Forward Looking Statements

This and other presentations made by NW Natural Holdings from time to time, may contain forward-looking statements within the meaning of the U.S. Private Securities Litigation Reform Act of 1995, which are subject to the safe harbors created by such Act. Forward-looking statements can be identified by words such as “anticipates,” “intends,” “plans,” “seeks,” “believes,” “estimates,” “expects” and similar references to future periods. Examples of forward-looking statements include, but are not limited to, statements regarding the following: plans; objectives; estimates; timing; goals; strategies; future events; projections; expectations; acquisitions and timing; completion and integration thereof; storage, pipeline and other infrastructure investments; safety; system modernization and reliability; risk profile; commodity costs and sourcing; competitive advantage; marketing success; service territory; customer service; customer and business growth; customer satisfaction ratings; weather; customer rates and timing and magnitude of potential rate changes; price advantage; customer preference; conversion potential; business risk; efficiency of business operations; regulatory recovery; business development and new business initiatives; water and wastewater industry and investments including timing, completion and integration of such investments; environmental initiatives and remediation recoveries; gas storage markets and business opportunities; gas storage development, costs, timing or returns related thereto; dispositions and timing, completion and outcomes thereof; accretion, financial positions and performance; economic and housing market trends and performance; shareholder return and value; capital expenditures; technological innovations and investments; availability and sources of liquidity; strategic goals and visions; decarbonization and the role of natural gas and the gas delivery system, including competitive renewable natural gas strategy; use of renewables such as renewable natural gas and hydrogen; low carbon pathway and Vision 2050; carbon emissions and savings; renewable natural gas projects or investments and timing related thereto; procurement of renewable natural gas for customers; workforce trends; diversity, equity and inclusion initiatives; hedge efficacy; cash flows and adequacy thereof; return on equity; capital structure; return on invested capital; revenues and earnings and timing thereof; margins; net income; operations and maintenance expense; dividends; credit ratings and profile; debt and equity issuances; the regulatory environment; effects of regulatory disallowance; timing or effects of future regulatory proceedings or future regulatory approvals; regulatory prudence reviews or deferrals; timing, outcome and effects of regulatory dockets or mechanisms or approvals, including, but not limited to, OPUC approval of the Oregon general rate case comprehensive stipulation; effects of legislation and changes in laws and regulations, including but not limited to carbon, renewable natural gas and renewable hydrogen regulations; gas supply; supply chain; effects, extent, severity and duration of COVID-19 and resulting economic disruption; the impact of efforts to mitigate risks posed by its spread, the ability of our workforce, customers or suppliers to operate or conduct business, COVID-19 expenses and financial impact and cost recovery including through regulatory deferrals, impact on capital projects, governmental actions and timing thereof, including actions to reopen the economy; and other statements that are other than statements of historical facts.

Forward-looking statements are based on our current expectations and assumptions regarding our business, the economy and other future conditions. Because forward-looking statements relate to the future, they are subject to inherent uncertainties, risks and changes in circumstances that are difficult to predict. Our actual results may differ materially from those contemplated by the forward-looking statements, so we caution you against relying on any of these forward-looking statements. They are neither statements of historical fact nor guarantees or assurances of future performance. Important factors that could cause actual results to differ materially from those in the forward-looking statements are discussed by reference to the factors described in Part I, Item 1A “Risk Factors,” and Part II, Item 7 and Item 7A “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” and “Quantitative and Qualitative Disclosure about Market Risk” in the Company’s most recent Annual Report on Form 10-K, and in Part I, Items 2 and 3 “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and “Quantitative and Qualitative Disclosures About Market Risk”, and Part II, Item 1A, “Risk Factors”, in the Company’s quarterly reports filed thereafter.

All forward-looking statements made in this presentation and all subsequent forward-looking statements, whether written or oral and whether made by or on behalf of the Company, are expressly qualified by these cautionary statements. Any forward-looking statement speaks only as of the date on which such statement is made, and we undertake no obligation to publicly update any forward-looking statement, whether as a result of new information, future developments or otherwise, except as may be required by law.

Leadership Presenting

BRODY J. WILSON • Vice President, Treasurer, Chief Accounting Officer, and Controller

Mr. Wilson is currently NW Holding's Vice President and Treasurer effective October 2018 and NW Natural's Vice President and Treasurer effective May 2017 in addition to his duties as Chief Accounting Officer (2016) and Controller (2013). Prior to joining the Company in 2012, he was a Senior Manager in the Energy & Utility Group at PricewaterhouseCoopers LLP. Mr. Wilson holds a Bachelor of Science in Accounting from George Fox University and is a CPA in Oregon.

Introduction

NWN At A Glance

NW Natural®

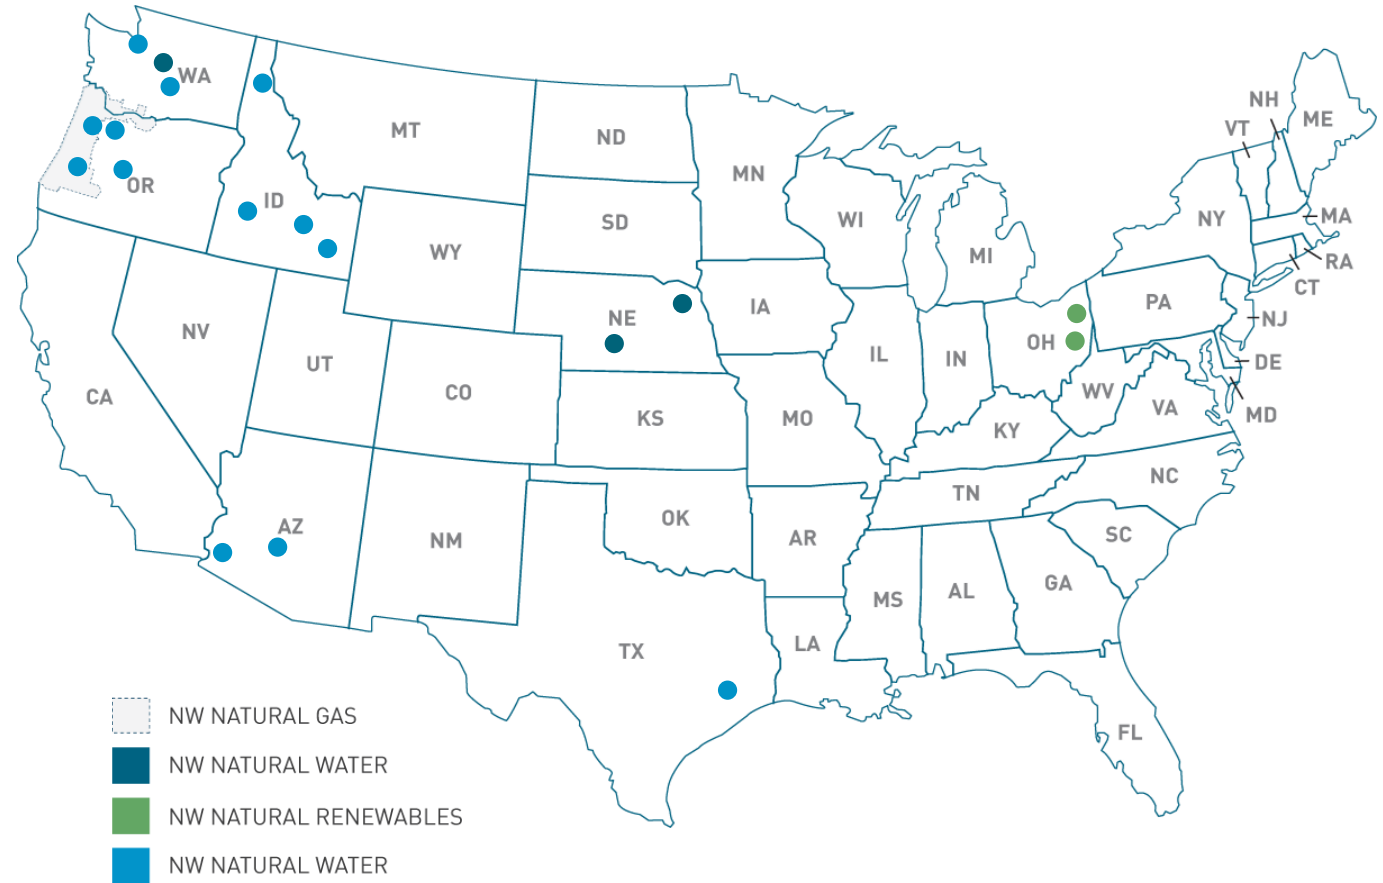

- Serving 2.0 million people and 800,000 gas utility connections
- 14,000 miles of modern pipeline
- \$4.4 billion in assets
- Growing service territory in Oregon & Southwest Washington

