Estimated 3G/4G device shipments - update

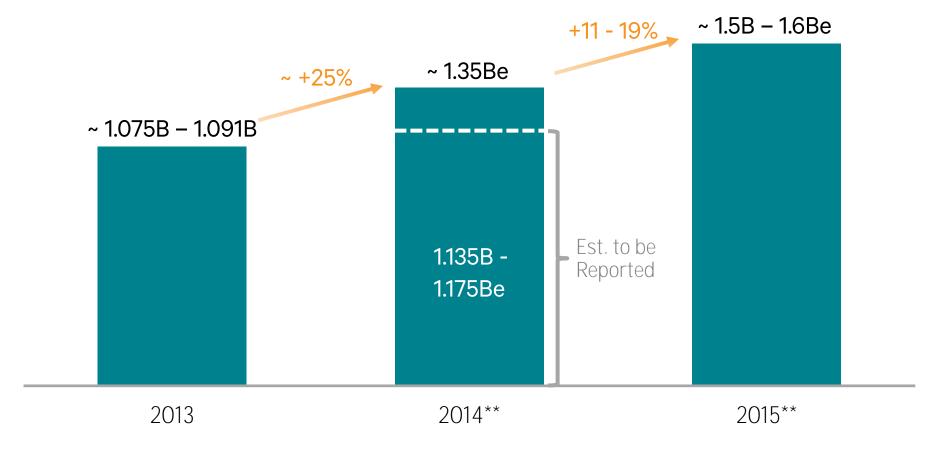

China continues to present significant opportunities for us, particularly with the rollout of 3G/4G LTE multimode, but also presents significant challenges, as our business practices continue to be the subject of an investigation by the China National Development and Reform Commission (NDRC). Please refer to our Quarterly Report on Form 10-Q for the first quarter ended December 28, 2014 filed with the SEC for our most recent disclosures regarding the NDRC investigation.

Our current outlook for our licensing business, QTL, reflects the following:

- We resolved the previously disclosed dispute with a licensee in China in the first quarter of fiscal 2015. However, we continue to believe that certain licensees in China are not fully complying with their contractual obligations to report their sales of licensed products to us (which includes certain licensees underreporting a portion of their 3G/4G device sales) and that unlicensed companies may seek to delay execution of new licenses while the NDRC investigation is ongoing. We are taking steps to address these issues, although the outcome and timing of any resolutions are uncertain.
- We expect global 3G/4G device shipments to be approximately 1.35 billion for calendar year 2014. However, due to the issues described above, we do not believe that all of the global 3G/4G device shipments for calendar year 2014 will be reported to us within the time periods required by our license agreements. Accordingly, we currently estimate approximately 1.135 billion to 1.175 billion calendar year 2014 3G/4G device shipments will actually be reported to us through the first calendar quarter of 2015.
- We expect global 3G/4G device shipments to be approximately 1.5 billion to 1.6 billion for calendar year 2015. At this time, we are not providing a forecast for calendar year 2015 reported 3G/4G device shipments.
- We are providing guidance for estimated second fiscal quarter and fiscal 2015 3G/4G total reported device sales. That guidance includes an estimate of some prior period activity (i.e., devices shipped in prior periods) that may be reported to us.

Global 3G/4G device shipment* estimates⁽¹⁾

Calendar year, as of January 28, 2015

^{*} Device shipments are Qualcomm estimates and include handsets, data devices, telematics, security devices and some quantity of channel inventory.

^{**} We expect global 3G/4G device shipments to be approximately 1.35 billion for calendar year 2014. However, we do not believe that all of the global 3G/4G device shipments for calendar year 2014 3G/4G device shipments will actually be reported to us through the first calendar year 2015. We expect global 3G/4G device shipments to be approximately 1.5 billion to 1.6 billion to 1.
