# Report by the manager

#### **General information**

#### Legal aspects

Rolinco N.V. (the 'fund') is an investment company with variable capital established in the Netherlands. The fund is an Undertaking for Collective Investment in Transferable Securities (UCITS), as referred to in Section 1:1 of the Dutch Financial Supervision Act (hereinafter: 'Wft') and the EU Directive for Undertakings for Collective Investment in Transferable Securities (2014/91/EU, UCITS V). UCITS have to comply with certain restrictions to their investment policy in order to protect investors.

Robeco Institutional Asset Management B.V. ('RIAM') manages the fund. In this capacity, RIAM handles the asset management, risk management, administration, marketing and distribution of the fund. RIAM holds an AIFMD license as referred to in Section 2:65 Wft, as well as a license to manage UCITS as referred to in Section 2:69b Wft. RIAM is moreover authorized to manage individual assets and give advice with respect to financial instruments. RIAM is subject to supervision by the Dutch Authority for the Financial Markets (the 'AFM').

The assets of the fund are held in custody by J.P. Morgan Bank Luxembourg S.A., Amsterdam Branch. J.P. Morgan Bank Luxembourg S.A., Amsterdam Branch is appointed as the depositary of the fund as referred to in Section 4:62n Wft. The depositary is responsible for supervising the fund insofar as required under and in accordance with the applicable legislation. The manager, the fund and J.P. Morgan Bank Luxembourg S.A., Amsterdam Branch have concluded a depositary and custodian agreement.

The fund is subject to statutory supervision by the AFM. The fund is entered in the register as stated in Section 1:107 Wft.

In 2020, the AFM has determined that Robeco must undertake a number of remedial measures to improve the processes in relation to the Money Laundering and Terrorist Financing (Prevention) Act ('Wwft') and the Sanctions Act ('Sw') in Robeco Retail, Robeco's on-line execution-only platform for Dutch retail customers. The improvements have commenced in 2020 and are scheduled to be completed by the end of 2021. Subsequent to the above, and as a separate matter, the AFM has indicated that it has concerns about the way in which Robeco has set up its business operations. Robeco has engaged with the AFM to substantiate Robeco's views in this respect.

#### Robeco

When 'Robeco' is mentioned it means RIAM as well as the activities of other companies that fall within the scope of Robeco's management.

#### **Market Impact Covid-19**

Robeco considers the ongoing Covid-19 pandemic as a significant event which may impact the investment funds under management. The impact of the pandemic on people, companies and the economy at large has been significant. While the link between Covid-19 cases and hospitalisation has significantly weakened thanks to vaccinations, the outlook remains uncertain. Pending herd immunity as a result of a substantial vaccination rate, the global economy will, however, still be impacted by opening and closing of (business) operations. Furthermore, a slowdown in the trajectory towards herd immunity as a result of risks relating to vaccine logistics, vaccine side effects, reduced effectiveness, or public resistance to (mandatory) vaccination, may have a negative impact on markets.

#### Our operational measures for business continuity

In response to the ongoing Covid-19 crisis, Robeco is constantly monitoring the latest developments and has taken all measures necessary to manage the situation and to ensure business continuity, while ensuring the health and safety of our clients, our employees and our suppliers. Our operational measures and capabilities are such that Robeco remains fully functional in managing client portfolios and serving clients. Our systems and platforms are designed to enable our staff, most of whom have worked from home throughout the crisis based on their local health and safety measures, to operate as normal. Our approach is one of vigilance and flexibility, allowing us to implement new or revised measures smoothly and as necessary.

#### **Sustainable Finance Disclosure Regulation**

In March 2018, the European Commission announced the adoption of the European Union's Sustainable Finance Action Plan (the 'Plan'), set out in response to the landmark signing of the Paris Agreement, and the United Nations 2030 Agenda for Sustainable Development. The Plan aims to bring in harmonized rules on sustainability related disclosures and policies, and to make it easier for end investors to ultimately assess the underlying sustainability criteria of an individual investment vehicle. The successful implementation of the EU Sustainable Finance Plan is of strategic importance for Robeco. A project management team of over 30 staff representing all key departments in Robeco are leading the efforts in this process. In 2020, Robeco has been preparing for the implementation of Level 1 of the Regulation on sustainability-related disclosures in the financial services sector (SFDR), that sets out which sustainability related disclosures must be made for an investment product. These disclosures have been made in the prospectus and other key investor documents, on the website and in future annual reports, starting as of the end of 31 December 2021. This means that the 2021 annual report will reflect conformity to the new requirements for sustainability reporting.

#### **General information (continued)**

#### Share classes

The ordinary shares have been divided into three series. Each series is designated as a share class. At balance sheet date, the first two series were open. The series include the following share classes:

Share class A: Rolinco

Share class B: Rolinco - EUR G.

The management fee for the Rolinco - EUR G share class (without distribution fee) is lower than for the Rolinco share class.

#### Attribution to share classes

The administration of the fund is such that attribution of the results to the different share classes takes place on a daily basis and pro rata. Issues and repurchases of own shares are registered per share class. The differences between the various share classes are explained in notes 8, 9 and 12 to the financial statements.

#### Conversion of bearer shares

In the past, the fund issued shares in the form of bearer shares (also known as 'K-certificates'). In connection with the coming into effect of the Dutch Conversion of Bearer Shares Act (Wet omzetting aandelen aan toonder, the 'Act'), the holders of bearer shares had until 31 December 2020 to convert these into registered shares. All bearer shares which have not been converted in time were, on the basis of the Act, acquired by the fund for no consideration per 1 January 2021. From 1 January 2021 through 31 December 2025, holders of K-certificates in the fund may exchange their K-certificate for a replacement registered share. To this end, shareholders should submit their bearer shares through their own bank to the fund agent (ING Bank).

#### Tax features

On the basis of Section 28 of the Dutch Corporate Income Tax Act, the fund has the status of a fiscal investment company. This means that 0% corporate-income tax is due, providing that, after deducting 15% in Dutch dividend tax, the fund makes its profit available for distribution to shareholders in the form of dividend within eight months of the close of the financial year and satisfies any other relevant regulations.

#### Liquidity of ordinary shares

The fund is an open-end investment company, meaning that, barring exceptional circumstances, it issues and repurchases ordinary shares on a daily basis at prices approximating net asset value, augmented or reduced by a limited surcharge or discount. The only purpose of this surcharge or discount is to cover the costs incurred by the fund for the entry and exit of investors. The actual surcharge or discount is published on www.robeco.com/riam. The surcharges and discounts are recognized in the profit and loss account, in order to protect the interest of the incumbent shareholders.

Both the Rolinco and the Rolinco EUR G share classes are admitted for trade on Euronext Amsterdam, in the segment Euronext NAV Trading Service<sup>1</sup>. In addition, the Rolinco Share Class is admitted for trade in Berlin, Düsseldorf, Frankfurt, Hamburg, Luxembourg, Munich, Vienna and Zurich.