NW Natural WATER™

- Serving 187,300 people through 75,500 owned connections
- Supporting 21,400 O&M service connections
- \$163 million of property, plant and equipment
- Fast-growing service territories and disciplined expansion

NW Natural RENEWABLES™

- Investing in renewable energy and the transition to a decarbonized future
- Focused on the production and supply of lower carbon fuels supporting a variety of sectors
- Initial \$50 million total investment in RNG production facility

Corporate Strategy

Conservative Strategy

Stable gas and water utility margins through progressive regulation

- Gas utility: weather, decoupling and environmental cost recovery mechanisms as well as a renewable natural gas automatic adjustment clause in Oregon
- Constructive relationships with regulators and customer groups benefit both gas and water utilities

Excellent operations and efficient cost structure

- Commitment to safety, reliability, and high-quality service
- Continued focus on efficient business operations

Long-term growth opportunities that fit NWN's profile

- **GAS UTILITY:** strong cap-ex profile with attractive and growing service territory
- **WATER & WASTEWATER:** long-term, disciplined strategy to acquire water utilities and wastewater businesses in a highly fragmented industry with ample infrastructure investment opportunities
- **COMPETITIVE RNG:** potential for incremental earnings and cash flow through renewable natural gas investments, supported by long-term contracts, that could help decarbonize a variety of sectors including utility, commercial, industrial and transportation sectors

HIGHLY REGULATED

Majority Revenues from Utilities
2023 Operating Revenues

Favorable Customer Mix
2023 Natural Gas Utility Margin

¹ Other is primarily margin from North Mist regulated gas storage services

Community & Sustainability Achievements

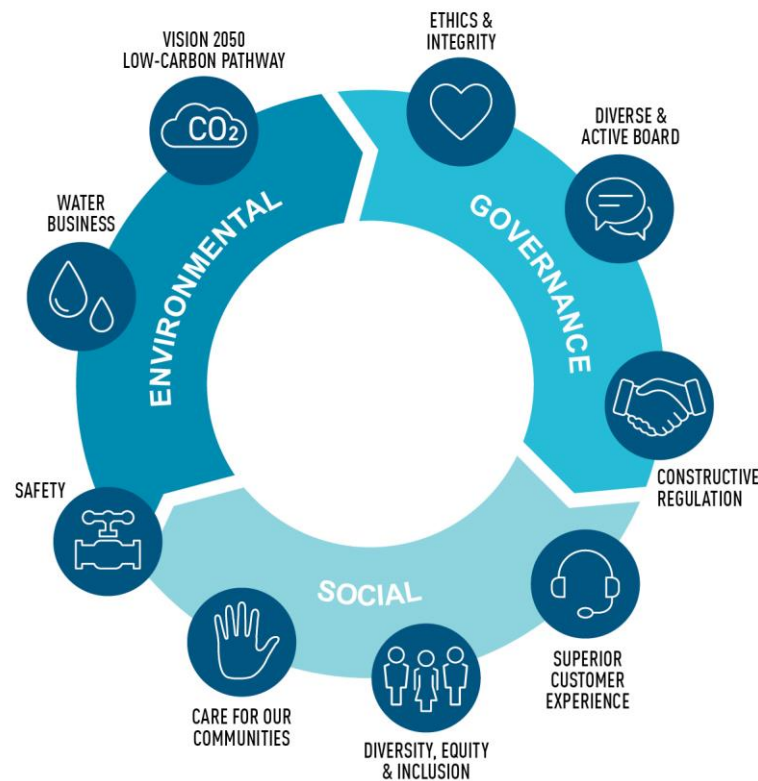

Published ESG Report with disclosures in alignment with SASB and including components of TCFD

Environmental

- On track to meet or exceed carbon savings goal of 30% by 2035¹
- Saved 535,881 metric tons of carbon dioxide equivalent in 2022, taking nearly 119,000 cars off the road
- Our vision forward is being a provider of carbon neutral energy by 2050

Safety

- No cast iron or bare steel pipe in natural gas system, making our system one of the most modern and tightest in the nation
- Performed transmission pipeline inspections at about 2.5x the rate required in 2022
- By end of 2022, we had installed more than 295,000 EFVs on about 40% of service lines, compared to industry average of 27%

Governance

- Maintained well-qualified, diverse, independent and active Board with appropriate business & risk oversight
- Today 11 out of 12 directors are independent
- 25% identify as culturally or racially diverse, 50% identify as women including board chair
- 100% of active NW Natural employees participated in ethics and compliance training in 2022
- Honored for the third year in a row as one of the World's Most Ethical Companies^{®3}

Customers & Employees

- Ranked #2 in the West for residential customer service²
- In 2022, donated \$1 million and 7,584 volunteer hours
- In 2022, 27% of our workforce were women, and 21% were racially or culturally diverse

Full report at nwnatural.com/about-us/the-company/sustainability

¹ This is an emissions savings goal equivalent to 30% of the carbon emissions from our sales customers' gas use and NW Natural company operations from 2015
² 2022 and 2023 J.D. Power Gas Utility Residential Customer Satisfaction Study for Large Utilities
³ "World's Most Ethical Companies" and "Ethisphere" names and marks are registered trademarks of Ethisphere LLC

Long-Term Investment Targets

Growth targets over the next five years include:

Consolidated Holding Company

- EPS growth of 4% - 6%¹
- Strong and growing dividend²

Natural Gas Utility

- Customer growth averaging 0.8% per year
- Capital plan of \$1.4 - \$1.6 billion
- Rate base growth of 5% - 7%³

Water & Wastewater Utilities

- Long-term strategy, incremental earnings growth and diversity
- Deliberate and disciplined roll-up strategy
- Organic customer growth averaging 2.5 – 3.0% per year
- Capital plan of \$120 - \$140 million⁴ for system improvements

¹ EPS growth forecasted for period 2022 – 2027 compounded annually; EPS growth rate uses 2022 EPS of \$2.54 as base year

