower of cost or net realizable value. Cost is determined using a weighted-average cost method. The Company decreases the value of inventory for estimated obsolescence equal to the difference between the cost of inventory and the estimated market value, based upon an aging analysis of the inventory on hand, specifically known inventory-related risks, and assumptions about future demand and market conditions. The Company has inventory of \$185,301 and \$0 as of March 31, 2023 and December 31, 2022, respectively.

Property, Plant and Equipment

Fixed assets are recorded at cost. Expenditures for major additions and betterments are capitalized. Maintenance and repairs are charged to operations as incurred. Depreciation is computed by the straight-line method over the asset's estimated useful life. Upon the sale or retirement of property and equipment, the related cost and accumulated depreciation are removed from the accounts and any gain or loss is reflected in consolidated statements of operations.

Impairment of Long-Lived Assets

The Company's long-lived assets and other assets (consisting of property and equipment) are reviewed for impairment in accordance with the guidance of the FASB ASC Topic 360-10, Property, Plant, and Equipment. Long lived assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to the undiscounted future net cash flows expected to be generated by that asset. If the carrying amount of an asset exceeds its estimated future undiscounted cash flows, an impairment charge is recognized by the amount by which the carrying amount of the asset exceeds the fair value of the asset.

Revenue Recognition

The Company's sales are generated primarily from contracts with customers for design, architectural and engineering services. Under fixed-price contracts, the Company agrees to perform the specified work for a pre-determined price. To the extent the Company's actual costs vary from the estimates upon which the price was negotiated, the Company will generate more or less profit or could incur a loss.

The Company accounts for a contract after it has been approved by all parties to the arrangement, the rights of the parties are identified, payment terms are identified, the contract has commercial substance and collectability of consideration is probable.

The Company evaluates the products or services promised in each contract at inception to determine whether the contract should be accounted for as having one or more performance obligations. The products and services in the Company's contracts are typically not distinct from one another due to their complex relationships, customization, and the significant contract management functions required to perform under the contract. Accordingly, contracts are typically accounted for as one performance obligation.

The Company determines the transaction price for each contract based on the consideration we expect to receive for the products or services being provided under the contract.

The Company recognizes revenue as performance obligations are satisfied and the customer obtains control of the products and services. In determining when performance obligations are satisfied, factors such as contract terms, payment terms and whether there is an alternative future use of the product or service are considered. Substantially all of the Company's revenue is recognized over time as services are performed under the contract because if the customer were to terminate the contract for reasons other than the Company's non-performance, the Company would have the right to recover damages which would include, among other potential damages, the right to payment for work performed to date plus a reasonable profit to deliver products or services that do not have an alternative use to the Company.

For performance obligations recognized over time, revenue is recognized based on the extent of progress towards completion of the performance obligation, generally using the percentage-of-completion cost-to-cost measure of progress for our contracts because it best depicts the transfer of control to the customer as the Company incurs costs on its contracts. Under the percentage-of-completion cost-to-cost measure of progress, the extent of progress towards completion is measured based on the ratio of costs incurred to date to the total estimated costs to complete the performance obligation.

Cost of Sales

Cost of sales includes the actual direct costs of inventory and labor used in the construction process.

Stock-Based Compensation

The Company accounts for stock-based instruments issued to employees in accordance with ASC Topic 718. ASC Topic 718 requires companies to recognize in the statement of operations the grant-date fair value of stock options and other equity-based compensation issued to employees. The value of the portion of an award that is ultimately expected to vest is recognized as an expense over the requisite service periods using the straight-line attribution method. The Company estimates the fair value of stock options at the grant date by using the Black-Scholes option-pricing model.

Fair Value of Financial Instruments

The book values of cash, prepaid expenses, and accounts payable approximate their respective fair values due to the short-term nature of these instruments. The fair value hierarchy under GAAP distinguishes between assumptions based on market data (observable inputs) and an entity's own assumptions (unobservable inputs).

The hierarchy consists of three levels

- Level one — Quoted market prices in active markets for identical assets or liabilities;
- Level two — Inputs other than level one inputs that are either directly or indirectly observable; and
- Level three — Unobservable inputs developed using estimates and assumptions, which are developed by the reporting entity and reflect those assumptions that a market participant would use.

Determining which category an asset or liability falls within the hierarchy requires significant judgment. The Company evaluates its hierarchy disclosures each quarter.

Earnings (Loss) Per Share

Basic earnings (loss) per share is computed by dividing the net income by the weighted-average number of shares of common stock and common stock equivalents (primarily outstanding options and warrants). Common stock equivalents represent the dilutive effect of the assumed exercise of the outstanding stock options and warrants, using the treasury stock method. The calculation of fully diluted earnings per share assumes the dilutive effect of the exercise of outstanding options and warrants at either the beginning of the respective period presented or the date of issuance, whichever is later.

Income Taxes

The Company accounts for income taxes in accordance with FASB ASC 740, "Income Taxes." Deferred tax assets and liabilities are recognized for the future tax consequences attributable to temporary differences between the financial statements carrying amounts of existing assets and liabilities and loss carry forwards and their respective tax bases.

Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income (loss) in the years in which those temporary differences are expected to be recovered or settled.

The effect of a change in tax rules on deferred tax assets and liabilities is recognized in operations in the year of change. A valuation allowance is recorded when it is "more likely-than-not" that a deferred tax asset will not be realized.

Contingencies

Certain conditions may exist as of the date the financial statements are issued, which may result in a loss to the Company, but which will only be resolved when one or more future events occur or fail to occur. The Company's management and its legal counsel assess such contingent liabilities, and such assessment inherently involves an exercise of judgment. In assessing loss contingencies related to legal proceedings that are pending against the Company or unassisted claims that may result in such proceedings, the Company's legal counsel evaluates the perceived merits of any legal proceedings or unassisted claims as well as the perceived merits of the amount of relief sought or expected to be sought therein.

If the assessment of a contingency indicates that it is probable that a material loss has been incurred and the amount of the liability can be estimated, then the estimated liability would be accrued in the Company's financial statements. If the assessment indicates that a potentially material loss contingency is not probable, but is reasonably possible, or is probable but cannot be estimated, then the nature of the contingent liability, together with an estimate of the range of possible loss if determinable and material, would be disclosed.

Loss contingencies considered remote are generally not disclosed unless they involve guarantees, in which case the nature of the guarantee would be disclosed.

Recent Accounting Pronouncements

In August 2020, the FASB issued ASU 2020-06, *Debt with Conversion and Other Options*, which simplifies accounting for convertible instruments. The new guidance eliminates two of the three models in ASC 470-20 that require separating embedded conversion features from convertible instruments. The guidance also addresses how convertible instruments are accounted for in the diluted earnings per share calculation. The guidance is effective for fiscal years beginning after December 15, 2021. The Company is currently evaluating the impact of ASU 2020-06 on its consolidated financial statements.

Recently Issued Accounting Standards: Management does not believe that any recently issued, but not yet effective, accounting standards if currently adopted would have a material effect on the accompanying financial statements.