The cumulative preference shares are listed on Euronext Amsterdam, Euronext Fund Service segment.

#### Key investor information and prospectus

A prospectus and a key investor information document with information on the product and its associated costs and risks are available for Rolinco N.V. Both documents are available free of charge at the fund's offices and at www.robeco.com.

### Information for investors in the respective countries

The information below applies only to investors in the respective countries.

#### Representative and paying agent in Switzerland

ACOLIN Fund Services AG, Leutschenbachstrasse 50, CH-8050 Zürich, is appointed as the fund's representative in Switzerland. Copies of the Key Investor Information, the Prospectus, Articles of Association, annual and semi-annual reports, and a list of all purchases and sales in the fund's securities portfolio during the reporting period are available at the above address, free of charge.

UBS Switzerland AG, Bahnhofstrasse 45, CH-8001 Zurich, is the fund's paying agent in Switzerland. Postal address: Badenerstrasse 574, Postfach, CH-8098 Zürich.

<sup>&</sup>lt;sup>1</sup> Depending on the distributor, investments can be made in Rolinco or Rolinco - EUR G.

#### **General information (continued)**

#### Information for investors in the respective countries (continued)

Representative and paying agent in Germany

State Street Bank GmbH - Frankfurt Branch (Agent Fund Trading), Solmsstrasse 83, D-60486 Frankfurt am Main is the fund's appointed paying agent in Germany. The information address for Germany is Robeco Deutschland, Taunusanlage 17, D-60325 Frankfurt am Main. The Prospectus, the Articles of Association and the annual/semi-annual reports may be obtained free of charge from the information address. The prices at which shares are bought and sold are published on www.robeco.de.

#### Financial services in Belgium

CACEIS Belgium N.V., Havenstraat 86C Bus 320, 1000 Brussels, is appointed as financial service provider in Belgium. The most recent periodic reports, the Prospectus and the Key Investor Information and other information about the fund are available from them in Dutch and English.

#### **Translations**

This report is also published in Dutch. Only the original version published in Dutch is legally valid.

#### Key figures per share class

Overview 2017-2021						
Rolinco	20215	2020	2019	2018	2017	Average
Performance in % based on:						
- Market price <sup>1,2</sup>	12.9	20.6	36.8	-7.4	20.4	18.3
- Net asset value <sup>1,2</sup>	12.9	20.6	36.5	-6.3	20.0	18.1
- MSCI All Country World Index	15.9	6.7	28.9	-4.8	8.9	13.1
Dividend in EUR <sup>3</sup>	_	0.80	1.00	0.80	0.60	
Total net assets <sup>4</sup>	363	342	309	260	307	
Rolinco - EUR G	20215	2020	2019	2018	2017	Average
Performance in % based on:						
- Market price <sup>1,2</sup>	13.2	21.2	37.4	-7.0	21.0	18.9
- Net asset value <sup>1,2</sup>	13.2	21.2	37.1	-5.9	20.6	18.7
- MSCI All Country World Index	15.9	6.7	28.9	-4.8	8.9	13.1
Dividend in EUR <sup>3</sup>	_	0.80	1.00	0.80	0.60	
Total net assets <sup>4</sup>	643	564	480	341	368	

<sup>&</sup>lt;sup>1</sup> The differences between the performance based on market price and the performance based on net asset value is caused by the fact that the market price is the NAV of the previous trading day corrected for the surcharge or discount as described under Liquidity of ordinary shares.

#### **General introduction**

#### Financial market environment

The first half of the year 2021 saw a firming global economic recovery from the Covid-19 pandemic induced recession. Key to this recovery has been the swift availability of effective vaccines, allowing for an easing of the policy trilemma between kickstarting the economy, solving the health crisis and preserving personal freedom. At the end of June around 25% of the global population had at least one dose of a Covid-19 vaccine. However, there is a strong dispersion in vaccination rates across the globe which also creates divergent economic recovery paths. In the developed economies vaccination rates are between 50%-60% at the time of writing whereas in emerging economies vaccination rates have lagged developed economies in the first half year. The recovery in the manufacturing sector began in 2020, reflected by the leading ISM manufacturing producer confidence indicators in the US reaching the highest level since December 1983. Given prevailing lockdown restrictions during the second and third wave of Covid-19 cases, services activity lagged manufacturing activity in developed economies but made a strong comeback from April onwards as lockdown intensities eased and social mobility increased.

<sup>&</sup>lt;sup>2</sup> Any dividend payments that are distributed in any year are assumed to have been reinvested in the fund.

<sup>&</sup>lt;sup>3</sup> The dividend relates to the reporting year mentioned and is distributed in the following financial year.

<sup>&</sup>lt;sup>4</sup> In millions of euros

<sup>&</sup>lt;sup>5</sup> Concerns the period from 1 January 2021 through 30 June 2021.

#### **General introduction (continued)**

#### **Financial market environment (continued)**

With the IMF forecasting an expansion of the global economy by 6.0% in 2021 and 4.4% in 2022, the global economy is expected to remain firmly in expansion mode. However, output in the manufacturing and services sectors continues to be challenged by persisting supply shortages, though logistical bottlenecks and shipping fees have been moderating in the second quarter of 2021. In reflection of base rate effects and rising input costs, US headline consumer price index in May rose to the highest level observed since May 1991.

The powerful policy response to this crisis has clearly spurred the recovery in consumer demand. The interaction between central banks acting as fiscal financiers is creating positive multiplier effects, as a low interest rate environment alleviates the need to raise taxes while enabling fiscal expansion without endangering debt sustainability. However, further down the road, if inflation does show to be more persistent than currently expected by central banks, the alignment of interests between central banks and governments could be challenged.

#### Outlook for the equity markets

The first half of 2021 has seen strong equity market performance with the MSCI World unhedged in euro returning 16.6%. US equity markets made new all-time highs. Key financial market theme in the first half year has been the reflation trade (markets expecting accelerating economic growth with rising inflation) which typically coincides with a steepening yield curve and value stocks outperforming growth stocks. However, typical reflation trades started to struggle since the second half of May with the market starting to look beyond the peak in global excess liquidity, peak growth momentum and base rate effect driven inflation.

Looking ahead to the second half of 2021, we envisage higher equity volatility in a peak reflation trade environment with more limited upside for global equities. Risk-adjusted returns will be lower with a more balanced sectoral and style performance within the equity universe. Even in an environment of decelerating economic momentum, equities are able to continue to enjoy positive momentum on the back of global excess liquidity and above trend level earnings growth. The global earnings cycle is expected to improve further in the second half of the year though bottlenecks in supply chains may limit production levels and sales performance. In addition, while equities remain attractive compared to bonds from a relative valuation point of view, valuation levels are stretched from an absolute historical perspective, especially in the US. The cyclically adjusted price-to-earnings ratio - the US Shiller CAPE, admittedly a mediocre bellwether for next six months returns but one of the best leading valuation indicators for stock performance in the medium term, has only been higher during the heydays of the IT boom of 1999/2000. Stock market sentiment is very bullish as evidenced by a steep rise in retail margin accounts, meme stocks trading frenzy and upbeat retail investor surveys. Moreover, so-called zombie companies that are unable to generate sufficient cash to cover interest expenses, manage to raise capital.

