#### 1. Summary of Significant Accounting Policies and Going Concern

#### **Accounting Practices**

A. The financial statements of Conseco Life Insurance Company of Texas ("Company") are presented on the basis of accounting practices prescribed or permitted by the Texas Department of Insurance ("Department").

The Department recognizes only statutory accounting practices prescribed or permitted by the State of Texas for reporting the financial condition and results of operations of an insurance company and determining its solvency under Texas Insurance Law. The *Accounting Practices and Procedures* manual ("NAIC SAP") has been adopted as a component of prescribed or permitted practices by the State of Texas. However, the State of Texas may adopt certain prescribed accounting practices that differ from those found in NAIC SAP. In addition, the Department has the right to permit other specific practices that deviate from prescribed practices. However, the Company has no such permitted practices.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the State of Texas is shown below:

#### B. No significant changes

C.

- (2) Bonds not backed by other loans are stated at amortized cost using the interest method, with the following exceptions: (i) those containing call provisions, except "make-whole" call provisions, are amortized using the yield-to-worst method; (ii) those rated NAIC class 6, which are stated at the lower of amortized cost or fair value; and (iii) perpetual bonds that do not possess or no longer possess an effective call option, which are reported at fair value regardless of NAIC designation. The Company does not utilize the systematic value measurement method for SVO-Identified investments.
- (6) Loan-backed bonds, structured securities and beneficial interests are stated at amortized cost using the interest method, except for those rated NAIC class 6, which are stated at the lower of amortized cost or fair value. For securities where collection of all contractual cash flows is probable, changes in currently estimated cash flows, including the effect of prepayment assumptions, are accounted for using the retrospective method. For securities that are not of high credit quality for which collection of all contractual cash flows is not probable, significant increases in cash flow estimates are accounted for using the prospective method.

No other significant changes

#### D. Going Concern

The Company's management does not have substantial doubt about its ability to continue as a going concern

- D. Loan-backed Securities
  - (1) Prepayment assumptions for loan-backed bonds and structured securities are obtained from third party vendors and internal estimates. These assumptions are reviewed for consistency with the current interest rate and economic environment.
  - (2) The Company did not record any other-than-temporary impairments ("OTTI") during the nine months ended September 30, 2024 under SSAP No. 43R Revised, Loan-backed and Structured Securities ("SSAP 43R"), resulting from either an intent to sell or the inability or lack of intent to retain the investment for a period of time sufficient to recover the amortized cost basis.
  - (3) The Company did not recognize any OTTI as of September 30, 2024 as a result of an expected shortage of discounted future cash flows to recover the amortized cost of the security on currently held loan-backed bonds, structured securities and beneficial interests.
  - (4) Loan-backed bonds, structured securities and beneficial interests owned at September 30, 2024 that have not been impaired with a fair value lower than amortized cost are summarized below by length of time that individual securities have been in a continuous loss position.
    - a. The aggregate amount of unrealized losses:

1. Less than 12 Months \$ —
2. 12 Months or Longer \$ 481,346

b. The aggregate related fair value of securities with unrealized losses:

Less than 12 Months \$ —
 12 Months or Longer \$ 1,526,077

The Company regularly evaluates its investments with unrealized losses for possible impairment. The Company's assessment of whether unrealized losses are "other-than-temporary" requires significant judgment. Factors considered include: (i) the extent to which fair value is less than the cost basis; (ii) the length of time that the fair value has been less than cost; (iii) whether the unrealized loss is event driven, credit-driven or a result of changes in market interest rates or risk premium; (iv) the near-term prospects for specific events, developments or circumstances likely to affect the value of the investment; (v) the investment's rating and whether the investment is investment-grade and/or has been downgraded since its purchase; (vi) whether the issuer is current on all payments in accordance with the contractual terms of the investment and is expected to meet all of its obligations under the terms of the investment; (vii) whether or not the Company intends to retain the investment until its anticipated recovery occurs; (viii) whether it is more likely than not that circumstances will require the Company to sell the investment before recovery occurs; (ix) the underlying current and prospective asset and enterprise values of the issuer and the extent to which the recoverability of the carrying value of the Company's investment may be affected by changes in such values; (x) projections of, and unfavorable changes in, cash flows on structured securities including mortgage-backed and asset-backed securities; (xi) the Company's best estimate of the value of any collateral; and (xii) other objective and subjective factors.

#### 10. Information Concerning Parent, Subsidiaries, Affiliates and Other Related Parties, continued

N. Bankers Conseco Life Insurance Company ("Bankers Conseco Life"), a subsidiary domiciled in New York, has adopted certain accounting practices that differ from those found in NAIC SAP.

As required by New York, Bankers Conseco Life uses continuous CARVM reserving methods for its deferred annuity contracts versus curtate CARVM reserving methods required by NAIC SAP. If curtate reserving methods were used for contracts issued beginning January 1, 2001, surplus would be increased by \$543,035 and \$499,127 as of September 30, 2024 and December 31, 2023, respectively. Additionally, net income for the nine months ended September 30, 2024 and the year ended December 31, 2023 would be increased by \$43,908 and \$194,309, respectively. Using curtate CARVM reserving methods for deferred annuity contracts would not have caused Bankers Conseco Life's risk-based capital to trigger a regulatory event. In addition, New York has the right to permit other specific practices that deviate from prescribed practices. However, Bankers Conseco Life has no such permitted practices.

