

GILEAD SCIENCES ANNOUNCES SECOND QUARTER 2024 FINANCIAL RESULTS

Product Sales Excluding Veklury Increased 6% Year-Over-Year to \$6.7 billion

Biktarvy Sales Increased 8% Year-Over-Year to \$3.2 billion

Oncology Sales Increased 15% Year-Over-Year to \$841 million

Foster City, CA, August 8, 2024 - Gilead Sciences, Inc. (Nasdaq: GILD) announced today its second quarter 2024 results of operations.

"Gilead has had another strong quarter with 6% year-over-year growth in our base business. This was driven by sales of our therapies for HIV, Oncology and Liver Disease, including 8% growth for Biktarvy," said Daniel O'Day, Gilead's Chairman and Chief Executive Officer. "One of the key highlights of the quarter was interim data from the Phase 3 PURPOSE 1 trial showing 100% efficacy for lenacapavir in HIV prevention for cisgender women. We look forward to additional clinical readouts in the coming months, and to potentially launching seladelpar for primary biliary cholangitis in the United States."

Second Quarter 2024 Financial Results

- Total second quarter 2024 revenue increased 5% to \$7.0 billion, compared to the same period in 2023, primarily due to higher product sales in HIV, Liver Disease and Oncology.
- Diluted earnings per share ("EPS") was \$1.29 in the second quarter 2024, compared to \$0.83 in the same period in 2023. The increase was primarily driven by lower operating expenses, including a 2023 expense of \$525 million for settlements with certain plaintiffs in HIV antitrust litigation which did not repeat in 2024, as well as higher revenues and lower income tax expense, partially offset by higher net unrealized losses on equity securities.
- Non-GAAP diluted EPS was \$2.01 in the second quarter 2024, compared to \$1.34 in the same period in 2023. The increase was primarily driven by lower operating expenses and higher revenues.
- As of June 30, 2024, Gilead had \$2.8 billion of cash, cash equivalents and marketable debt securities, compared to \$8.4 billion as of December 31, 2023. The decrease primarily reflects the \$3.9 billion acquisition of CymaBay Therapeutics, Inc. and a \$1.75 billion repayment of senior notes.
- During the second quarter 2024, Gilead generated \$1.3 billion in operating cash flow, net of a \$1.2 billion transition tax payment associated with the Tax Cuts and Jobs Act of 2017.
- During the second quarter 2024, Gilead paid dividends of \$972 million and repurchased \$100 million of common stock.

Second Quarter 2024 Product Sales

Total second quarter 2024 product sales increased 5% to \$6.9 billion, compared to the same period in 2023. Total product sales, excluding Veklury, increased 6% to \$6.7 billion in the second quarter 2024, compared to the same period in 2023, primarily due to higher product sales in HIV, Liver Disease and Oncology.

HIV product sales increased 3% to \$4.7 billion in the second quarter 2024, compared to the same period in 2023, primarily driven by higher demand across treatment and prevention, partially offset by lower average realized price due to channel mix.

- **Biktarvy**® (bictegravir 50mg/emtricitabine 200mg ("FTC")/tenofovir alafenamide 25mg ("TAF")) sales increased 8% to \$3.2 billion in the second quarter 2024, compared to the same period in 2023, primarily driven by higher demand.
- **Descovy**® (FTC 200mg/TAF 25mg) sales decreased 6% to \$485 million in the second quarter 2024, compared to the same period in 2023, primarily driven by lower average realized price due to channel mix, partially offset by higher demand.

The **Liver Disease** portfolio sales increased 17% to \$832 million in the second quarter 2024, compared to the same period in 2023. This was primarily driven by higher average realized price due to channel mix in the United States, as well as higher demand in products for chronic hepatitis C virus ("HCV"), chronic hepatitis B virus ("HBV") and, in Europe, chronic hepatitis D virus ("HDV").

Veklury sales decreased 16% to \$214 million in the second quarter 2024, compared to the same period in 2023, primarily driven by lower rates of COVID-19 related hospitalizations.

Cell Therapy product sales increased 11% to \$521 million in the second quarter 2024, compared to the same period in 2023.

- Yescarta® (axicabtagene ciloleucel) sales increased 9% to \$414 million in the second quarter 2024, compared to the same period in 2023, primarily driven by higher demand in relapsed or refractory ("R/R") large B-cell lymphoma ("LBCL") outside the United States.
- Tecartus® (brexucabtagene autoleucel) sales increased 21% to \$107 million in the second quarter 2024, compared to the same period in 2023, driven by higher demand in R/R mantle cell lymphoma and R/R adult acute lymphoblastic leukemia ("ALL").