We do not rule out a second leg to the reflation trade. Rising wage growth on the back of persisting labor shortages and rising housing rents could reinvigorate upward inflation pressures as the economic cycle transitions towards self-sustaining expansion. Risks remain however in the remainder of 2021 for equity markets, given event risk around central bank communications while the global economic recovery remains uneven. In addition, we expect rising political hurdles for further fiscal stimulus and elevated political tensions between the US and China.

#### **Investment policy**

#### Introduction

Rolinco N.V.'s investment philosophy focuses on stocks that benefit from four secular growth trends: 'Digital World', 'Emerging Middle Class', 'Connected Enterprise' and 'Healthy Aging'. While the selection of these trends did not change during the period, some of the weights did.

#### **Investment objective**

The fund aims to achieve a substantially higher return than the MSCI All Country World Index (Net Return) over the longer term through a well-diversified worldwide equity portfolio consisting largely of so-called 'Growth stocks'.

#### Implementation of the investment policy

Last year we moved to a less defensive positioning as fiscal and monetary authorities globally have been doing their utmost to counter the pandemic-related acute economic slowdown. This positioning has been maintained in the first half of 2021. Nor have we adapted the portfolio to the momentum-unwind that started late last year: as these reversals can be forceful and unpredictable, we deem it near-impossible to flawlessly time these moves. On balance, therefore, we have only made limited changes to the portfolio of Rolinco N.V.

The weight of 'Connected Enterprise' rose slightly from 35% to 37% driven by its strong performance. We sold Akamai and Qualys within the cybersecurity space and replaced it by Fortinet, which we consider to be better positioned. Highly-valued Dassault Systemes was also sold, while new positions were bought in two companies that enable the digital transition of enterprise, i.e. Salesforce.com and Intuit. Finally, we added Infineon, which is a leading manufacturer of power semiconductors for industrial and electric-vehicle applications.

#### **Investment policy (continued)**

#### Implementation of the investment policy (continued)

The weight of 'Emerging Middleclass' fell slightly from 18% to 17% on the back of its lagging performance. We exchanged the position in Colgate for two names that were hit by the selling of growth stocks earlier in the period. Delivery Hero provides online food-delivery services mainly in emerging markets and we think it has a long runway of growth ahead of it. Singapore-based Sea Ltd. has the potential of becoming the 'super-app' of South-East Asia, with gaming and e-commerce at its core but broadening their offering further to the likes of fintech.

The weight of 'Digital World' fell from 23% to 22% on the back of its lagging performance, whereas the weight of 'Healthy Aging' stabilised at 24%. No positions were sold from or added to these two trends.

#### **Currency policy**

Rolinco N.V. pursues an active currency policy with the euro as its base currency. The currency risk arises from the selection of specific stocks and the currencies in which they are denominated. Stock selection in the portfolio is mainly based on the chosen trends and not on the underlying country or currency. The various currency risks may be hedged, but this option was not implemented during the period under review. For further quantitative information on the currency risk, we refer to the information on currency risk provided on page 15.

#### **Derivatives positions**

Rolinco N.V. does not hold any hedge positions nor did it have any hedge position during the first 6 months of 2021.

#### **Investment result**

Net investment result per share class				
Share class	Price in EUR x 1 30/06/2021	Price in EUR x 1 31/12/2020	Dividend paid May 2021 <sup>1</sup>	Investment result in reporting period in \( \frac{9}{0}^2 \)
Rolinco			1.00	
- Market price	62.36	55.87		12.9
- Net asset value	62.25	55.87		12.9
Rolinco EUR G			1.00	
- Market price	67.15	59.97		13.2
- Net asset value	67.04	59.97		13.2

<sup>1</sup> Ex-dividend date

Recovery, rates and rotation were the themes that occupied markets in the first months of 2021. Optimism around a successful vaccination rollout and fiscal stimulus drove investors' hopes for a rapid re-opening and strong economic growth. The flipside of this optimism was that inflation expectations started to rise, sparking a sharp rise in especially US bond yields. It was thus no wonder that the momentum-unwind, that had started in November 2020, spilled over into the first and part of the second quarter, prompting a rotation out of long-duration growth stocks into more short-duration value stocks. Directions reversed again towards the end of the second quarter, when new strains of the corona virus led to concerns it will derail the economic recovery. Supply-chain worries, especially driven by semiconductors, added to the fear for inflation and markets started discussing central bank tapering. Nevertheless, bond yields surprisingly came down again and growth stocks regained their poise, undoing most of their underperformance versus value stocks from earlier months. The MSCI All Country World index (net return) gained 15.9%. Rolinco N.V. generated a positive return of 13.6% (gross of fees), but was held back by the focus on underperforming growth stocks.

All four trends in which Rolinco N.V. invests generated a positive return, but only two of them did better than the index. The best-performing trend was 'Healthy Aging' (+ 18.5%, all measured in EUR), as the succesfull roll-out of vaccinations led to a resumption of elective procedures in hospitals and R&D in the pharmaceutical sector. Iqvia (+40%) was a strong beneficiary of this, as was sequencing company Illumina (+32%). Alternative-asset managers like KKR (+52%) and Partners Group (+35%) were also notable performers. 'Connected Enterprise' (+18%) came in second with rental company Ashtead (+55%) the star performer of the fund. 'Digital World' (+8.5%) was a distant third; despite good performances from Alphabet (+44%) and again PayPal (+28%), other growth names like StoneCo (-18%) and Just Eat Takeaway (-16%) proved too much of a drag on performance. Luxury-goods stocks again did pretty well within 'Emerging Middleclass' (+4.5%) on the back of economic re-opening, but the prices of most of our Chinese holdings closed down. New Oriental Education (-55%) was the worst performer of the fund on fears of tightening regulation.

<sup>&</sup>lt;sup>2</sup> Any dividend payments that are distributed in any year are assumed to have been reinvested in the fund.

#### **Investment result (continued)**

#### Return and risk

The net investment result over the reporting period was achieved with a highly active investment style, as measured by active share which has hovered between 86% and 90% throughout the reporting period. The realized beta of the Rolinco N.V. portfolio was 1.04 meaning that we have taken slightly higher investment risks than the market itself (which by definition has a beta of 1). The volatility of the fund's realized return of 20.6% (annualized) was higher than the 19.1% for the index.