  - On June 7, 2019, Platinum Partners Value Arbitrage Fund L.P. (in Official Liquidation) ("PPVA"), the Joint Official Liquidators of PPVA (the "JOLs") and Principal Growth Strategies, LLC, ("PGS"), commenced suit against, among others, CNO Financial Group, Inc., Bankers Conseco Life, Washington National Insurance Company ("Washington National") and 40|86 Advisors, Inc. (collectively, the "CNO Parties") in Delaware Chancery Court. Plaintiffs seek an unspecified amount of damages, costs, attorney's fees, and other relief as the court deems appropriate. Plaintiffs allege that the CNO Parties were unjustly enriched when they terminated Bankers Conseco Life's and Washington National's reinsurance agreements with Beechwood Re Ltd. ("BRe") and recaptured assets from reinsurance trusts, in particular, Agera securities. Plaintiffs contend that the Agera securities were fraudulently transferred to the reinsurance trusts by other Platinum-related entities and they are seeking to claw back those Agera securities, or the value of those assets, from the CNO Parties. The CNO Parties had removed the case to the United States District Court for the District of Delaware but on April 6, 2020, the District Court granted the plaintiff's motion to remand the case back to the Delaware Chancery Court. Plaintiffs have filed an Amended Complaint and the CNO Parties have moved to dismiss the Amended Complaint. The Delaware Chancery Court denied the CNO Parties' motions to dismiss the Amended Complaint on the basis of forum non conveniens, but granted the CNO Parties' motion to stay the case pending the conclusion of a related matter. On December 1, 2023, the Delaware Chancery Court lifted the stay as of November 30, 2023. On January 25, 2024, the Delaware Chancery Court granted in part and denied in part the CNO Parties' motion to dismiss the Amended Complaint. Based on the Court's ruling, PPVA and the JOLs' claims against the CNO Parties were dismissed. On April 9, 2024, PGS filed a second amended complaint, which contains the same claims against the CNO Parties that PGS had previously asserted. The CNO Parties are vigorously contesting PGS's claims.

Total Liabilities at fair value	\$ 	\$		\$		\$	<u> </u>

- (2) (3) The Company did not have any assets classified as Level 3 at September 30, 2024.
- (4) The Company's financial assets measured and reported at fair value have been classified, for disclosure purposes, based on a hierarchy defined by authoritative guidance. The degree of judgment utilized in measuring the fair value of financial instruments is largely dependent on the level to which pricing is based on observable inputs. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect our view of market assumptions in the absence of observable market information. Financial instruments with readily available active quoted prices would be considered to have fair values based on the highest level of observable inputs, and little judgment would be utilized in measuring fair value. Financial instruments that rarely trade would often have fair value based on a lower level of observable inputs, and more judgment would be utilized in measuring fair value.

Valuation Hierarchy

There is a three-level hierarchy for valuing assets or liabilities at fair value based on whether inputs are observable or unobservable.

• Level 1 – includes assets and liabilities valued using inputs that are unadjusted quoted prices in active markets for identical assets or liabilities. Our Level 1 assets primarily include cash and cash equivalents and exchange traded securities.

#### 20. Fair Value Measurements, continued

- Level 2 includes assets and liabilities valued using inputs that are quoted prices for similar assets in an active market, quoted prices for identical or similar assets in a market that is not active, observable inputs, or observable inputs that can be corroborated by market data. Level 2 assets and liabilities include those financial instruments that are valued by independent pricing services using models or other valuation methodologies. These models consider various inputs such as credit rating, maturity, corporate credit spreads, reported trades and other inputs that are observable or derived from observable information in the marketplace or are supported by transactions executed in the marketplace. Financial assets in this category primarily include: certain publicly registered and privately placed corporate fixed maturity securities; certain government or agency securities; certain mortgage and asset-backed securities; certain equity securities; and derivatives such as call options.
- Level 3 includes assets and liabilities valued using unobservable inputs that are used in model-based valuations that contain management assumptions. Level 3 assets and liabilities include those financial instruments whose fair value is estimated based on broker/dealer quotes, pricing services or internally developed models or methodologies utilizing significant inputs not based on, or corroborated by, readily available market information. Financial assets in this category include certain corporate securities, certain structured securities, mortgage loans, and other less liquid securities.

At each reporting date, we classify assets and liabilities into the three input levels based on the lowest level of input that is significant to the measurement of fair value for each asset and liability reported at fair value. This classification is impacted by a number of factors, including the type of financial instrument, whether the financial instrument is new to the market and not yet established, the characteristics specific to the transaction and overall market conditions. Our assessment of the significance of a particular input to the fair value measurement and the ultimate classification of each asset and liability requires judgment and is subject to change from period to period based on the observability of the valuation inputs.

B.- C. As of September 30, 2024, the aggregate fair value of all financial instruments and the level within the fair value hierarchy in which the fair value measurements in their entirety fall were as follows:

Type of Financial Instrument	Aggregate Fair Value	Admitted Assets	Level 1	Level 2	Level 3	Net Asset Value (NAV)	Not Practicable Carrying Value
