

Safe harbor statement

All statements in this presentation by CF Industries Holdings, Inc. (together with its subsidiaries, the "Company"), other than those relating to historical facts, are forward-looking statements. Forward-looking statements can generally be identified by their use of terms such as "anticipate." "believe." "could." "estimate." "expect." "intend." "may." "plan." "predict." "project." "will" or "would" and similar terms and phrases, including references to assumptions. Forward-looking statements are not quarantees of future performance and are subject to a number of assumptions, risks and uncertainties, many of which are beyond the Company's control, which could cause actual results to differ materially from such statements. These statements may include, but are not limited to, statements about the synergies and other benefits, and other aspects of the transactions with Incited Pivot Limited ("IPL"), strategic plans and management's expectations with respect to the production of green and low-carbon ammonia, the development of carbon capture and seguestration projects, the transition to and growth of a hydrogen economy, greenhouse gas reduction targets, projected capital expenditures, statements about future financial and operating results, and other items described in this presentation. Important factors that could cause actual results to differ materially from those in the forward-looking statements include, among others, the risk of obstacles to realization of the benefits of the transactions with IPL; the risk that the syneroies from the transactions with IPL may not be fully realized or may take longer to realize than expected; the risk that the completion of the transactions with IPL, including integration of the Waggaman ammonia production complex into the Company's operations, disrupt current operations or harm relationships with customers, employees and suppliers; the risk that integration of the Waggaman ammonia production complex with the Company's current operations will be more costly or difficult than expected or may otherwise be unsuccessful; diversion of management time and attention to issues relating to the transactions with IPL; unanticipated costs or liabilities associated with the IPL transactions; the cyclical nature of the Company's business and the impact of global supply and demand on the Company's selling prices; the global commodity nature of the Company's nitrogen products, the conditions in the international market for nitrogen products, and the intense global competition from other producers; conditions in the United States. Europe and other agricultural areas, including the influence of governmental policies and technological developments on the demand for our fertilizer products: the volatility of natural gas prices in North America and the United Kingdom; weather conditions and the impact of adverse weather events; the seasonality of the fertilizer business; the impact of changing market conditions on the Company's forward sales programs; difficulties in securing the supply and delivery of raw materials or utilities, increases in their costs or delays or interruptions in their delivery, reliance on third party providers of transportation services and equipment; the Company's reliance on a limited number of key facilities; risks associated with cybersecurity: acts of terrorism and regulations to combat terrorism; risks associated with international operations; the significant risks and hazards involved in producing and handling the Company's products against which the Company may not be fully insured; the Company's ability to manage its indebtedness and any additional indebtedness that may be incurred; the Company's ability to maintain compliance with covenants under its revolving credit agreement and the agreements governing its indebtedness; downgrades of the Company's credit ratings; risks associated with changes in tax laws and disagreements with taxing authorities; risks involving derivatives and the effectiveness of the Company's risk management and hedging activities; potential liabilities and expenditures related to environmental, health and safety laws and regulations and permitting requirements; regulatory restrictions and requirements related to greenhouse gas emissions; the development and growth of the market for green and low-carbon ammonia and the risks and uncertainties relating to the development and implementation of the Company's green and low-carbon ammonia projects; and risks associated with expansions of the Company's business, including unanticipated adverse consequences and the significant resources that could be required. More detailed information about factors that may affect the Company's performance and could cause actual results to differ materially from those in any forward-looking statements may be found in CF Industries Holdings, Inc.'s fillings with the Securities and Exchange Commission, including CF Industries Holdings, Inc.'s most recent annual and quarterly reports on Form 10-K and Form 10-Q, which are available in the Investor Relations section of the Company's web site. It is not possible to predict or identify all risks and uncertainties that might affect the accuracy of our forward-looking statements and, consequently, our descriptions of such risks and uncertainties should not be considered exhaustive. There is no quarantee that any of the events, plans or goals anticipated by these forward-looking statements will occur, and if any of the events do occur, there is no guarantee what effect they will have on our business, results of operations, cash flows, financial condition and future prospects. Forward-looking statements are given only as of the date of this presentation and the Company disclaims any obligation to update or revise the forward-looking statements, whether as a result of new information, future events or otherwise. except as required by law.

