"These actions included a \$1.05 billion capital investment anchored by Liberty Strategic Capital and we strengthened our senior executive management team with the addition of four proven leaders, whose backgrounds and expertise will be instrumental in our efforts to improve the earnings profile of the bank and enhance long-term shareholder value. We also completed an in-depth due diligence of the loan portfolio, which included a thorough review of the top 250 multi-family loans, the top 50 office loans, and the top 50 non-office commercial real estate loans, and

increased our credit reserve during the quarter. We anticipate an elevated level of loan loss provision over the remainder of 2024 related to the potential for market and rate conditions to impact borrower performance on certain portions of our loan portfolio."

Mr. Otting continued, "Since taking on the CEO role, my focus has been on transforming New York Community Bank into a high-performing, well-diversified regional bank. While this year will be a transitional year for the Company, we have a clear path to profitability over the following two years. By the end of 2026, we target significantly higher profitability and higher capital levels, including a return on average earnings assets of 1%, a return on average tangible common equity of 11% to 12%, supported by a common equity tier 1 capital target in the range of 11% to 12%."

"Finally, I would like to personally thank all of our teammates. I know the past several months have been tumultuous and you have endured multiple challenges along the way. Your dedication has been nothing short of amazing. My sincere thanks to each and every one of you."

Net Interest Income

Net interest income totaled \$624 million in first quarter 2024, down \$116 million, or 16%, compared to fourth quarter 2023, and an increase of \$69 million, or 12%, compared to the first quarter of 2023. The decrease from the fourth quarter 2023 is primarily driven by a 54 basis points reduction in the net interest margin and higher average interest-bearing liabilities, partially offset by higher average cash balances. The increase from the first quarter of 2023 was primarily driven by higher average loans, along with higher average cash balances reflecting actions to proactively manage liquidity needs. These increases were partially offset by a 32 basis points reduction in the net interest margin and higher average interest-bearing liabilities.

Net Interest Margin

The net interest margin for the first quarter 2024 was 2.28%, down 54 basis points compared to fourth quarter 2023 and down 32 basis points compared to first quarter 2023. The 54 basis points reduction compared to fourth quarter 2023 was primarily driven by a higher cost of funds with the average rate on borrowing costs increasing 85 basis points and the impact from a deposit mix shift from lower cost interest-bearing checking and MMA to higher cost certificates of deposits. The 32 basis points reduction compared to first quarter 2023 was primarily due to the impact from higher interest rates on the cost of funds with average cost of borrowed funds increasing 143 basis points and average cost of interest-bearing deposits increasing 145 basis points, partially offset by higher earning asset yields which increased 71 basis points.

Average cash balances increased to \$14.3 billion during the quarter, up \$7.6 billion, reflecting actions to proactively manage liquidity needs and average securities were relatively flat. The year-over-year increases are primarily driven by the Signature transaction.

March 31 2024

For the three months ended March 31, 2024, non-interest income totaled \$9 million compared to \$127 million for the fourth quarter 2023 and \$2.1 billion for the first quarter 2023. Excluding the bargain purchase gain adjustment of \$121 million in the first quarter 2024, \$11 million in the fourth quarter 2023 and \$2.0 billion in the first quarter 2023 related to the Signature transaction, non-interest income decreased \$8 million compared to fourth quarter 2023 and increased \$33 million compared to first quarter 2023.

The \$8 million decrease compared to the fourth quarter 2023 was primarily driven by a lower net return on MSR and lower fee income from commercial and retail banking fees, partially offset by higher other income. Net gain on loan sales increased to \$14 million from \$11 million in the prior quarter. The current quarter included a net gain of \$6 million related to the sale of a loan we moved to held-for-sale in the prior quarter and the sale of the RV/Marine portfolio, both of which closed during the current quarter.

The \$33 million increase compared to the first quarter 2023 was primarily driven by \$18 million higher other income, \$9 million higher net loan administration income, and \$7 million higher fee income. Net mortgage gain on sale margin decreased 28 basis points to 48 basis points compared to 76 basis points in the first quarter 2023.

Excluding merger-related and restructuring expenses, intangible amortization expense, goodwill impairment and the FDIC insurance special assessment of \$49 million, total operating expenses were \$558 million for the fourth quarter 2023. NEW YORK COMMUNITY BANCORP, INC. RECONCILIATIONS OF CERTAIN GAAP AND NON-GAAP FINANCIAL MEASURES

(dollars in millions)

While stockholders' equity, total assets, and book value per share are financial measures that are recorded in accordance with U.S. generally accepted accounting principles ("GAAP"), tangible stockholders' equity, tangible assets, and tangible book value per share are not. Nevertheless, it is management's belief that these non-GAAP measures should be disclosed in our earnings releases and other investor communications for the following reasons:

- 1. Tangible stockholders' equity is an important indication of the Company's ability to grow organically and through business combinations, as well as its ability to pay dividends and to engage in various capital management strategies.
- 2. Returns on average tangible assets and average tangible stockholders' equity are among the profitability measures considered by current and prospective investors, both independent of, and in comparison with, the Company's peers.
- 3. Tangible book value per share and the ratio of tangible stockholders' equity to tangible assets are among the capital measures considered by current and prospective investors, both independent of, and in comparison with, its peers.

Tangible stockholders' equity, tangible assets, and the related non-GAAP profitability and capital measures should not be considered in isolation or as a substitute for stockholders' equity, total assets, or any other profitability or capital measure calculated in accordance with GAAP. Moreover, the manner in which we calculate these non-GAAP measures may differ from that of other companies reporting non-GAAP measures with similar names.

The following table presents reconciliations of our common stockholders' equity and tangible common stockholders' equity, our total assets and tangible assets, and the related GAAP and non-GAAP profitability and capital measures at or for the periods indicated:

New York Community Bancorp, Inc. Reports First Quarter 2024 Results

While diluted earnings per common share, net income, net income available to common stockholders, and total non-interest income are financial measures that are recorded in accordance with GAAP, financial measures that adjust these GAAP measures to exclude expenses and the bargain purchase gains related to our merger with Flagstar and the Signature transaction, and initial provision for credit losses are not. Nevertheless, it is management's belief that these non-GAAP measures should be disclosed in our earnings release and other investor communications because they are not considered part of recurring operations and are included because the Company believes they may provide useful supplemental information for evaluating the underlying performance trends of the Company.

While net income is a financial measure that is calculated in accordance with GAAP, PPNR and PPNR excluding bargain purchase gains, FDIC special assessment and merger-related and restructuring expenses are non-GAAP financial measures. Nevertheless, it is management's belief that these non-GAAP measures should be disclosed in our earnings releases and other investor communications because management believes these measures are relevant to understanding the performance of the Company attributable to elements other than the provision for credit losses and the ability of the Company to generate earnings sufficient to cover estimated credit losses. These measures also provide a meaningful basis for comparison to other financial institutions since it is commonly employed and is a measure frequently cited by investors and analysts. The following table reconciles the non-GAAP financial measures of PPNR and PPNR excluding bargain purchase gains, FDIC special assessment and merger-related and restructuring expenses to the comparable GAAP financial measures of net income for the stated periods:
