Efficiency Ratio-Fully Taxable Equivalent and Adjusted Efficiency Ratio-Fully Taxable Equivalent Definitions

The efficiency ratio and the adjusted efficiency ratio are supplemental financial measures utilized in management's internal evaluation of the Company's use of resources and are not defined under GAAP. The efficiency ratio is calculated by dividing total noninterest expense by total revenue, which includes net interest income plus noninterest income plus the tax equivalent adjustment. The adjusted efficiency ratio excludes income and expense items otherwise disclosed as non-routine from total noninterest expense.