² Future dividends are subject to Board of Director discretion and approval

³ Rate base growth forecasted for period 2023 - 2028

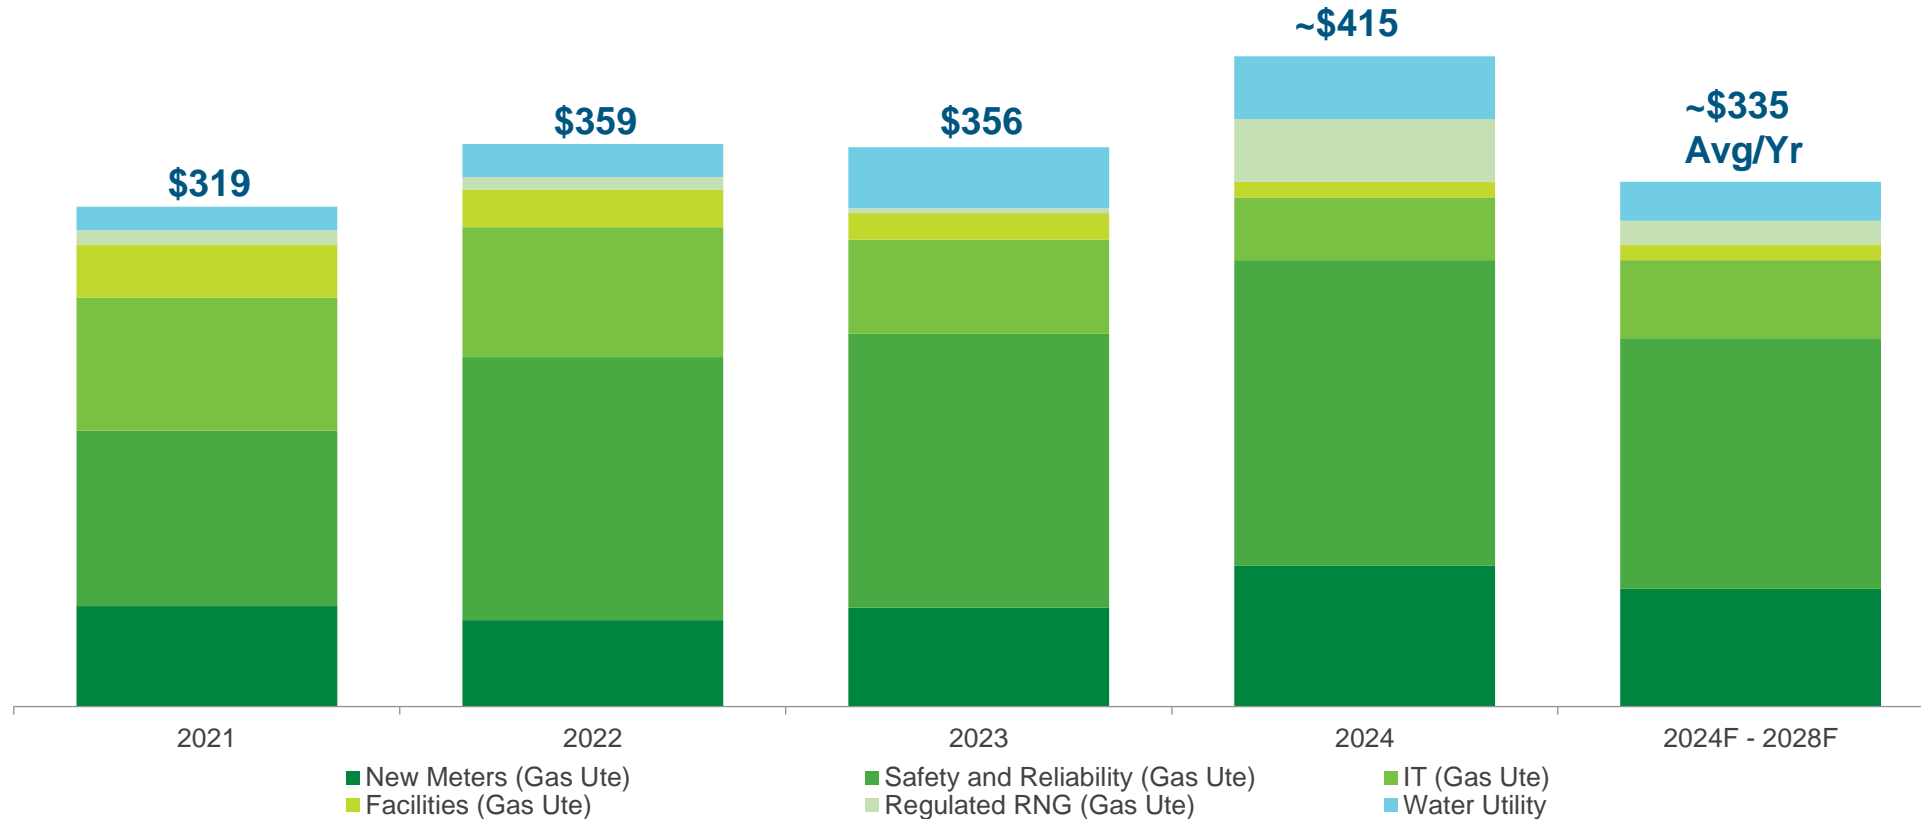

⁴ Water cap-ex plan is based on projected needs of water and wastewater utilities acquired or pending acquisition as of 12/31/23

Stable and Growing Return Proposition

Investing in our Systems

Gas & Water Capital Expenditures¹
(In millions)

Consolidated Forecast Five-Year 2024-28 Cap-Ex Approximately \$1.6 Billion

¹ Chart is based on accrual cap-ex figures and includes cloud-based software and excludes acquisition cap-ex.

The timing and amount of the capital expenditures and projects for 2024 or additional investments in our infrastructure during or after 2024 could change based on customer growth, significant changes in prevailing regulatory policies or outcomes, or significant local, state or federal laws, legislation or regulations, or cost estimates. Required funds for the investments are expected to be internally generated or financed with long-term debt or equity, as appropriate.

Liquidity and Financing

Available Liquidity

As of June 30, 2024

Strong Credit Ratings¹

	S&P	Moody's
NW Natural Holdings:		
Issuer Credit Rating	A	N/A
Outlook	Negative	N/A
NW Natural Gas:		
Senior Secured Debt	AA-	A2
Senior Unsecured Debt	A+	Baa1
Outlook	Stable	Stable

¹ The above credit ratings are dependent upon a number of factors, both qualitative and quantitative, and are subject to change at any time. The disclosure of these credit ratings is not a recommendation to buy, sell or hold NW Holdings securities.

Natural Gas Utility

Gas Utility Overview

- Over 165 years of service in our communities
- Largest stand-alone local distribution company in the Pacific Northwest
- Serve 2.0 million people in more than 140 communities through 800,000 meters in Oregon and southwest Washington
- Consistently recognized for high-quality customer service by J.D. Power
- One of the safest, most modern distribution systems in the country

Resilient Business Model

Nearly 80% of Natural Gas Utility Margin is Decoupled

	% of Volumes	% of Margin	% of Margin Decoupled
Residential	38%	65%	90%
Commercial	23%	24%	76%
Industrial	39%	6%	0%
Other	N/A	5%	N/A
Total	100%	100%	77%

For year ended December 31, 2023

~70% of Gas Utility Margin Earned during Heating Season

	Q1	Q2	Q3	Q4
Sales Volumes <i>(weather normalized)</i>	40%	18%	10%	32%
Utility Margin	38%	19%	12%	31%
Net Income	77%	0%	-26%	49%

For year ended December 31, 2023

Customer Growth

Customer growth

- Headwinds from interest rates
- Single-family permitting in Oregon and Portland metro picked up on a trailing 12-month annualized basis year-over-year in June 2024
- Projecting 0.8% customer growth for 2024

Conversions

- Serve 63% of single-family homes in territory
- Opportunities to convert homes

Affordable Energy

- Oregon customers saw 9% reduction in rates beginning Nov. 1, 2023
- Today, NW Natural customer bills are 7% lower today than 15 years ago
- Expect customers will pay ~2% more for their natural gas service this upcoming winter than they did in 2005

Net Customer Growth Rate

Investing in the Gas System

New Meters/Customer Growth

- Meter modernization/replacement program
- New construction & conversions
- Main extensions

Safety & Reliability

- Recurring replacements
- Enhanced system reliability to support growth

Technology

- Security, efficiencies and upgrades
- Customer information system

Facilities

- Resource and operations center renovations

Renewable Natural Gas (RNG)

- Planned investments for gas utility

System Capital Expenditures¹ (In millions)

The timing and amount of the capital expenditures and projects for 2024 or additional investments in our infrastructure during or after 2024 could change based on customer growth, significant changes in prevailing regulatory policies or outcomes, or significant local, state or federal laws, legislation or regulations, or cost estimates. Required funds for the investments are expected to be internally generated or financed with long-term debt or equity, as appropriate.