Note regarding non-GAAP financial measures

The Company reports its financial results in accordance with U.S. generally accepted accounting principles (GAAP). Management believes that EBITDA, adjusted EBITDA, adjusted EBITDA margin, net debt/adjusted EBITDA, free cash flow, and free cash flow to adjusted EBITDA conversion, which are non-GAAP financial measures, provide additional meaningful information regarding the Company's performance and financial strength. Non-GAAP financial measures should be viewed in addition to, and not as an alternative for, the Company's reported results prepared in accordance with GAAP. In addition, because not all companies use identical calculations, EBITDA, adjusted EBITDA margin, net debt/adjusted EBITDA, free cash flow, and free cash flow to adjusted EBITDA conversion, included in this presentation may not be comparable to similarly titled measures of other companies. Reconciliations of the Company's EBITDA, adjusted EBITDA, and free cash flow to the most directly comparable GAAP measures are provided in the tables accompanying this presentation.

EBITDA is defined as net earnings attributable to common stockholders plus interest expense (income)—net, income taxes, and depreciation and amortization. Other adjustments include the elimination of loan fee amortization that is included in both interest and amortization, and the portion of depreciation that is included in noncontrolling interest. The Company has presented EBITDA because management uses the measure to track performance and believes that it is frequently used by securities analysts, investors and other interested parties in the evaluation of companies in the industry.

Adjusted EBITDA is defined as EBITDA adjusted with the selected items as summarized in the tables accompanying this presentation. The Company has presented adjusted EBITDA because management uses adjusted EBITDA, and believes it is useful to investors, as a supplemental financial measure in the comparison of year-over-year performance. Adjusted EBITDA margin is defined as adjusted EBITDA divided by net sales.

Net debt is defined as short-term debt, the current portion of long-term debt, and long-term debt less cash and cash equivalents. Net debt/adjusted EBITDA is defined as net debt divided by adjusted EBITDA.

Free cash flow is defined as net cash provided by operating activities, as stated in the consolidated statements of cash flows, reduced by capital expenditures and distributions to noncontrolling interests. Free cash flow to adjusted EBITDA conversion is defined as free cash flow divided by adjusted EBITDA.

CF Industries built for the long-term

North American production assumed to be 37.2 MMBtu per MT of ammonia for feedstock and fuel, European production assumed at 37.8 MMBtu per MT for feedstock and fuel

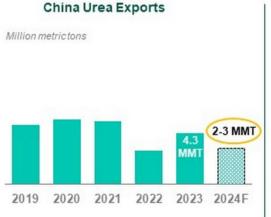

Northwestern Europe CFR assessed as of August 29, 2024

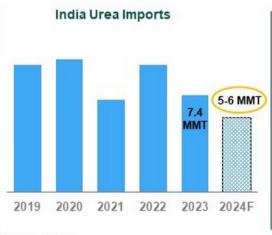

Positive global nitrogen supply-demand dynamics

Nitrogen Market Outlook

- Expect China exports and India imports to decline; Brazil imports to increase
- Europe remains the global marginal producer
- Russia Black Sea ammonia exports resuming; annual volumes expected to remain below pre-war levels
- Trinidad and Egypt gas shortages/curtailments
- Global nitrogen demand growth of ~1.5% per year for traditional applications
- Announced capacity additions limited

- ▶ Near-term global nitrogen market remains constructive
- ► Long-term demand outpaces expected capacity additions

Sources: Industry Publications, CRU Urea Market Outlook as of June 2024, CF Analysis

CF achieves superior capacity utilization through leading safety culture and world-class scale

Keys to operational success:

1. Fostering a "Do it Right" Culture

Industry leading safety performance

0.17 RIR⁽¹⁾ as of June 30, 2024

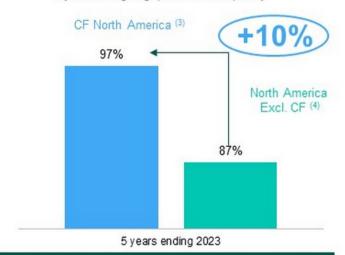

- Equipping employees with the proper safety knowledge, tools and procedures
- Longstanding safety principles

2. Scale and expertise:

- Pure play nitrogen producer
- Consistent investments to maintain assets
- Best practices across our people, processes and network

Demonstrates capital & operational efficiency

North American Ammonia Capacity Utilization(2) 5-year rolling avg. percent of capacity

CF's 10% greater capacity utilization

yields an additional ~0.9 million tons of ammonia annually from same assets compared to peers(5)

Source of data: December 19, 2023, CRU Ammonia Database

(3) Represents OF Industries' historical North American production and ORU's capacity estimates for CF Industries

Note: CRU North American peer group includes AdvanSix, Austin Powder (US Nitrogen), Carbonair, CF Industries, Chevron, CVR Partners, Dakota Gasification Co, Dyno Nobel, Fortigen, Incited Pivot (11 months production/capacity), Koch Industries, LSB In Corp, Shoreline Chemical, Simplot, Yara International

¹²⁻month rolling average recordable incident rate per 200,000 work hours through June 30, 2024

⁽⁴⁾ Calculated by removing CF Industries' annual reported production and capacity from the CRU data for all North American ammonia production peer group, Waggaman production/capacity included for one month only

^{(5) ~0.9} million tons represents the difference between CF Industries' actual trailing 5-year average ammonia production of 9.3 million tons at 97% of capacity utilization and the 8.4 million tons CF Industries would have produced if operated at the 87% CRU North American benchmark excluding CF Industries

Creating value by increasing nitrogen participation per share

Intend to repurchase remaining \$1.9B of authorization by December 2025 expiration

All N production numbers based on year end figures per 10-K filings

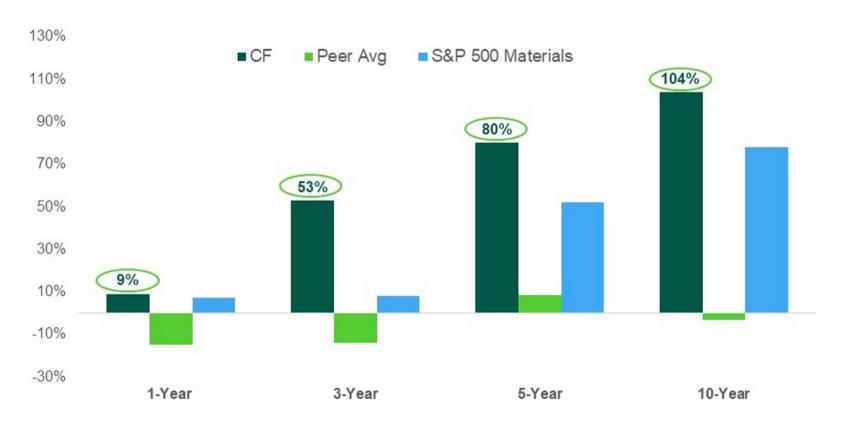

- (1) Beginning in 2010 includes capacity from Terra Industries acquisition
- (2) Beginning in 2013 includes incremental 34% of Medicine Hat production to reflect CF acquisition of Viterra's interests
- (3) Share count based on end of period common shares outstanding; share count prior to 2015 based on 5-for-1 split-adjusted shares

Votes:

- · Beginning in 2015 includes incremental 50% interest in CF Fertilisers UK acquired from Yara
- Beginning in 2016 excludes nitrogen equivalent of 1.1 million tons of urea and 0.58 million tons of UAN under CHS supply agreement and includes expansion project capacity at Donaldsonville and Port Neal
- Beginning in 2018 includes incremental 15% of Verdigris production to reflect CF's acquisition of publicly traded TNH units
- Includes decrease in production capacity due to Ince plant closure
- Includes decrease in production capacity due to Billingham NH3 plant closure and additional production capacity from Waggaman ammonia production complex

CF total shareholder return continuously outperforms

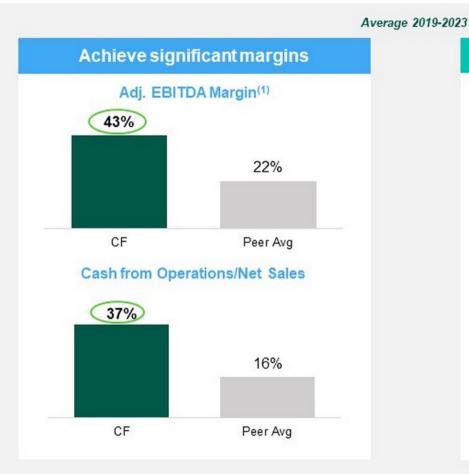

Notes:

- One, three, five and ten years through June 30, 2024
- Nutrien's returns are calculated using weighted returns of Agrium's and The Potash Corporation of Saskatchewan's pre-merger prices based on Agrium's and The Potash Corporation of Saskatchewan's exchange ratios
- Post-merger returns calculated based on Nutrien's performance since the January 2, 2018, completion of the merger of Agrium and The Potash Corporation of Saskatchewan Source: The peer group is comprised of Nutrien, Yara International, and Mosaic. Total shareholder return is calculated by and as sourced from Capital IQ on August 22, 2024

Strong financial performance enhances cash flow generation

Note

- Peer group is comprised of Nutrien, Yara International and Mosaic. See appendix for calculations for the 2019-2023 averages and peer financial metrics
- The annual averages are based on referenced metrics reported in the financial statements for the years ended December 31, 2019-2023 of the Company and, as sourced from Capital IQ on August 22, 2024
- (1) Adjusted EBITDA Margin calculated as adjusted EBITDA divided by net sales; see appendix for reconciliation of the Company's adjusted EBITDA and calculation of the adjusted EBITDA margin averages

(2) Net Debt/Adjusted EBITDA: calculated as (i) short-term debt, the current portion of long-term debt, and long-term debt less cash and cash equivalents (net debt), divided by (ii) adjusted EBITDA; see appendix for reconciliation of the Company's net debt for the period and adjusted EBITDA and calculation of the net debt/adjusted EBITDA averages

Our committed goals to decarbonize our network

Reduce Scope 1 CO2-equivalent emissions by 25% per ton of product by 2030

(2015 baseline year)

Reduce Scope 3 emissions by 10% by 2030

(2020 baseline)

Achieve net-zero Scope 1 and 2 carbon emissions by 2050

These goals align with our long-standing commitment to environmental stewardship as well as with our stakeholders' and society's interests in reducing GHG emissions

CF Industries has a unique role to play in addressing some of the world's most critical needs

Food to feed a growing population

Consistent growth 1.5%-2% annually

Traditional Nitrogen Uses

Agriculture

- Nitrogen is a non-discretionary input to maintain high vields in corn, wheat, sugar and cotton
- Spot market pricing
- Accounts for ~80% of globally traded nitrogen

▶ Industrial

- Growth follows GDP
- Typically, ratable long-term offtake agreements
- Less volatile pricing due to contract nature
- Accounts for 20% of globally traded nitrogen

