HOCHTIEF wins multi-million pound contract from Staffordshire University

Consortium to design, build, finance and operate a new student village

HOCHTIEF has been awarded the contract to design, build, finance and operate a student village for Staffordshire University in the UK. Scheduled for completion in 2026 the landmark project will see around 700 new student rooms built in cluster blocks and town houses alongside a village 'hub' facility to be used as a social space for students.

HOCHTIEF has formed a consortium with Staffordshire University and Plenary to deliver the project. The consortium, Staffordshire Campus Living, has appointed Willmott Dixon to construct the new Student Village and Pinnacle Facilities Management will support the operation of the new accommodation. Legal advice was provided by Osborne Clarke and financial advice by Evolution Infrastructure.

The project will also involve the refurbishment of a further 300 rooms in the University's existing Clarice Cliff court to bring all en-suite accommodation up to the same high standard.

HOCHTIEF has developed a low energy and low carbon solution for the village, ensuring sustainability and carbon reduction remain at the heart of the design, build and operation.

Ian Prescott, Managing Director of HOCHTIEF PPP Solutions UK and Ireland, said: "We are delighted to have been selected for this prestigious project and look forward to working with the University and consortium partners to realise the vision for the new student village."

Professor Martin Jones, Vice-Chancellor and Chief Executive of the University, said: "Providing an excellent student experience is a strategic priority and the

Student Village is designed to respond to what students say they want. With the full backing of our Board of Governors, we are delighted to move closer towards making a start on this project which, alongside our academic course offering and exceptional support services, will help to make us stand out in the market. The new student accommodation will be linked to existing study, sports and leisure facilities on our main Leek Road site via a new pedestrian footbridge. Together with other exciting developments on the University's doorstep like the Goods Yard and Station Road transformation improvements, we anticipate that the Student Village will be a great place for our students to live.”

HOCHTIEF is an engineering-led global infrastructure solutions provider with leading positions in North America, Australia and Europe and a rapidly expanding presence in high-tech, energy transition and sustainable infrastructure markets. With around 41,500 employees and a sales volume of EUR 27.8 billion in 2023, HOCHTIEF is the leading construction management and green building company in the US (through Turner), the largest contractor in the Australia infrastructure services market (CIMIC), a key player in U.S. transportation infrastructure (Flatiron) and a renowned civil engineering and building construction company in Europe. The Group's PPP and infrastructure development activity is complemented by its 20% stake in the leading international toll road concessions operator Abertis. HOCHTIEF's strong competitive position is underpinned by the Group's engineering know-how, innovative digital systems and supply chain & logistics solutions. Thanks to its long-standing commitment to sustainability, HOCHTIEF, where green projects account for almost 50% of Group sales, has been listed in the Dow Jones Sustainability Indices since 2006 and is committed to delivering on its ESG agenda including a net-zero target for 2045.