1 Chart is based on accrual cap-ex figures and includes cloud-based software

Gas Utility Forecast Five-Year 2024-28 Cap-Ex Approximately \$1.5 Billion

RATE CASE TEST YEAR	Forward	Multiyear ³
CURRENT RATE STRUCTURES:		
ROE	9.4%	Not determined
ROR	6.836%	6.814%
Equity Ratio	50%	Not determined
2023 Rate Base ⁴	\$1.9B	\$0.3B

- ¹ Recovery is expected to be determined through a future rate case proceeding.
- ² In Oregon, NW Natural shares PGA gains and losses
- ³ In 2019, SB 5116 was passed granting the WUTC authority to incorporate costs and capital up to 48 months after the rate effective date. In 2021, SB 5295 was passed requiring multiyear general rate plans that include performance-based measures.
- ⁴ Rate base is a 13-month average ending 12/31/23. Oregon rate base includes gas reserves and North Mist gas storage facility

Supportive Mechanisms

OREGON Decoupling

- Intended to break the link between earnings and consumption by removing incentive to increase usage
- Employs use-per-customer decoupling calculation, which adjusts margin revenues to account for the difference between actual and expected customer volumes

OREGON Weather Normalization (WARM)

- Stabilizes collection of fixed costs for residential and commercial customers
- Adjusts billings based on temperature variances compared to average weather
- Applied from December through mid-May of each heating season

OREGON • WASHINGTON Purchased Gas Adjustment (PGA)

- Adjusts annual rates to reflect changes in expected cost of gas commodity purchases
- Includes spot purchases, contract supplies, derivatives, storage inventories, and for Oregon gas reserves
- Includes temporary rate adjustments amortizing deferred regulatory account balances

OREGON • WASHINGTON Environmental Cost Recovery

- Recovers environmental costs for sites attributable to Oregon and Washington
- Costs are subject to an annual prudence review in both Oregon and Washington, and in Oregon an earnings test¹
- Allows for deferral of environmental costs in both Oregon and Washington, and in Oregon the accrual of carrying costs

OREGON RNG Automatic Cost Recovery

- Allows renewable natural gas project costs to be added to rates annually on November 1st
- Provides for a mechanism for NW Natural to defer the difference between forecasted and actual RNG costs
- Costs are subject to an earnings test that includes deadbands at 50 basis points below and above NW Natural's authorized ROE

¹ To the extent the utility earns more than its authorized ROE in Oregon in a year, the utility is required to cover environmental expenses and interest on expenses greater than \$10 million (plus interest from insurance proceeds) with those earnings that exceed its authorized ROE

Washington 2021 Rate Case

- **Order received October 21, 2021** – Multi-party settlement approved by the WUTC. New rates were effective Nov. 1, 2021 with the second year effective Nov. 1, 2022
- **Request Based on System Investments** – Multiyear rate case to recover investments and costs for:
 - System resiliency & reliability
 - Headquarter leasehold improvements & rent costs
 - Vancouver, Washington service center upgrades
 - Consumer-focused technology investments

Environmental Stewardship

Role of Our Gas System Today

NW Natural's System

- Delivers 50% more energy than any other utility in Oregon
- During winter peak-demand periods, the natural gas system in Portland, Oregon, delivers about twice as much energy as the electric system to residential customers
- One of the tightest, most modern natural gas distribution systems in the nation
- Our residential and commercial customers' emissions account for just 5% of Oregon's total carbon emissions

OREGON GREENHOUSE GAS EMISSIONS BY SECTOR

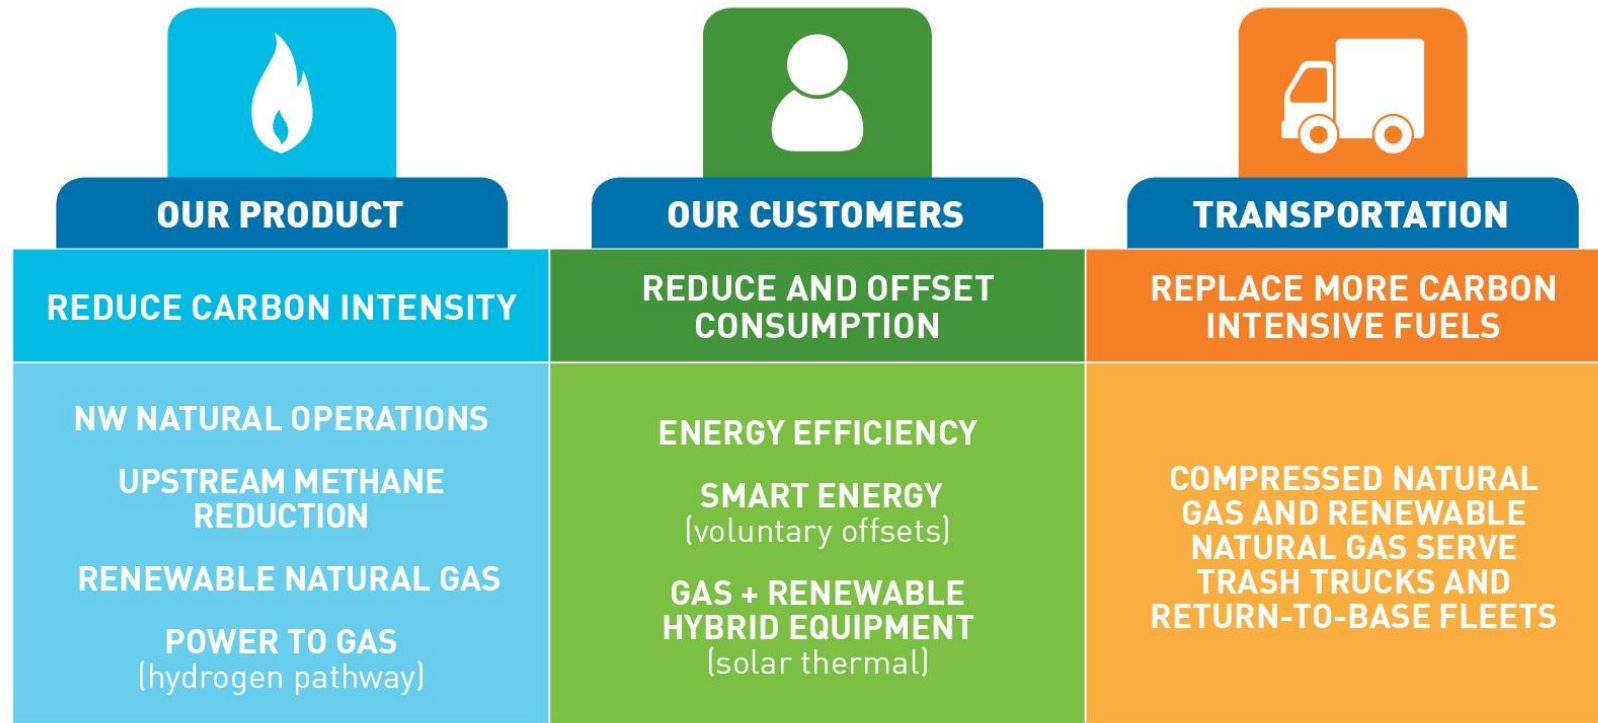

Source: Oregon DEQ In-Boundary GHG Inventory Preliminary 2021 data.

Our Low-Carbon Pathway

VOLUNTARY GOAL: 30% CARBON SAVINGS BY 2035

Goal established in 2016

Baseline: 2015 emissions associated with customer use & company operations

On Track to Meet or Exceed Goal

Our voluntary carbon savings goal of 30% by 2035 includes emissions from our own operations and the gas use by our sales customers

2022: Ahead of Target Savings Rate

535,881 metric tons of carbon dioxide equivalent saved.