#### **Remuneration policy**

The fund itself does not employ any personnel and is managed by RIAM. In the Netherlands, persons performing duties for the fund at management-board level and portfolio managers are employed by Robeco Nederland B.V. The remuneration for these persons comes out of the management fee. RIAM's remuneration policy, that applies to all staff working under RIAM's responsibility, is subject to the applicable requirements of the European frameworks of the AIFMD, MiFID, the UCITS Directive, the ESMA guidelines on sound remuneration policies under the UCITS Directive, as well as the Dutch Remuneration Policy (Financial Enterprises) Act (Wet beloningsbeleid financiële ondernemingen). The remuneration policy has the following objectives:

- a) To stimulate employees to act in the best interests of clients and avoid taking undesirable risks.
- b) To promote a healthy corporate culture, with a strong focus on sustainable results in accordance with the long-term objectives of RIAM and its stakeholders.
- c) To attract and retain good staff and to reward talent and performance fairly.

#### Responsibility for the remuneration policy

The Supervisory Board of RIAM supervises the correct application of the remuneration policy and is responsible for the annual evaluation. Changes in the remuneration policy have to be approved by the Supervisory Board of RIAM. The Nomination & Remuneration Committee of the Supervisory Board of RIAM provides advice to the Supervisory Board of RIAM in the execution of these tasks, with the involvement of the Monitoring Committee. In the application and evaluation of the remuneration policy, RIAM regularly makes use of the services of various external advisers. The remuneration of fund managers consists of a fixed component and a variable component.

#### **Fixed remuneration**

The fixed salary of each employee is based on his/her role and experience and is in accordance with the RIAM salary ranges, which have also been derived from benchmarks in the investment management sector. The fixed salary is deemed to be adequate remuneration for the employee to properly execute their responsibilities, regardless of whether the employee receives any variable remuneration.

#### Variable remuneration

The available budget/pool for variable remuneration is approved in advance by the Supervisory Board of RIAM based on a proposal made by the Nomination & Remuneration Committee of the Supervisory Board of RIAM. The total budget/pool is based, in principle, on a percentage of RIAM's operating result. In order to ensure that the total variable remuneration accurately reflects the performance of RIAM and the funds that it manages, when determining the budget/pool, a correction is made for risks that may occur in the year concerned and furthermore for multiple-year risks that may affect the risk profile of RIAM.

The variable remuneration component for the fund managers depends on the multi-year performance of the fund. The system is linked to outperformance with regard to risk-adjusted pre-determined annual targets. The calculated outperformance over a one-year, three-year and five-year period is taken into account when determining the variable remuneration. Also important in this determination are behavior, the extent to which team- and individual qualitative and predetermined objectives have been achieved and the extent to which Robeco corporate values are observed. The fund manager's contribution to the various organizational objectives as well as his/her achievements related to predetermined sustainability objectives are also taken into consideration. Poor performance, unethical or non-compliant behavior will be taken into account when determining individual awards and could result in a reduction of variable remuneration. For the senior fund manager, the Identified Staff regime also applies (see below).

#### **Identified Staff**

RIAM has a specific and more stringent remuneration policy for employees who could have a material impact on the risk profile of the fund. These employees are designated to be 'Identified Staff'. As at 30 June 2021, in addition to the Management Board, RIAM has designated 96 employees as Identified Staff, including all senior portfolio managers, senior management and the heads of the control functions (HR, Compliance, Risk Management, Business Control, Internal Audit and Legal). Among other things the performance targets of these employees that are used to determine the award of variable pay are subject to additional risk analyses, both prior to the performance year and at the end when the results are evaluated. In addition, in all cases at least 70% of the payment of variable remuneration granted to these employees will be deferred for a period of four years, and 50% will be converted into instruments ('Robeco Cash Appreciation Rights') whose value will follow the company's future results.

#### **Remuneration policy (continued)**

#### Risk control

RIAM has implemented additional risk management measures with regard to the variable remuneration. For instance, RIAM has the possibility with regard to all employees to reclaim the granted variable remuneration ('claw-back') when this has been based on incorrect assumptions, fraudulent acts, serious improper behavior, serious neglect of duties or behavior that has resulted in a considerable loss for RIAM. After the granting but before the actual payment of the deferred variable remuneration components to Identified Staff, an additional assessment is performed to check whether new information would result in decreasing the previously granted remuneration components (the so-called 'malus arrangement'). The malus arrangement can be applied because of (i) misconduct or a serious error of judgement on the part of the employee (ii) a considerable deterioration of RIAM's financial results that was not foreseen at the time the remuneration was granted (iii) a serious violation of the risk management system, leading to changed circumstances compared with the granting of the variable remuneration or (iv) fraud committed by the employee concerned.

#### Annual assessment

RIAM's remuneration policy and the application thereof was evaluated in 2020 under the responsibility of the Supervisory Board of RIAM, advised by the Nomination & Remuneration Committee of the Supervisory Board of RIAM. As a result, the remuneration policy is updated in view of the new Sustainable Finance Disclosure Regulation (SFDR) and further enhanced to ensure full compliance with all regulations.

#### Sustainable investing

All Robeco's investment activities comply with the Principles for Responsible Investing (PRI). In 2020, Robeco was awarded an A+ for all applicable modules that were assessed as part of the Principles for Responsible Investment (PRI) 2020 report. This was the seventh year in a row that Robeco obtained the highest score for the majority of the modules assessed by PRI. Responsibility for implementing Sustainable investing lies with the CIO Fixed Income and Sustainability, who also has a seat on Robeco's Executive Committee.

#### Focus on stewardship

Fulfilling our responsibilities in the field of stewardship forms an integral part of Robeco's approach to Sustainable investing. A core aspect of Robeco's mission is fulfilling our fiduciary duties towards our clients and beneficiaries. Robeco manages investments for a variety of clients with different investment needs. We always strive in everything we do to serve our clients interests to the best of our ability.

We publish our own stewardship policy on our website. This policy describes how we deal with possible conflicts of interest, how we monitor the companies in which we invest, how we conduct activities in the field of engagement and voting, and how we report on our stewardship activities. To mark our strong commitment to stewardship, we are signatories to many different stewardship codes across the globe.

### AGM season 2021, a proxy season like no other

Last year the Covid-19 crisis had already left a mark on the AGM season, as several meetings were postponed or were held virtually. This season saw additional ramifications on the resolutions themselves, as executive remuneration votes required more complex analysis to account for the pandemic's impact on performance. We also saw the rise of a new phenomenon, the 'Say on Climate' vote.

Due to the ongoing crisis, shareholder meetings could not take place in person, forcing most companies to resort to a form of virtual meeting. This year we saw that several companies were creative in facilitating shareholder interaction, for example via video calling.

In many markets, shareholders get a say on how management is paid. This is an important vote for many shareholders, as it allows them to determine if pay practices set the right incentives for management. To further add complexity to this analysis, this season we needed to carefully consider how companies dealt with the impact of the pandemic. For example, if companies had received state aid, cancelled their dividends, or had to lay off a large part of their workforce, we expected boards to lower executives' variable payouts, or forego bonuses. If companies failed to do this, we voted against their remuneration proposals. So far this has led to a higher percentage against votes of 28% against compared to last year's 24%.