Trodelvy® (sacituzumab govitecan-hziy) sales increased 23% to \$320 million in the second quarter 2024, compared to the same period in 2023, primarily driven by higher demand in second-line metastatic triple negative breast cancer and pre-treated HR+/HER2- metastatic breast cancer.

Second Quarter 2024 Product Gross Margin, Operating Expenses and Effective Tax Rate

- Product gross margin was 77.7% in the second quarter 2024, compared to 78.0% in the same period in 2023. Non-GAAP product gross margin was 86.0% in the second quarter 2024, compared to 86.9% in the same period in 2023.
- Research & development ("R&D") expenses were \$1.4 billion in the second quarter 2024 and in the same period in 2023. Non-GAAP R&D expenses were \$1.3 billion in the second quarter 2024, compared to \$1.4 billion in the same period in 2023. The changes were primarily driven by timing of clinical activities, including wind-down of studies.
- Acquired IPR&D expenses were \$38 million in the second quarter 2024.
- Selling, general and administrative ("SG&A") expenses and non-GAAP SG&A expenses were \$1.4 billion in the second quarter 2024, compared to \$1.8 billion in the same period in 2023. The decreases in GAAP and non-GAAP SG&A expenses were primarily driven by the 2023 legal settlement expense referenced earlier which did not repeat in 2024.
- The effective tax rate ("ETR") was 21.4% in the second quarter 2024, compared to 34.6% in the same period in 2023. The decrease in ETR primarily reflects a remeasurement of certain deferred tax liabilities in the prior year and a settlement with a tax authority in the second quarter 2024. Non-GAAP ETR was 17.8% in the second quarter 2024, compared to 21.0% in the same period in 2023. The decrease in non-GAAP ETR primarily reflects a settlement with a tax authority.

Guidance and Outlook

For the full-year 2024, Gilead expects:

	Αι	August 8, 2024 Guidance			
(in millions, except per share amounts)	Low End			ligh End	Comparison to April 25, 2024 Guidance
Product sales	\$	27,100	\$	27,500	Unchanged
Product sales, excluding Veklury	\$	25,800	\$	26,200	Unchanged
Veklury	\$	1,300	\$	1,300	Unchanged
Diluted EPS	\$	0.00	\$	0.30	Previously \$0.10 to \$0.50
Non-GAAP diluted EPS	\$	3.60	\$	3.90	Previously \$3.45 to \$3.85

Additional information and a reconciliation between GAAP and non-GAAP financial information for the 2024 guidance is provided in the accompanying tables. The financial guidance is subject to a number of risks and uncertainties. See the Forward-Looking Statements section below.

Key Updates Since Our Last Quarterly Release

Virology

- Presented data from the Phase 3 PURPOSE 1 trial evaluating twice-yearly subcutaneous lenacapavir
 for HIV prevention in cisgender women at the International AIDS Conference ("AIDS 2024"). At the
 interim analysis, lenacapavir demonstrated 100% efficacy with zero HIV infections and superiority to
 both background HIV incidence and once-daily oral Truvada® (FTC 200mg and tenofovir disoproxil
 fumarate 300mg ("TDF")). Lenacapavir was generally well-tolerated and no new safety concerns were
 identified. The use of lenacapavir for PrEP is investigational.
- Highlighted long-term, five-year data for Biktarvy at AIDS 2024, demonstrating virologic suppression in Hispanic/Latine people with HIV, as well as older adults with comorbidities. Additionally, presented results from Gilead's investigational treatment pipeline, including 48-week data from the Phase 2 portion of the Phase 2/3 ARTISTRY study of once-daily oral bictegravir plus lenacapavir, once-weekly oral agents GS-1720 and GS-4182, as well as twice-yearly lenacapavir in combination with two broadly neutralizing antibodies, teropavimab and zinlirvimab.
- Announced U.S. Food and Drug Administration ("FDA") approval of an updated label for Biktarvy to include additional data for the treatment of pregnant adults with HIV-1 with suppressed viral loads.
- Presented Phase 2b MYR201 data demonstrating potential for the investigational combination of bulevirtide 10 mg with pegylated interferon alfa-2a as finite therapy for people with chronic HDV at the European Association for the Study of the Liver ("EASL") meeting. These data were simultaneously published in the New England Journal of Medicine.
- Presented 144-week follow-up data from the Phase 3 MYR301 study at EASL that reinforced bulevirtide as an efficacious and generally well-tolerated long-term treatment option as monotherapy in adults with chronic HDV. Bulevirtide 2 mg remains the only approved treatment for HDV in the EU and is not approved in the U.S. Bulevirtide 10 mg is an investigational product and is not approved anywhere globally.