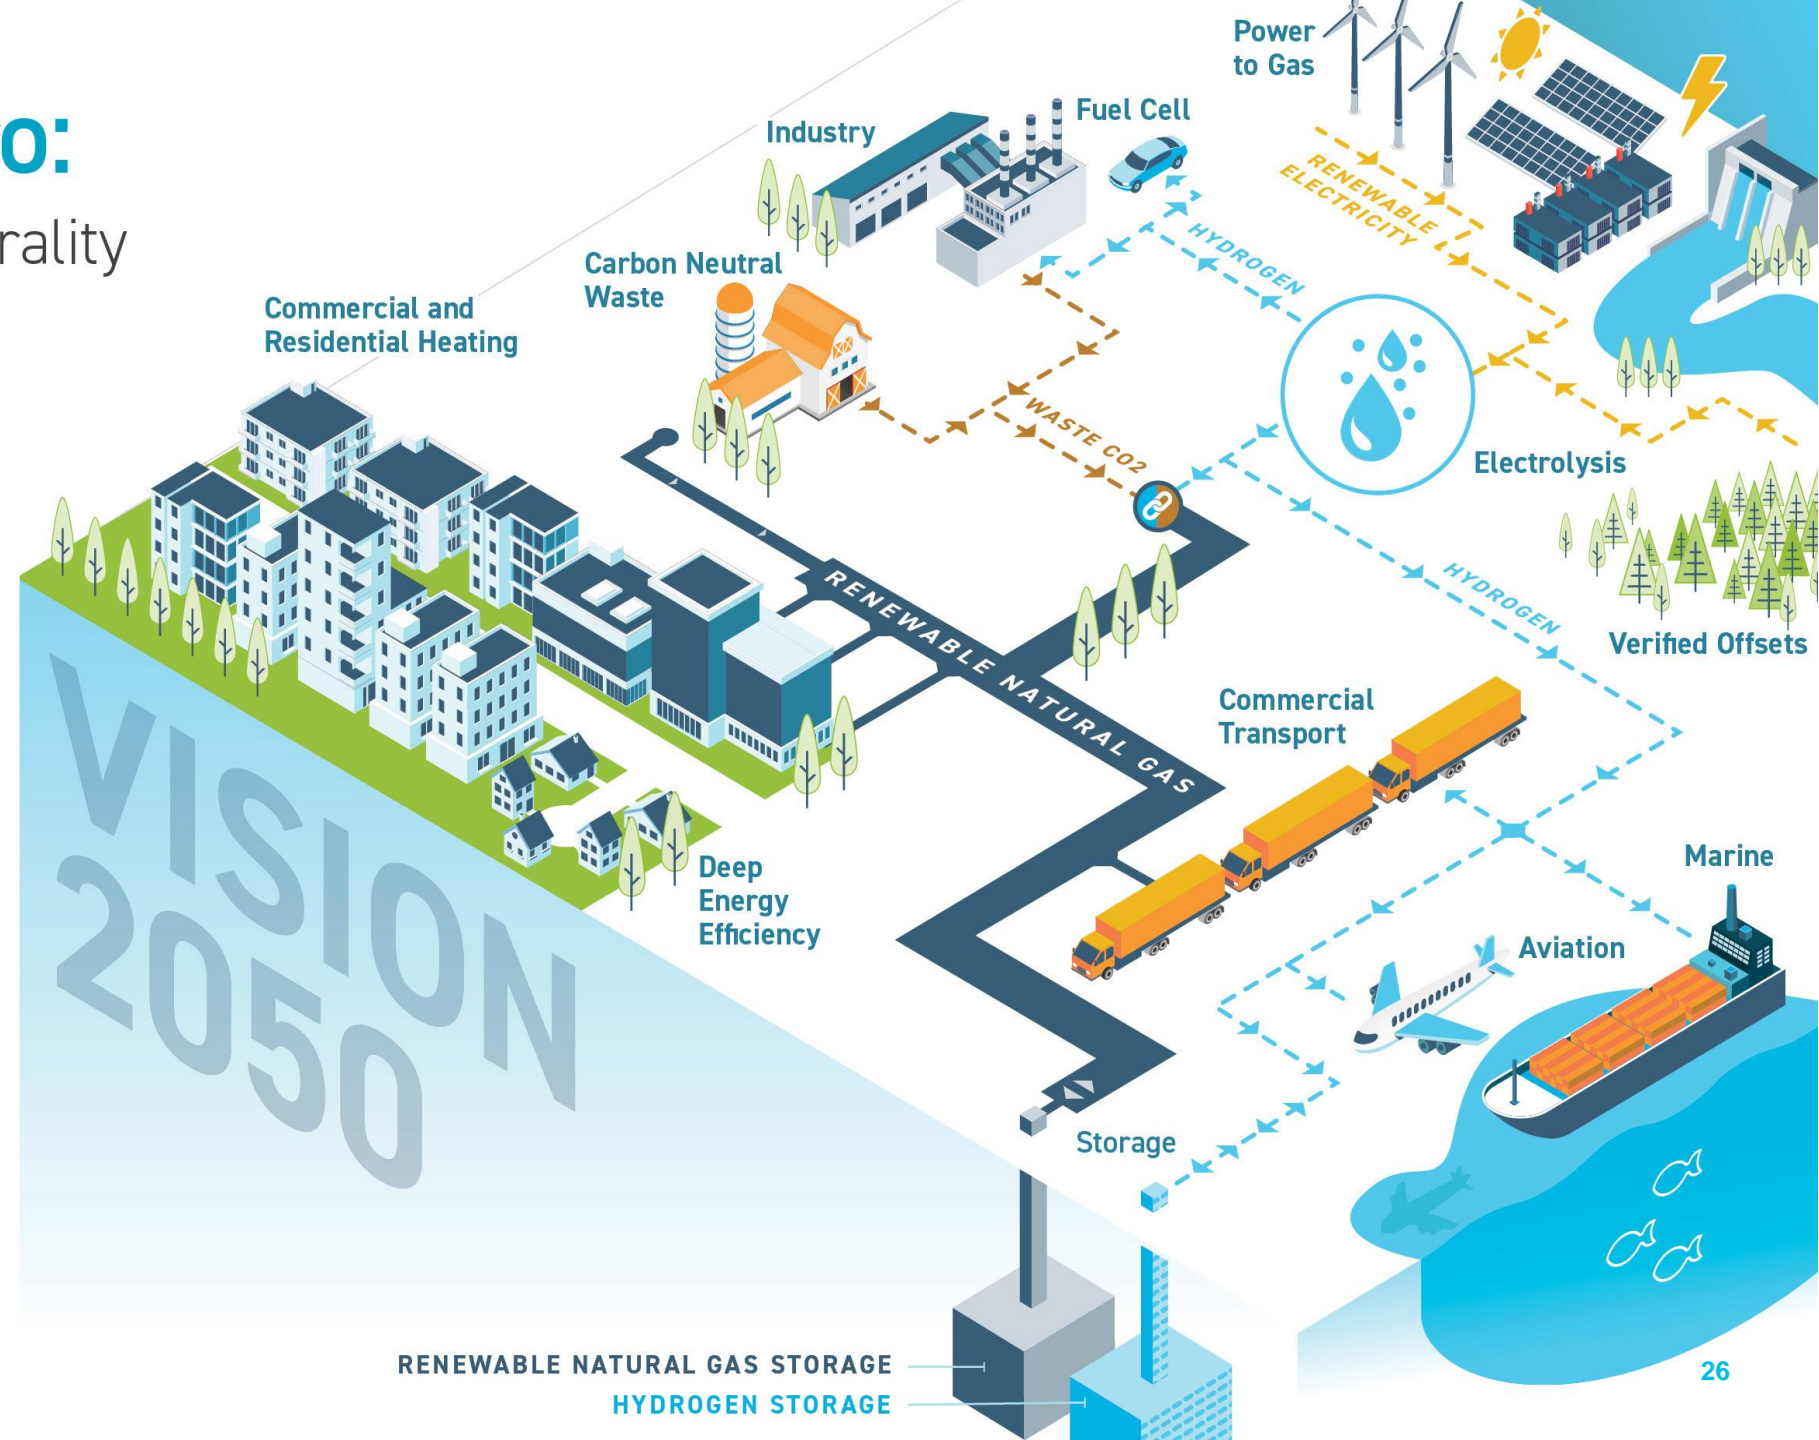

This marks 42% of savings toward goal, ahead of target pace.