Clean fuel to power the world's future

Clean energy applications expected to increase growth ~2x

Clean Energy Opportunity

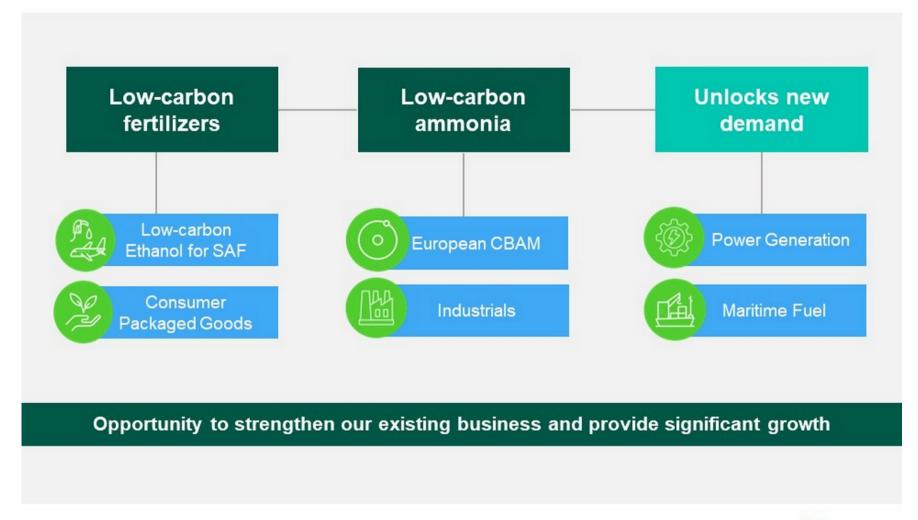

Unlocks growth

- Decarbonizes hard-to-abate industries such as power generation and marine shipping
- Enhances existing business with low-carbon fertilizer and industrial product offerings

Early-mover status

- Low-carbon ammonia available in 2025
- Partnering with global industry leaders
- Evaluating greenfield low-carbon production facility with equity partners

CF positioned to serve traditional applications and new demand sources with low-carbon ammonia

Executing strategic initiatives to meet growing low-carbon ammonia demand

Decarbonization

Carbon Capture and Sequestration

Green Ammonia

Reduce Upstream Methane Leakage

- ► Partnering with ExxonMobil for CCS
 - Donaldsonville start-up expected in 2025
 - Yazoo City start-up expected in 2028
- Evaluating additional production sites and partners for CCS and other GHG reduction opportunities
- Commissioning electrolyzer for green ammonia
 - Secured 45V-compliant RECs
- Reducing upstream Scope 3 GHG emissions with MiQ certified natural gas

Clean Energy Growth

Low-carbon Ammonia Production Growth

Clean Ammonia Industry Demand Milestones

- ► Low-carbon ammonia technology FEED studies:
 - SMR ~65% CCS: complete
 - SMR + FGC 90-95% CCS: expected Q4 2024
 - ATR 90-95% CCS: expected Q4 2024
- ► JERA successfully completed first commercial ammonia/coal co-fire test
- ▶ Demonstration with POET to validate low-carbon fertilizer in the corn value-chain for low-carbon ethanol

- Steam methane reformer (SMR), Carbon capture and sequestration (CCS), Autothermal reformer (ATR), Flue gas capture (FGC), Renewable energy certificates (RECs)
- CCS percentages represent the comparative reduction of Scope 1 carbon emissions expected to be achieved through CCS of process and flue gas carbon dioxide generated by ammonia production and currently emitted to the atmosphere

Low-carbon ammonia drives near-term margin opportunities

Decarbonization

North America tax incentives

United States 45Q tax credit for CCS (First 12 years from project startup)

Low-carbon ammonia production cost with 45Q tax incentives **competitive** with conventional ammonia production cost

\$100M+

projected free cash flow per year⁽¹⁾
Starting mid-2025

European Union CBAM

Enforced in 2026 for all imported nitrogen (Carbon Border Adjustment Mechanism)

Low-carbon ammonia expected to be higher margin than conventional ammonia in a CBAM market

(1) Based on successful implementation of announced CCS projects within the CF network

Uniquely positioned to continue creating significant long-term shareholder value

Financial results – second quarter and first half 2024
