1. Macao operations reflect amounts from The Venetian Macao, The Londoner Macao, The Parisian Macao, The Plaza Macao and Four Seasons Macao, Sands Macao and Ferry Operations and Other.

2. These amounts present the illustrative impact if the current period rolling chip win percentage was 3.30%. Included are the estimated commissions paid, discounts and other incentives rebated directly or indirectly to the customers, gaming taxes and bad debt expense that would have been incurred or avoided.

Note: Beginning with the fourth quarter of 2023, we are no longer reporting quarterly "consolidated hold-normalized Adjusted Property EBITDA," "hold-normalized Adjusted Property EBITDA" for Macao operations and Marina Bay Sands, and "hold-normalized Adjusted Net Income (Loss) from continuing operations attributable to LVS" or "hold-normalized Adjusted Earnings (Loss) per diluted share from continuing operations." We are making this change in response to comments from the SEC staff in connection with their ordinary course review. We will continue to report the impact on quarterly revenue and Adjusted Property EBITDA for our Macao operations and Marina Bay Sands had we held as expected in our rolling play.