Oncology

• Announced Trodelvy did not meet the primary endpoint of improvement in overall survival ("OS") in the intention-to-treat ("ITT") population of the confirmatory Phase 3 TROPiCS-04 study in locally advanced or metastatic urothelial cancer. A numerical improvement in OS favoring Trodelvy was observed, in addition to trends in improvement for select pre-specified non-alpha controlled subgroups analyses and secondary endpoints of progression-free survival and overall response rate. In the ITT population, there was a higher number of deaths due to adverse events with Trodelvy compared to single-agent chemotherapy, which were primarily observed early in treatment and related to neutropenic complications, including infection.

Presented detailed results from the Phase 3 EVOKE-01 study evaluating Trodelvy in patients with
metastatic or advanced non-small cell lung cancer ("NSCLC") that had progressed on or after platinumbased chemotherapy and anti-PD(L)1 therapy at the American Society of Clinical Oncology ("ASCO")
meeting. These data were simultaneously published in the *Journal of Clinical Oncology*. As announced
in January 2024, EVOKE-01 did not meet its primary endpoint of overall survival. The use of Trodelvy
for lung cancer is investigational.

- Provided a longer-term update on Cohort A of the Phase 2 EVOKE-02 study of Trodelvy in combination with pembrolizumab in first-line advanced or metastatic squamous or non-squamous PD-L1-high NSCLC at the ASCO meeting.
- Announced new data from a pilot study in collaboration with Dana-Farber Cancer Institute that evaluated the safety of Yescarta in patients living with R/R primary or secondary central nervous system lymphoma, an investigational use. This data was presented at the ASCO meeting.
- Presented updated, four-year OS data from the pivotal Phase 2 ZUMA-3 study evaluating Tecartus in adult patients with R/R B-cell ALL at the ASCO meeting.
- Presented updated analysis at the ASCO meeting from Arm A1 of the Phase 2 EDGE-Gastric study
 evaluating domvanalimab, zimberelimab ("zim") and FOLFOX as a potential first-line treatment for
 upper gastrointestinal cancers, in partnership with Arcus Biosciences, Inc. ("Arcus"). Additionally,
 presented Phase 1b/2 ARC-9 Cohort B data with our partner Arcus, which is evaluating etrumadenant
 plus zim, FOLFOX and bevacizumab in third-line metastatic colorectal cancer. These products and uses
 are investigational.
- Announced preliminary findings at the European Hematology Association ("EHA") meeting from the
 Phase 2 ZUMA-24 study suggesting outpatient administration of Yescarta is feasible. Additionally,
 presented real-world manufacturing experience analysis demonstrating a statistically significant higher
 number of R/R large B-cell lymphoma patients that received second-line treatment with Yescarta
 achieved first-pass manufacturing success compared to patients that received treatment with Yescarta
 in third-line and beyond.
- Announced key operational updates, together with Arcellx, Inc. ("Arcellx"), for the anitocabtagene
 autoleucel multiple myeloma development program, including the design of the Phase 3 iMMagine-3
 trial as a second- to fourth-line treatment for multiple myeloma, as well as the completion of the
 technical transfer to Kite.

Inflammation

- Presented two-year interim results from the ongoing long-term Phase 3 ASSURE study evaluating
 seladelpar in people living with primary biliary cholangitis ("PBC") who participated in any prior
 seladelpar clinical study at the Digestive Diseases Week and EASL meetings. The data demonstrated a
 sustained and consistent long-term efficacy and safety profile for seladelpar in PBC. Seladelpar is an
 investigational product and is currently under review by FDA, with a PDUFA date of August 14, 2024.
- Entered into an amended license agreement featuring the buy-out of global seladelpar royalties from Janssen Pharmaceutica NV for \$320 million. This transaction will be reflected in Gilead's third quarter results.

Corporate

- Announced Gilead reached a settlement agreement in principle in the federal TDF litigation in the U.S.
 District Court for the Northern District of California. The agreement, which is subject to certain
 conditions, provides that Gilead will make a one-time payment of up to \$40 million and is expected to
 resolve the claims of the overwhelming majority of plaintiffs in the federal TDF litigation.
- Announced Chief Medical Officer Merdad Parsey, MD, PhD, will leave the company in the first quarter of 2025. A search is underway for his successor.
- The Board declared a quarterly dividend of \$0.77 per share of common stock for the third quarter of 2024. The dividend is payable on September 27, 2024, to stock holders of record at the close of business on September 13, 2024. Future dividends will be subject to Board approval.

Certain amounts and percentages in this press release may not sum or recalculate due to rounding.

Conference Call

At 1:30 p.m. Pacific Time today, Gilead will host a conference call to discuss Gilead's results. A live webcast will be available on http://investors.gilead.com and will be archived on www.gilead.com for one year.

Non-GAAP Financial Information

The information presented in this document has been prepared in accordance with U.S. generally accepted accounting principles ("GAAP"), unless otherwise noted as non-GAAP. Management believes non-GAAP information is useful for investors, when considered in conjunction with Gilead's GAAP financial information, because management uses such information internally for its operating, budgeting and financial planning purposes. Non-GAAP information is not prepared under a comprehensive set of accounting rules and should only be used to supplement an understanding of Gilead's operating results as reported under GAAP. Non-GAAP financial information generally excludes acquisition-related expenses including amortization of acquired intangible assets and other items that are considered unusual or not representative of underlying trends of Gilead's business, fair value adjustments of equity securities and discrete and related tax charges or benefits associated with changes in tax related laws and guidelines. Although Gilead consistently excludes the amortization of acquired intangible assets from the non-GAAP financial information, management believes that it is important for investors to understand that such intangible assets were recorded as part of acquisitions and contribute to ongoing revenue generation. Non-GAAP measures may be defined and calculated differently by other companies in the same industry. Reconciliations of the non-GAAP financial measures to the most directly comparable GAAP financial measures are provided in the accompanying tables.

About Gilead Sciences

Gilead Sciences, Inc. is a biopharmaceutical company that has pursued and achieved breakthroughs in medicine for more than three decades, with the goal of creating a healthier world for all people. The company is committed to advancing innovative medicines to prevent and treat life-threatening diseases, including HIV, viral hepatitis, COVID-19 and cancer. Gilead operates in more than 35 countries worldwide, with headquarters in Foster City, California.

Forward-Looking Statements

Statements included in this press release that are not historical in nature are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Gilead cautions readers that forward-looking statements are subject to certain risks and uncertainties that could cause actual results to differ materially. These risks and uncertainties include those relating to: Gilead's ability to achieve its anticipated full year 2024 financial results, including as a result of the uncertainty of the amount and timing of Veklury revenues; Gilead's ability to make progress on any of its long-term ambitions or priorities laid out in its corporate strategy; Gilead's ability to accelerate or sustain revenues for its virology, oncology and other programs; Gilead's ability to realize the potential benefits of acquisitions, collaborations or licensing arrangements, including the arrangements with Arcellx and Arcus; patent protection and estimated loss of exclusivity for our products and product candidates; Gilead's ability to initiate, progress or complete clinical trials within currently anticipated timeframes or at all, the possibility of unfavorable results from ongoing and additional clinical trials, including those involving Biktarvy, Trodelvy, Truvada, Yescarta, bevacizumab, bictegravir, bulevirtide, anitocabtagene autoleucel, domvanalimab, etrumadenant, GS-1720, GS-4182, lenacapavir, teropavimab, seladelpar, zimberelimab, and zinlirvimab (such as the ARTISTRY-1, ASSURE, EDGE-Gastric, EVOKE-01, EVOKE-02, iMMagine-3, MYR201, MYR301, PURPOSE-1, TROPiCS-04, ZUMA-3 and ZUMA-24 studies), and the risk that safety and efficacy data from clinical trials may not warrant further development of Gilead's product candidates or the product candidates of Gilead's strategic partners; Gilead's ability to submit new drug applications for new product candidates or expanded indications in the currently anticipated timelines; Gilead's ability to receive or maintain regulatory approvals in a timely manner or at all, including FDA approval of the New Drug Application for seladelpar, and the risk that any such approvals, if granted, may be subject to significant limitations on use and may be subject to withdrawal or other adverse