Over the last couple of years, shareholders increasingly have asked CO2 emitting companies to set carbon reduction targets in order to mitigate climate change. This year, many resolutions were filed with such demands. As we believe that climate change has inherent risks for companies, we tend to support such resolutions if a company has not set long, mid and short-term targets for their relevant scopes of emissions, or has failed to report on progress. In the 2021 AGM season, we have also seen the introduction of management proposals in relation to their climate strategies. Unilever, Royal Dutch Shell, Total, and Nestlé were some of the first large companies to ask for an explicit shareholder advisory vote on their climate strategies or reporting.

#### **Sustainable investing (continued)**

#### **ESG** integration by Robeco

Sustainability can bring about changes in markets, countries and companies in the long term. And since changes affect future performance, ESG factors can in our view add value to our investment process. We therefore look at these factors in the same way as we consider a company's financial position or market momentum. We have research available from leading sustainability experts, including our own proprietary research from the sustainable investing research team. This dedicated sustainable investing research team works together very closely with the investment teams to provide them with in-depth sustainability information.

The investment analysis focuses on the most material ESG factors and the connection with the financial performance of a company. We can then focus on the most relevant information in performing our investment-analysis and can reach enhanced investment decisions. Besides integrating ESG, Active Ownership and exclusions into all of our investment processes, in 2021 we continued developing new sustainable investment funds with specific sustainable goals and criteria, including a Paris aligned conservative equity fund that also avoids investing in companies that have a severe negative impact on the sustainable development goals.

#### **Contributing to the Sustainable Development Goals**

Robeco is a signatory in the Netherlands to the Sustainable Development Goals Investing Agenda. To help our customers contribute to the objectives, we worked on analyzing the SDG<sup>1</sup> contribution of companies and developing SDG investment solutions. Currently multiple solutions are available both in equity and fixed income and the amount of assets that are managed in line with this SDG methodology is increasing rapidly.

Furthermore, Robeco contributes to the SDGs by integrating ESG factors in its decision-making process for investments and encourages companies to act in support of these goals by means of a constructive dialogue. The SDGs are continually considered during the engagement and voting activities.

#### Combatting climate change

Robeco's climate change policy is focused on integrating climate issues in investments when financially material and engaging with companies. Furthermore climate risks for our funds are being assessed and monitored by the financial risk management department. In 2020 Robeco expanded its climate change policy by announcing the ambition to achieve net-zero greenhouse gas (GHG) emissions by 2050 across all its assets under management. As this is a long-term ambition, a roadmap will be developed and interim targets will be set. These targets will include reduction of portfolio emissions, but also investment in climate solutions such as green bonds and engagement with investee companies to drive emission reductions in the real economy and create real world impact.

#### **Exclusion**

Robeco pursues an exclusion policy for companies that are involved in the production of or trade in controversial weapons such as cluster munition and anti-personnel mines, for tobacco companies and for companies that severely and structurally violate either the United Nations Global Compact (UNGC) or OECD Guidelines for Multinational Enterprises. We apply strict criteria for this last category and if a dialogue fails the company can be excluded. Robeco publishes its exclusion policy and the list of exclusions on its website. In H1 2021 Robeco expanded the exclusion of tobacco to also contain retailers that derive more than 10% of their revenues from tobacco sales.

#### **Active ownership**

Constructive and effective activities under active ownership encourage companies to improve their management of risks and opportunities in the field of ESG. This in turn establishes a better competitive position and improved profitability and moreover has a positive impact on the community. Active ownership involves voting and engagement. Robeco exercises its voting rights for the shares in its investment funds all over the world. In H1 2021, we voted at 48 shareholder meetings on behalf of Rolinco N.V. At 28 (58%) of the 48 meetings, we cast at least one vote against management's recommendation. In addition, Robeco enters into an active dialogue with the companies in which it invests on questions concerning the environment, society and corporate governance. In 2020, our activities towards achieving active ownership were again awarded high scores under the Principles for Responsible Investment (PRI). Robeco has Active Ownership specialists in both Rotterdam and Hong Kong. In H1 2021 Robeco engaged with 184 companies on different issues ranging from corporate governance to food security to climate change. For Rolinco N.V., we entered into a dialogue with 14 companies, involving 18 value engagement cases. More information on our processes and themes can be found in the Stewardship Policy.

The primary focus of this engagement is to address strategic ESG issues that might affect value creation in the long term. In H1 2021 Robeco started engagement on two new sustainable themes: Climate Transition of Financials and Social Impact of Gaming.

<sup>&</sup>lt;sup>1</sup> Sustainable Development Goals as defined by the United Nations

#### **Sustainable investing (continued)**

#### **Climate Transition of Financials**

Many financial institutions have a significant exposure to the fossil fuel industry, and therefore face their own physical, transition and liability risks from the effects of global warming. Regulators are increasingly looking at the funding of climate change and how the sector should support the climate transition. Banks have to align lending policies with carbon targets that are being set by governments to meet the goals of the Paris Agreement.

#### **Social Impact of Gaming**

Videogaming – an industry that provided many positive benefits to a growing number of gamers worldwide during the lockdowns. However, as an investor, Robeco has noticed several structural social impacts in the gaming industry affecting both gamers and game developers. Problems range from gratuitous violence to stereotyped representations of minority groups, and an increase in online abuse of young gamers. The industry also faces labor problems due to the excessive use of overtime work by the game developers; some are forced to work long and unsociable hours. Management of gaming companies will be asked to reflect on their product expectations, their approach to design, under-staffing and planning, and the working culture in the firm.

#### New regulation; the EU plan for financing sustainable development

The EU's Sustainable Finance Action Plan represents one of the most impactful pieces of regulation to hit the investment management industry since MiFID II. A core tenet of the plan is the Sustainable Finance Disclosure Regulation (SFDR), which classifies investment funds according to their sustainability credentials for the first time. March 10 2021 was an important date. On this date all Robeco funds were classified to be either article 6 (do not promote ESG characteristics), article 8 (Environment and Social promoting strategies) or article 9 (strategies with a sustainable objective). As Robeco already integrates ESG in most of its strategies, around 95% of funds are classified as article 8 or 9. Fund documentation, like the prospectus and the factsheets have also been adjusted to contain more and more specific information on how ESG is implemented as the disclosure regulation requires. Lastly a sustainable risk policy was published on the website.

Rolinco N.V. is classified as Article 8 by the SFDR. More information is available in the precontractual SFDR disclosures of the fund on our website.

#### **Integration of ESG factors in investment processes**

For the Rolinco fund, we screen all additions to the portfolio on their sustainability performance taking into account both ESG data from Robeco's proprietary ESG dashboard as well as additional information by RobecoSAM and Sustainalytics research. In our fundamental analysis of and engagement with companies, we particularly focus on governance and cybersecurity issues. Refering to these two, we have ongoing engagements with five holdings in Rolinco N.V. Our four trends inherently have a strong sustainability angle to them as we invest for example in companies that help the electrification of automobiles, in companies that contribute to more efficient production processes through further automation and robotization and in companies that enable a healthier and wealthier aging. In addition to that, Rolinco N.V. does not invest in oil and gas-, steel- or chemical companies. This leads to a High Sustainability rating as awarded by Morningstar.