2022 Source of Savings Mix

Destination Zero:

Our vision of carbon neutrality

A decarbonizing network:

- Renewable Natural Gas
- Hydrogen
- Waste CO₂
- Renewable Electricity

RENEWABLE NATURAL GAS STORAGE
HYDROGEN STORAGE

Destination Zero Analysis

- The next evolution in our thinking is an in-depth analysis, using a variety of assumptions, to illustrate possible scenarios to achieve carbon neutrality for energy provided by 2050
- Our analysis draws on proven approaches to serve existing and new customers as well as developments of policy support and continued evolution of technology
- Each of the three scenarios we explored incorporates varying applications of the following:
 - ✓ Enhanced energy efficiency,
 - ✓ Declining amounts of verified offsets, and
 - ✓ Lower carbon fuels such as RNG and hydrogen (along with small amounts of carbon capture)
- We expect our analysis and thinking to continue to evolve, but our vision remains to be a provider of net neutral energy by 2050

2050 POSSIBLE SCENARIOS

Percentage of GHG savings by source

Balanced

Balanced mix of renewable supply and demand-side measures with no offsets in 2050

Moderate Offset

Offsets in conjunction with mix of renewable supply and demand-side measures

RNG Constrained

Less RNG and no offsets in 2050 with emphasis on demand side measures and clean hydrogen

 % carbon capture/offsets cancelling out fossil emissions

 % that is renewable natural gas

 % that is clean hydrogen

RNG Projects Across North America

As of July 9, 2024

Groundbreaking RNG Legislation

- Oregon and Washington laws support gas utilities purchasing renewable natural gas (RNG)
 - Oregon Senate Bill 98 passed in 2019 and rulemaking completed in July 2020
 - Washington law (House Bill 1257: Clean Buildings Bill) passed in 2019
- Creates another path for RNG to become an increasing part of Pacific Northwest's energy supply
- SB 98 allows natural gas utilities to acquire and deliver RNG and hydrogen; HB 1257 allows this for RNG
- Oregon SB 98 sets voluntary RNG portfolio targets for Oregon's natural gas utilities and allows up to 5% of a utility's annual revenue requirement to be used to cover the incremental cost of RNG
- Allows for investments related to RNG infrastructure, including production facilities, cleaning and conditioning equipment, and pipeline interconnections
- Potential revenue source for communities to turn their waste into energy

Gas Utility RNG Contracts to Date

Procurement

(Pass-through Cost)

- **Anew LLC (formerly Element Markets)** – 0.7 million MMBtu from 2021 - 2023
- **Archaea** – up to 1 million MMBtu of RNG annually for a fixed fee for a period of 21 years beginning in 2022
- **BP Products North America** – 0.4 million MMBtu over a five-year period beginning in 2022

¹ Percentage is subject to change as projects are awarded, canceled or modified

Investments

(Rate Base)

Partnership with Tyson

- **Lexington Facility** – \$8M facility that commenced operation in Jan. 2022
 - **Dakota City Facility** – \$12M facility that commenced operations in April 2023
- Greater Wenatchee Facility** - planned facility that is could commence operations in December 2025

NW Natural currently has exclusive rights to purchase or develop RNG totaling about 2% of our annual sales volume for Oregon¹

Hydrogen & Research Projects

NW Natural Initiatives

Hydrogen Blend Testing – successfully blended 20% hydrogen at NW Natural’s state-of-the-art training facility

Turquoise Hydrogen Pilot Project – partnering with Modern Hydrogen in an effort to turn methane into clean hydrogen and solid carbon. Project was commissioned in December 2023

Carbon Capture, Use & Storage (CCUS) – Commercial customers are piloting CarbinX equipment, which is actively capturing carbon dioxide from existing boilers to reduce both energy use and greenhouse gas emissions

Hybrid Heating with Ground Source Heat Pumps – sponsoring a housing authority to pilot and install exterior ground loops and interior ground source heat pumps with gas furnaces. An additional way to support peak heating needs and reduce emissions