actions by the applicable regulatory authority (such as the risk that the FDA may not grant full approval or may withdraw its accelerated approval for Trodelvy for the treatment of locally advanced or metastatic urothelial cancer); Gilead's ability to successfully commercialize its products; the risk of potential disruptions to the manufacturing and supply chain of Gilead's products; pricing and reimbursement pressures from government agencies and other third parties, including required rebates and other discounts; a larger than anticipated shift in payer mix to more highly discounted payer segments; market share and price erosion caused by the introduction of generic versions of Gilead products; the risk that physicians and patients may not see advantages of Gilead's products over other therapies and may therefore be reluctant to prescribe the products, including Biktarvy; and other risks identified from time to time in Gilead's reports filed with the SEC, including annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K. In addition, Gilead makes estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses and related disclosures. Gilead bases its estimates on historical experience and on various other market specific and other relevant assumptions that it believes to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. There may be other factors of which Gilead is not currently aware that may affect matters discussed in the forward-looking statements and may also cause actual results to differ significantly from these estimates. Further, results for the quarter ended June 30, 2024 are not necessarily indicative of operating results for any future periods. Gilead directs readers to its press releases, annual reports on Form 10-K, quarterly reports on Form 10-Q and other subsequent disclosure documents filed with the SEC. Gilead claims the protection of the Safe Harbor contained in the Private Securities Litigation Reform Act of 1995 for forward-looking statements.

The reader is cautioned that forward-looking statements are not guarantees of future performance and is cautioned not to place undue reliance on these forward-looking statements. All forward-looking statements are based on information currently available to Gilead and Gilead assumes no obligation to update or supplement any such forward-looking statements other than as required by law. Any forward-looking statements speak only as of the date hereof or as of the dates indicated in the statements.

⁽¹⁾ Relates to amortization of acquired intangibles.

⁽²⁾ Adjustments include integration expenses, contingent consideration fair value adjustments and other expenses associated with Gilead's acquisitions of MYR GmbH, MiroBio, Ltd., Tmunity Therapeutics, Inc., XinThera, Inc. and CymaBay Therapeutics, Inc.

⁽³⁾ Represents discrete and related deferred tax charges or benefits primarily associated with acquired intangible assets and transfers of intangible assets from a foreign subsidiary to Ireland and the United States.

GILEAD SCIENCES, INC. RECONCILIATION OF GAAP TO NON-GAAP 2024 FULL-YEAR GUIDANCE⁽¹⁾ (unaudited)

(in millions, except percentages and per share amounts)	Provided February 6, 2024	Updated April 25, 2024	Updated August 8, 2024
Projected product gross margin GAAP to non-GAAP reconciliation:			
GAAP projected product gross margin	76.0% - 77.0%	76.0% - 77.0%	76.0% - 77.0%
Acquisition-related expenses and restructuring expenses	~ 9.0%	~ 9.0%	~ 9.0%
Non-GAAP projected product gross margin	85.0% - 86.0%	85.0% - 86.0%	85.0% - 86.0%
Projected operating income GAAP to non-GAAP reconciliation:			
GAAP projected operating income	\$8,700 - \$9,200	\$1,900 - \$2,400	\$2,100 - \$2,500
IPR&D impairment, acquisition-related and restructuring expenses	~ 2,500	~ 5,100	~ 5,100
Non-GAAP projected operating income	\$11,200 - \$11,700	\$7,000 - \$7,500	\$7,200 - \$7,600
Projected effective tax rate GAAP to non-GAAP reconciliation:			
GAAP projected effective tax rate	~ 21%	~ 65%	~ 87%
Income tax effect of above non-GAAP adjustments and fair value adjustments of equity securities, and discrete and related tax adjustments	(~ 2% <u>)</u>	(~ 35%)	(~ 57%)
Non-GAAP projected effective tax rate	~ 19%	~ 30%	~ 30%
Projected diluted EPS GAAP to non-GAAP reconciliation:			
GAAP projected diluted EPS	\$5.15 - \$5.55	\$0.10 - \$0.50	\$0.00 - \$0.30
IPR&D impairment, acquisition-related and restructuring expenses, fair value adjustments of equity securities and discrete and related tax adjustments	~ 1.70	~ 3.35	~ 3.60
Non-GAAP projected diluted EPS	\$6.85 - \$7.25	\$3.45 - \$3.85	\$3.60 - \$3.90

Our full-year guidance excludes the potential impact of any (i) acquisitions or business development transactions that have not been executed, (ii) future fair value adjustments of equity securities and (iii) discrete tax charges or benefits associated with changes in tax related laws and guidelines that have not been enacted, as Gilead is unable to project such amounts. The non-GAAP full-year guidance includes non-GAAP adjustments to actual current period results as well as adjustments for the known future impact associated with events that have already occurred, such as future amortization of our intangible assets and the future impact of discrete and related deferred tax charges or benefits primarily associated with acquired intangible assets and transfers of intangible assets from a foreign subsidiary to Ireland and the United States.