Moreover, new regulation has been put in place by the European Union during 2021, the Sustainable Finance Disclosure Regulation. As of 30 June 2021, Rolinco N.V. scored 16% better than the index, driven partly by the selection of trends but also by stock selection as most holdings have a low ESG Risk rating as provided by Sustainalytics.

Rotterdam, 31 August 2021 The Manager

### **Notes**

#### General

The semi-annual financial statements have been drawn up in conformity with Part 9, Book 2 of the Dutch Civil Code and the Wft. The fund's financial year is the same as the calendar year. The notes referring to fund shares concern ordinary shares outstanding.

The original financial statements were drafted in Dutch. This document is an English translation of the original. In the case of any discrepancies between the English and the Dutch text, the latter will prevail.

The ordinary shares are divided into two series, both of which are open. Each series is designated as a share class. The fund includes the following share classes:

Share class A: Rolinco

Share class B: Rolinco - EUR G

### **Accounting principles**

#### General

The other principles for the valuation of assets, liabilities and determination of the result are unchanged and therefore are in accordance with the presentation in the most recent annual financial statements. Unless stated otherwise, items shown in the semi-annual report are carried at nominal value and expressed in thousands of euros.

#### Attribution to share classes

The administration of the fund is such that attribution of the results to the different share classes takes place on a daily basis and pro rata. Issues and repurchases of own shares are registered per share class.

### Risks relating to financial instruments

#### **Investment risk**

The value of investments may fluctuate. Past performance is no guarantee of future results. The net asset value of the fund depends on developments in the financial markets and can therefore either rise or fall. Shareholders run the risk that their investments may end up being worth less than the amount invested, or even worth nothing. The general investment risk can also be characterized as market risk.

#### Market risk

Market risk can be divided into three types: price risk, currency risk and concentration risk. Market risks are contained using limits on quantitative risk measures such as tracking error, volatility or value-at-risk. This means that the underlying risk types (price risk, currency risk and concentration risk) are also indirectly contained.

#### Price risk

The net asset value of the fund is sensitive to market movements. In addition, investors should be aware of the possibility that the value of investments may vary as a result of changes in political, economic or market circumstances, as well as changes in an individual business situation. The entire portfolio is exposed to price risk. The degree of price risk that the fund runs depends among other things on the risk profile of the fund's portfolio. More detailed information on the risk profile of the fund's portfolio can be found in the section on Implementation of the investment policy on page 7.

#### Currency risk

All or part of the securities portfolio of the fund may be invested in currencies, or financial instruments denominated in currencies other than the euro. As a result, fluctuations in exchange rates may have both a negative and a positive effect on the investment result of the fund. Currency risks may be hedged with currency forward transactions and currency options. Currency risks can be limited by applying relative or absolute currency concentration limits.

As at the balance sheet date, there were no positions in currency derivatives.

#### Risks relating to financial instruments (continued)

### Market risk (continued)

Currency risk (continued)

The table below shows the gross and net exposure to the various currencies, including cash, receivables and debts. Further information on the currency policy can be found on page 8.

	30/06/2021	30/06/2021	30/06/2021	31/12/2020
Currency exposure	Gross position EUR' 000	Net position EUR' 000	% of net assets	% of net assets
AUD	21,153	21,153	2.09	2.03

USD	584,893	584,893	57.83	56.47
Total	1,011,461	1,011,461	100.00	100.00

#### Concentration risk

Based on its investment policy, the fund may invest in financial instruments from issuing institutions that operate mainly within the same sector or region, or in the same market. In the case of concentrated investment portfolios, events within the sectors, regions or markets in which they invest have a more pronounced effect on the fund assets than in less concentrated investment portfolios. Concentration risks can be limited by applying relative or absolute country or sector concentration limits.

As at the balance sheet date, there were no positions in the stock market index futures contracts.

The table below shows the exposure to stock markets through stocks per country in amounts and as a percentage of the fund's total equity capital.

#### Concentration risk by country

		30/06/2021	30/06/2021	31/12/2020
		Total		
	Equities	exposure	% of	% of
	EUR' 000	EUR' 000	net assets	net assets
Australia <sup>1</sup>	20,700	20,700	2.04	2.01

Taiwan	30,800	30,800	3.05	2.97
United Kingdom	54,871	54,871	5.42	5.58
United States of America	496,693	496,693	49.11	45.08
Total	995,431	995,431	98.42	96.87

<sup>&</sup>lt;sup>1</sup> These amounts include the fair value correction for markets that were open at the time the net asset value was calculated (1 July 2020). The prices known on 1 July 2020 at 6:00 am have been included in the valuation.

#### Risks relating to financial instruments (continued)

### Market risk (continued)

Concentration risk (continued)

The sector concentrations are shown below.

#### Concentration risk by sector

·	30/06/2021	31/12/2020
	% of net assets	% of net assets
Communication Services	8.78	7.63
Consumer Discretionary	21.72	20.49
Consumer Staples	2.81	5.11
Financials	9.72	9.83
Health Care	12.84	12.44
Industrials	5.30	6.26
Information Technology	35.39	33.40
Real Estate	1.86	1.71
Other assets and liabilities	1.58	3.13
Total	100.00	100.00

#### Credit risk

Credit risk occurs when a counterparty of the fund fails to fulfill its financial obligations arising from financial instruments in the fund. Credit risk is limited as far as possible by exercising an appropriate degree of caution in the selection of counterparties. In selecting counterparties, the assessments of independent rating bureaus are taken into account, as are other relevant indicators. Wherever it is customary in the market, the fund will demand and obtain collateral in order to mitigate credit risk. The figure that best represents the maximum credit risk is given in the table below.

	30/06/2021		31/12/2020	
		% of		% of
	EUR' 000	net assets	EUR' 000	net assets
Accounts receivable	4,318	0.43	5,029	0.55
Cash and cash equivalents	21,995	2.17	24,938	2.74
Total	26,313	2.60	29,967	3.29

No account is taken of collateral received in the calculation of the total credit risk. Credit risk is contained by applying limits on the exposure per counterparty as a percentage of the fund assets. As at the balance sheet date there were no counterparties with an exposure of more than 5% of the fund's total assets.

#### Risk of lending financial instruments

In the case of securities-lending transactions, collateral is requested and obtained for those financial instruments that are lent. In the case of securities-lending transactions, the fund incurs a specific type of counterparty risk that the borrower cannot comply with the obligation to return the financial instruments on the agreed date or to furnish the requested collateral. The lending policy of the fund is designed to control these risks as much as possible. To mitigate specific counterparty risk, the fund receives collateral prior to lending the financial instruments.