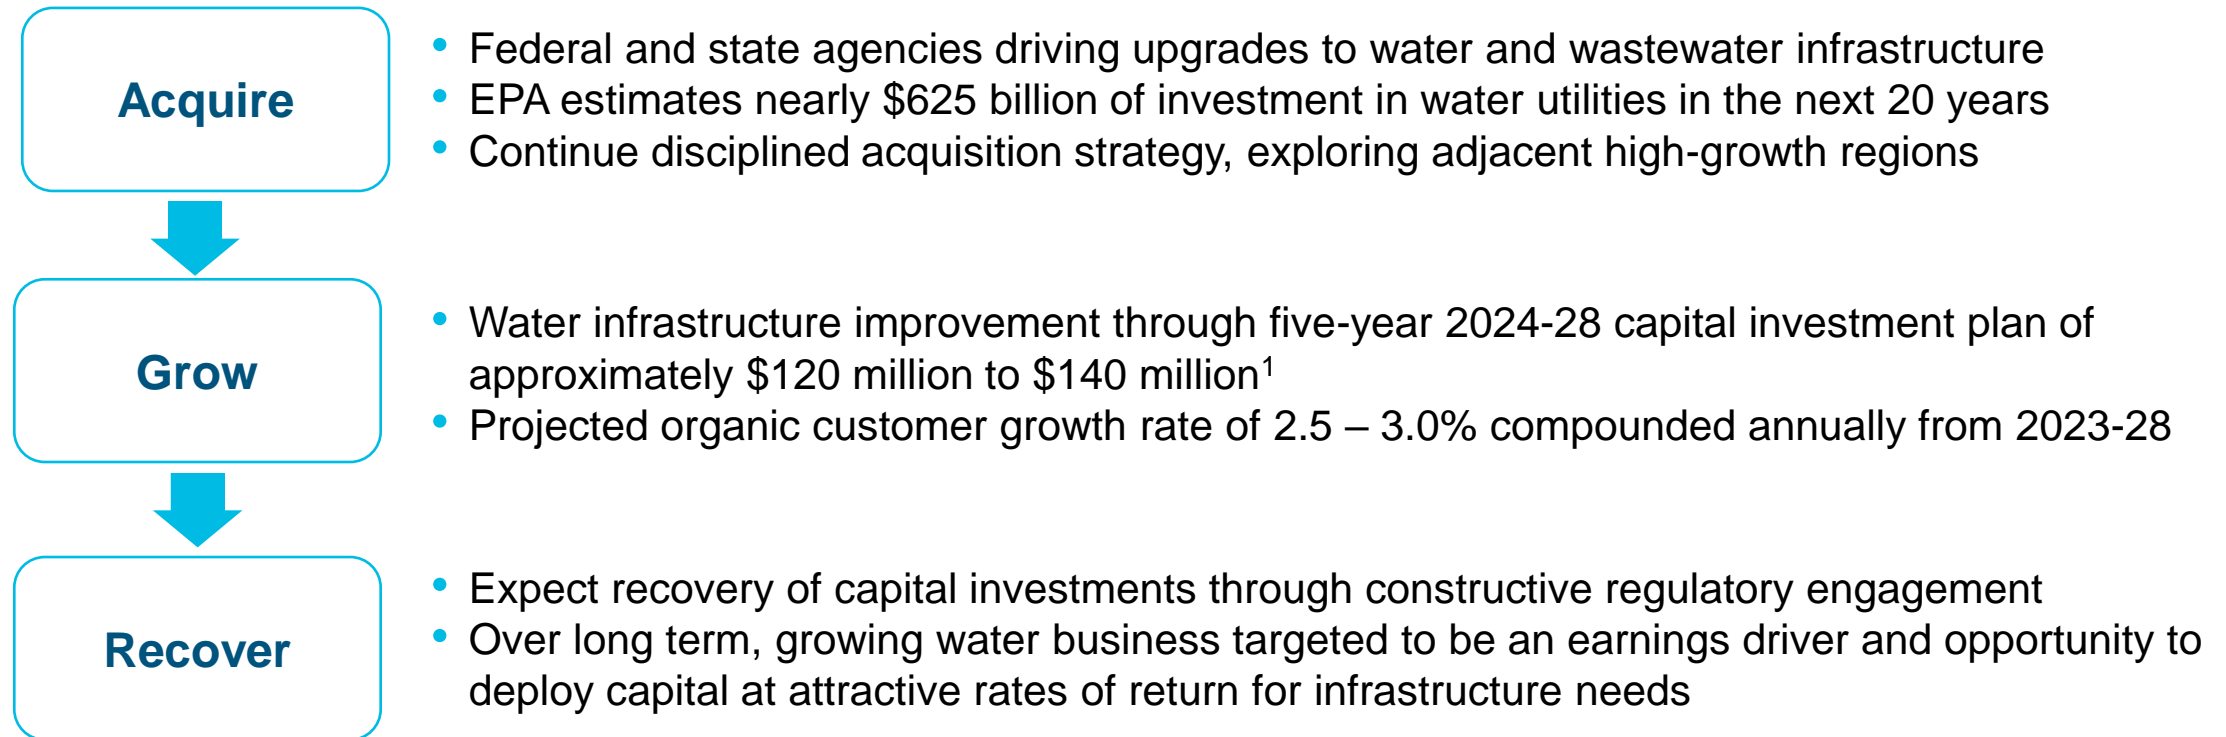

Modern Hydrogen project at NW Natural's Central Service Center

NW Natural Water

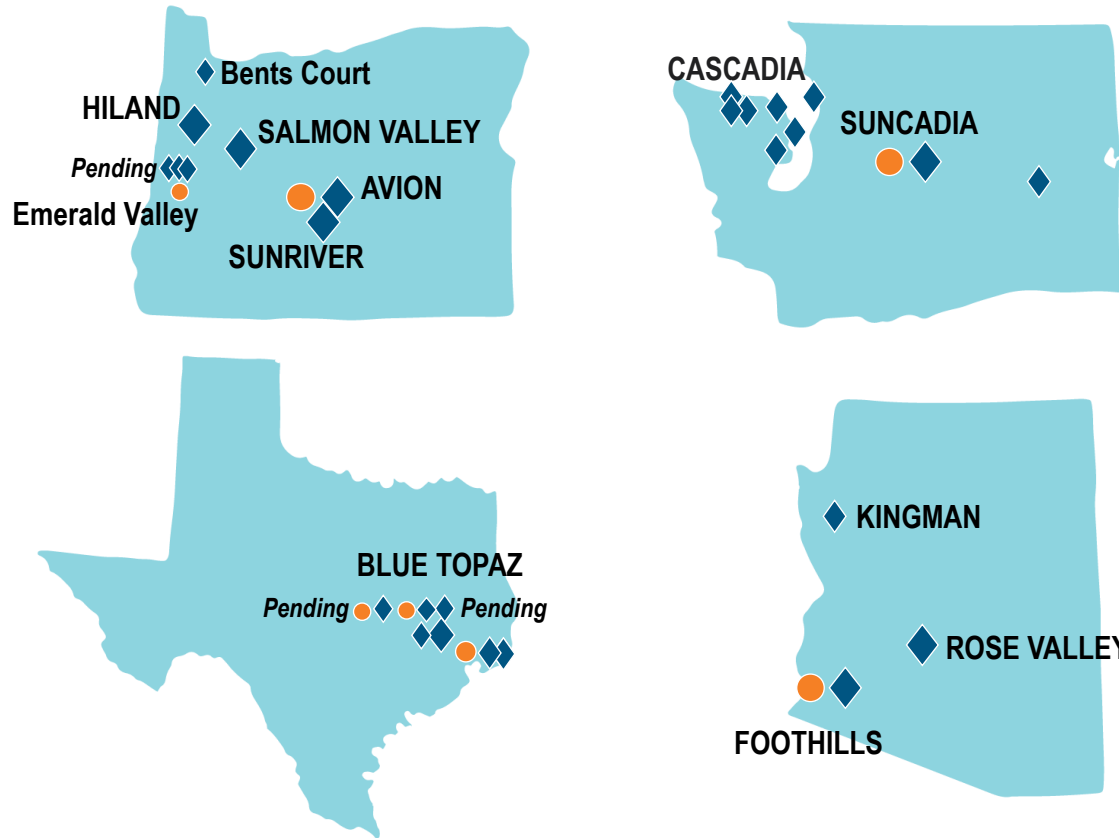

Water Investment Approach

The water and wastewater sector aligns well with NWN's conservative risk profile and offers diversification, stable cash flows, and substantial long-term investment opportunities

¹ The timing and amount of the core capital expenditures and projects for 2023 and the next five years could change based on regulation, growth, and cost estimates

