The financial statements of First Acceptance Insurance Company of Tennessee, Inc. (the "Company") are presented on the basis of accounting practices prescribed or permitted by the Tennessee Department

The Tennessee Department of Commerce and Insurance recognizes only statutory accounting practices prescribed or permitted by the state of Tennessee for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under the Tennessee Code. The National Association of Insurance Commissioners' (NAIC) Accounting Practices and Procedures Manual (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the state of Tennessee. There are no differences between NAIC and NAIC SAP accounting practices for the Company.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Premiums are earned over the terms of the related insurance policies. Unearned premium reserves are established to cover the unexpired portion of premiums written. Such reserves are computed by pro rata methods for direct business

Expenses incurred in connection with acquiring new insurance business, including such acquisition costs as sales commissions, are charged to operations as incurred.

The Company uses the following accounting policies (all other notes are not applicable):

- (1) Short-term investments are stated at amortized cost

(11) Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and loss reports and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liabilities are continually reviewed and any adjustments are reflected in the period determined.