All counterparties used in the securities lending process are pre-approved by Robeco. The approval process takes into account the entities credit rating (if available) and whether the counterparty is subject to prudential regulation. Any relevant incidents involving the entity are also taken into account.

The fund accepts collateral by selected issuers in the form of:

- bonds issued (or guaranteed) by governments of OECD member states;
- local government bonds with tax raising authority;
- corporate bonds that are FED or ECB eligible collateral;
- bonds of supranational institutions and undertakings with an EU, regional or world-wide scope;
- stocks listed on the main indexes of stock markets as disclosed in the prospectus;
- cash.

#### Risks relating to financial instruments (continued)

#### Risk of lending financial instruments (continued)

In addition, concentration limits are applied to collateral to restrict concentration risks in the collateral and there are also liquidity criteria for containing the liquidity risks in the collateral. Finally, depending on the type of lending transaction and the type of collateral, collateral with a premium is requested relative to the value of the lending transaction. This limits the negative effects of price risks in the collateral.

The table below gives an overview of the positions lent out as a percentage of the portfolio (total of the instruments lent out) and relative to the fund's assets.

#### Positions lent out

	30/06/2021			•		
	Amount in	% of	% of	Amount in	% of	% of
Type of instrument	EUR' 000	portfolio	net assets	EUR' 000	portfolio	net assets
Shares lent out	34,622	3.48	3.42	14,787	1.67	1.62
Total	34,622	3.48	3.42	14,787	1.67	1.62

The following table gives an overview of the positions lent out and the collateral received per counterparty.

All outstanding lending transactions are transactions with an open-ended term. That means that there is no prior agreement as to how long the securities are lent out. Securities may be reclaimed by the fund if required.

#### **Counterparties**

				021	31/12/2	020
	Domicile of counterparty	Manner of settlement and clearing	Positions lent out EUR' 000	Collateral P received EUR' 000	ositions lent out EUR' 000	Collateral received EUR' 000

Wells Fargo	United States	Tripartite1	5,593	5,710	_	_
Total			34,622	35,631	14,787	15,247

<sup>&</sup>lt;sup>1</sup> Tripartite means that the collateral is in the custody of an independent third party.

This collateral is not included on the balance sheet.

The table below contains a breakdown of collateral received according to type. All securities received have an open-ended term.

#### Collateral by type

			30/06/2021	31/12/2020
		Rating of	Market value in	Market value in
	Currency	government bonds	EUR' 000	EUR' 000
Cash	EUR		23,013	7,218
Cash	USD		5,710	_
Government bonds	EUR	Investment grade	1,229	720
Government bonds	GBP	Investment grade	86	629
Government bonds	JPY	Investment grade	5,096	5,427
Government bonds	USD	Investment grade	497	1,253
Total	_		35,631	15,247

J.P. Morgan has been appointed depositary of all collateral received. The securities are managed by RIAM and are held on separate accounts per counterparty. In line with the provisions in the prospectus, the collateral received has not been reinvested.

#### Risks relating to financial instruments (continued)

### Risk of lending financial instruments (continued)

J.P. Morgan is the intermediary for all of the fund's securities-lending transactions. As compensation for its services, J.P. Morgan receives a fee of (A) 25% of the gross income on these securities-lending transactions for loans which generates a return of 0.5% or less and (B) 10% of the gross income from these securities-lending transactions for any loans which generate a return greater than 0.5%. An external agency periodically assesses whether the agreements between the fund and J.P. Morgan are still in line with the market. The fund's revenues and J.P. Morgan & RIAM's fee are included in the following table.

#### Income from securities lending

	01/0	01/01/2021-30/06/2021			01/01/2020-30/06/2020		
	Gross	Gross Fee paid to Net fund			Fee paid to	Net fund	
	revenues in	J.P. Morgan in	revenues in	revenues in	J.P. Morgan in	revenues in	
	EUR' 000	EUR' 000	EUR' 000	EUR' 000	EUR' 000	EUR' 000	
Shares lent out	16	4	12	35	8	27	
Total	16	4	12	35	8	27	

#### Liquidity risk

We distinguish between Asset Liquidity Risk and Funding Liquidity risk, which are closely connected:

Asset liquidity risk arises when transactions cannot be executed in a timely fashion at quoted market prices and/or at acceptable transaction cost levels due to the size of the trade. Or in more extreme cases, when they cannot be conducted at all. Asset liquidity risk is a function of transaction size, transaction time and transaction cost.

Funding liquidity risk arises when the redemption requirements of clients or other liabilities cannot be met without significantly impacting the value of the portfolio. Funding liquidity risk will only arise if there is also Asset liquidity risk.

#### Manager

Robeco Institutional Asset Management B.V. ('RIAM') manages the fund. In this capacity, RIAM handles the asset management, risk management, administration, marketing and distribution of the fund. RIAM holds an AIFMD license as referred to in Section 2:65 Wft, as well as a license to manage UCITS as referred to in Section 2:69b Wft. RIAM is moreover authorized to manage individual assets and give advice with respect to financial instruments. RIAM is subject to supervision by the Dutch Authority for the Financial Markets (the 'AFM'). RIAM has listed the fund with AFM. RIAM has listed the fund with AFM. RIAM is a 100% subsidiary of ORIX Corporation Europe N.V. via Robeco Holding B.V. ORIX Corporation Europe N.V. is a part of ORIX Corporation.

#### Depositary

The assets of the fund are held in custody by J.P. Morgan Bank Luxembourg S.A., Amsterdam Branch. J.P. Morgan Bank Luxembourg S.A., Amsterdam Branch is appointed as the depositary of the fund as referred to in Section 4:62n Wft. The depositary is responsible for supervising the fund insofar as required under and in accordance with the applicable legislation. The manager, the fund and J.P. Morgan Bank Luxembourg S.A., Amsterdam Branch have concluded a depositary and custodian agreement.

#### Liability of the depositary

The depositary is liable to the fund and/or the Shareholders for the loss of a financial instrument under the custody of the depositary or of a third party to which custody has been transferred. The depositary is not liable if it can demonstrate that the loss is a result of an external event over which it in all reasonableness had no control and of which the consequences were unavoidable, despite all efforts to ameliorate them. The depositary is also liable to the fund and/or the shareholders for all other losses they suffer because the depositary has not fulfilled its obligations as stated in this depositary and custodian agreement either deliberately or through negligence. Shareholders may make an indirect claim upon the liability of the depositary through the manager. If the manager refuses to entertain such a request, the shareholders are authorized to submit the claim for losses directly to the depositary.

### **Affiliated parties**

The fund and the manager may utilize the services of and carry out transactions with parties affiliated to the fund, as defined in the BGfo, such as RIAM, Robeco Nederland B.V and ORIX Corporation. The services entail the execution of tasks that have been outsourced to these parties such as (1) securities lending, (2) hiring temporary staff and (3) issuance and repurchase of the fund's shares. Transactions that can be carried out with affiliated parties include the following: treasury management, derivatives transactions, lending of financial instruments, credit extension, purchase and sale of financial instruments on regulated markets or through multilateral trading facilities. All these services and transactions are executed at market rates.

#### Notes to the balance sheet

#### 1. Equities

A breakdown of this portfolio is given under Schedule of Investments. A sub-division into regions and sectors is provided under the information on concentration risk under the information on Risks relating to financial instruments.

#### Transaction costs

Brokerage costs and exchange fees relating to investment transactions are discounted in the cost price or the sales value of the investment transactions. These costs and fees are charged to the result ensuing from changes in value. The quantifiable transaction costs are shown below

	01/01/2021- 30/06/2021	01/01/2020- 30/06/2020
	EUR' 000	EUR' 000
Equities	35	80

RIAM wants to be certain that the selection of counterparties for equity transactions (brokers) occurs using procedures and criteria that ensure the best results for the fund (best execution).

No costs for research were charged to the fund during the reporting period.

#### 2. Other receivables, prepayments and accrued income

This concerns receivables from dividends declared and not yet received, recoverable tax deducted at source, receivables from issuance of own shares, receivables from affiliated companies and suspense items.

#### 3. Cash and cash equivalents

This concerns directly callable credit balances at banks and any money on call.

#### 4. Other liabilities, accruals and deferred income

This concerns liabilities from dividends made payable, payable from securities transactions, liabilities from repurchases of own shares and management and service fees due.

#### 5. 6.5% cumulative preference shares

At balance-sheet date, 122,912 cumulative preference shares were outstanding. The shares have been included in the balance sheet at their original nominal value of NLG 100, which is equal to EUR 45.38. The nominal value of the shares was originally NLG 100 per share. With the introduction of the euro, these shares were re-denominated to EUR 40 each. These shares give the holder the right to a cumulative preference dividend of EUR 2.95 annually, but do not form part of the fund assets. The shares are listed on Euronext Amsterdam, Euronext Fund Service segment. Since the amendment to the Articles of Association on 14 August 2012, these shares are being redeemed by the fund.

The intrinsic value of a cumulative preference share is determined on the basis of the paid-up amount of EUR 45.38, with the addition of accrued but not yet payable dividends. In order to correctly present the assets due to ordinary shareholders, this dividend has been included in the value of the cumulative preference shares and deducted from the general reserve. The modifications are shown in the table below.

#### Notes to the profit and loss account

#### Income

#### 8. Investment income

This concerns net dividends received and revenue from securities lending minus interest paid.

#### Costs

#### 9. Management fee and service fee

The management fee and service fee are charged by the manager. The fees are calculated daily on the basis of the fund assets.

#### Management fee and service fee specified in the prospectus

	Kolinco	Rollinco - EUR G
	%	%
Management fee	1.00	0.50
Service fee <sup>1, 2</sup>	0.16	0.16

<sup>&</sup>lt;sup>1</sup> For the share classes, the service fee is 0.16% per year on assets up to EUR 1 billion, 0.14% on assets above EUR 1 billion and 0.12% on assets above EUR 5 billion.

The management fee covers all current costs resulting from the management and marketing of the fund. If the manager outsources operations to third parties, any costs associated with this will also be paid from the management fee. The management fee for the Robeco share class also include the costs related to registering participants in this share class.

The service fee paid to RIAM covers the administration costs, the costs of the external auditor, other external advisers, regulators, costs relating to reports required by law, such as the annual and semi-annual reports, and the costs relating to the meetings of shareholders. The costs for the external auditor incurred by the fund are paid by RIAM from the service fee. The fund's result therefore does not include the costs for the external auditor. Of the costs paid by RIAM for the external auditor.

#### 10. Performance fee

Rolinco N.V. is not subject to a performance fee.

#### 11. Other costs

This concerns:

	01/01/2021-	01/01/2020-
	30/06/2021	30/06/2020
	EUR' 000	EUR' 000
Custody fee	_	14
Costs for fund agent	_	6
Depositary fee	_	8
Total		28

#### 12. Ongoing charges

	Rolinco		Rolince	o - EUR G				
	01/07/2020- 30/06/2021							01/07/2019- 30/06/2020
	%	%	%	%				
Management fee	1.00	1.00	0.50	0.50				
Service fee <sup>1</sup>	0.16	0.13	0.16	0.13				
Other cost <sup>2</sup>	0.00	0.01	0.00	0.01				
Prorportion of income on securities lending payable	0.00	0.00	0.00	0.00				
Total	1.16	1.14	0.66	0.64				

<sup>1</sup> Until 1 April 2020, the service fee was 0.12% per year on assets up to EUR 1 billion, 0.10% on assets above EUR 1 billion, and 0.08% on assets above EUR 5 billion.

The percentage of ongoing charges is based on the average net assets per share class. The average assets are calculated on a daily basis. The ongoing charges include all costs charged to the share classes in the reporting period, excluding the costs of transactions in financial instruments and interest charges. The ongoing charges do not include any payment of entry or exit costs charged by distributors.

<sup>&</sup>lt;sup>2</sup> Until 1 April 2020, the service fee was 0.12% per year on assets up to EUR 1 billion, 0.10% on assets above EUR 1 billion, and 0.08% on assets above EUR 5 billion.

<sup>&</sup>lt;sup>2</sup> Until 1 April 2020, the Custody fee and bank cost was 0.02%, Costs for fund agent was 0.02% and Depositary fee was 0.01%. From 1 April 2020, Service fee covers all the costs.

#### Notes to the profit and loss account (continued)

#### **Costs (continued)**

#### 12. Ongoing charges (continued)

The proportion of securities-lending income payable as defined in the Information on the Risks of lending Financial Instruments on page 17 is included separately in the ongoing charges.

#### 13. Turnover rate

The portfolio turnover rate over the reporting period was 36% over the period 1 July 2020 through 30 June 2021 (over the period 1 July 2019 through 30 June 2020: 64%). This rate shows the rate at which the fund's portfolio is turned over and is a measure of the incurred transaction costs resulting from the portfolio policy pursued and the ensuing investment transactions. The turnover rate is determined by expressing the amount of the turnover as a percentage of the average fund assets. The average fund assets are calculated on a daily basis. The amount of the turnover is determined by the sum of the purchases and sales of investments less the sum of issuance and repurchase of own shares. The sum of issues and repurchases in the fund.

#### 14. Transactions with affiliated parties

During the reporting period the fund paid RIAM the following amounts in management fee and service fees:

		01/01/2021-	01/01/2020-	
		30/06/2021	30/06/2020	
	Counterparty	EUR' 000	EUR' 000	
Management fee	RIAM	3,238	2,578	
Service fee	RIAM	758	518	

#### 15. Fiscal status

The fund has the status of a fiscal investment institution. A detailed description of its fiscal status is included in the general information of the management report on page 5.

#### 16. Register of Companies

The fund has its registered office in Rotterdam and is listed in the Trade Register of the Chamber of Commerce in Rotterdam, under number 24107720.