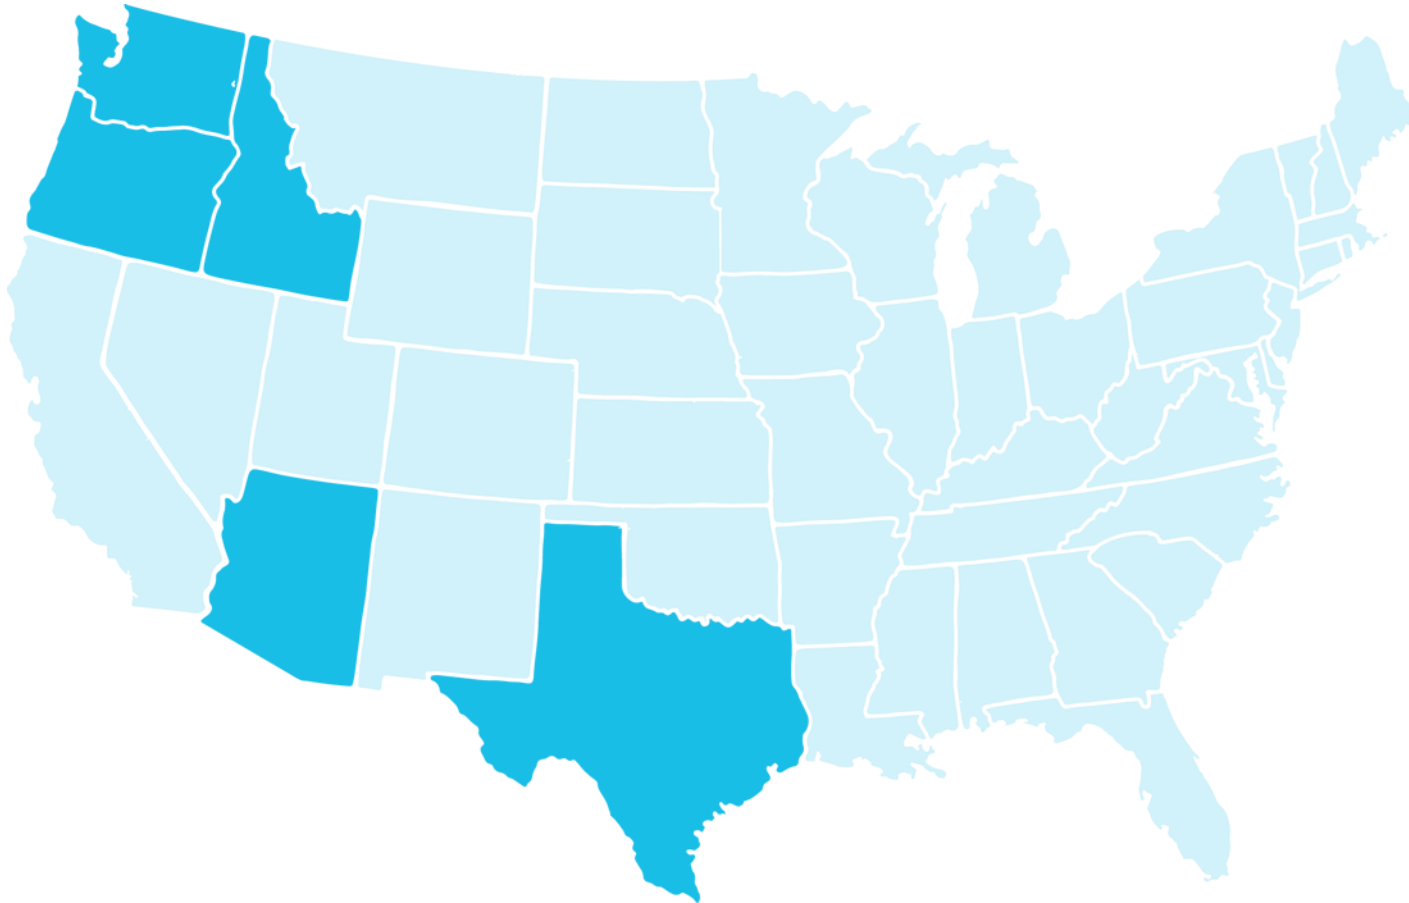

NW Natural Water Owned Connections at a Glance

	Closed	Pending ²	Total
People served ¹	187,300	6,600	193,900
Connections	75,500	2,600	78,100

¹ People served is based on estimated average household size for service territory
² Pending transactions are subject to customary closing conditions, including regulatory approvals. These transactions may be pending application to acquire and authorization to close from utility commission.

Water & Wastewater Acquisition Opportunities

	All Water and Wastewater Systems		Privately Owned Systems	
	Systems	Connections	Systems	Connections
Pacific Northwest	4,700	5.6M	2,760	511,000
Texas	5,739	17.3M	2,400	400,000
Arizona	1,100	3.0M	500	530,000
West of Mississippi	36,500	77.3M	16,700	9.1M
United States	71,325	202.0M	30,160	29.0M

 Source: Bluefield

Growing Water Systems

Investing in Safety, Reliability

- Five-year cap-ex expected to be ~\$120 million (2024-2028)
- Investments in system reliability
- Focus on information technology
- New wastewater treatment plant in Sunriver

Strong Customer Growth

- Acquired utilities in fast-growing areas
- Additional opportunities near existing footprint
- Including acquisitions closed in 2023, 12.7% customer growth last year
- Organic customer growth of 2.0% in 2023

Projected PP&E Growth¹

¹ PP&E growth for water utilities owned or pending acquisition as of 12/31/23

Projected Organic Customer Growth

Water Regulation

- Collaborative, transparent, and productive relationships with regulators
- Strong track record of approvals for acquisitions and constructive general rate cases

¹ Arizona Commission has a policy that allows for recognition of fair value for acquisitions when the acquirer has a history of purchasing and rehabilitating troubled water systems.

² Historic test year with the potential ability to adjust for certain future projects or events

³ Blue Topaz latest general rate case from 2008 and had an 11.91% ROR with 95% equity layer. This case was transferred from TCEQ (Texas Commission on Environmental Quality) to the PUCT (Public Utility Commission of Texas) in 2014.

O&M Services Business

Our Investment Goals

- A natural extension of its utility ownership business, NW Natural Water launched a water and wastewater services business in April 2023. Today we're serving 21,400 connections
- Provides support to water and wastewater system owners by leveraging shared personnel, technology and expertise at a reasonable cost
- Allows for disciplined expansion in an attractive growth market
- Provides a scalable opportunity in the Pacific Northwest
- High customer retention rate (90%+) with stable margins and cash flows. Realize earnings immediately without regulatory lag

Estimated Size of O&M Market
\$2.6B O&M contract services market today with growth expected

NW Natural Renewables

Competitive RNG Growth

The competitive RNG business represents a significant opportunity to add earnings and cash flows in a rapidly-growing market segment

Market Opportunity

- Achieve attractive returns as demand exceeds RNG supply
- Increasing demand for renewable fuels from:
 - Voluntary and mandated targets in the utility, commercial, industrial and transportation sectors
 - Partnership opportunities for a stable, long-term partner to develop and manage projects
- RNG production forecasted to grow in the next decade

Strategic Fit & Competitive Advantage

- Building on expertise and market knowledge
- Aligns with core competencies
 - Developing and managing critical distribution infrastructure
 - Environmental stewardship
 - Strong balance sheet/durability
 - Create long-term value for our stakeholders by decarbonizing businesses beyond NW Natural's gas utility
- RNG projects sized well for investment by NW Natural Renewables

Focused on securing a portfolio of primarily fixed-price contracts for long-term earnings growth

Primary Expected RNG Markets

Commercial, Industrial, and Institutional Customers

Gas Utilities

Natural Gas Vehicles

PRIMARY DRIVERS

Corporate sustainability goals including emission reductions

Meet voluntary emissions/renewable goals, including demand for RNG from customers, or statutory emissions targets/requirements

Meet obligations for low-emissions fuel in state and federal regulatory programs

REVENUE OPPORTUNITY

Long-term sales via bilateral contracts or through third-party marketers at prices above production costs

Long-term sales contracts to utilities at prices above production costs

Sales to vehicles to generate state and federal credits, which are sold to obligated parties for their compliance needs

POLICY DEPENDENCIES

Minimal

State-level renewable and carbon reduction policies

Federal and state-level clean fuel policies

NW Natural Renewables: EDL Project Update

- NW Natural Renewables' first projects are with EDL, a leading global producer of sustainable distributed energy
- Committed ~\$25 million per facility toward the development of two production facilities (\$50 million total) designed to convert landfill waste gases into RNG
- Contracted to take a 20-year supply of RNG produced by the facilities
- Separately contracted offtakes to sell an equivalent amount of fixed-volume, primarily fixed-price RNG supply to investment grade counterparties under long-term contracts
- Substantial completion milestone achieved at both projects in Q3 2024
- Both projects are expected to generate revenues and cash flows in Q4 2024

Conclusion

68 YEARS OF GROWING DIVIDENDS

1 of only 3 Companies on NYSE with this Legacy

Future dividends are subject to Board of Director discretion and approval

Investment Thesis

Stable and growing utility margins driven by the following targets over the next five years including:

- EPS growth of 4% – 6%¹
- Gas utility customer growth averaging 0.8%
- Gas utility cap-ex \$1.4 – \$1.6 billion with rate base growth of 5% – 7%²

Excellent operations and efficient cost structure

- Commitment to safety, reliability, and high-quality service
- Continued focus on efficient business operations

Long-term growth opportunities

- Water strategy provides earnings diversity
- Competitive RNG incremental earnings and cash flow growth

¹ EPS growth forecasted for period 2022 – 2027 compounded annually; EPS growth rate uses 2022 EPS of \$2.54 as base year

² Rate base growth forecasted for period 2023 - 2028

Stable and Growing Return Proposition

Appendix

Driving a Clean Energy Future

Natural Gas Supply Collaborative

- NW Natural is a member of Our Nation's Energy Future (ONE Future), a coalition representing more than 20% of the U.S. natural gas value chain and committed to reducing methane emissions through adopting science-based standards and best practices. ONE Future has exceeded its goal of reducing methane emissions across the natural gas value chain to below 1% by 2025.
- Methane Challenge Program partners are recognized by the EPA as leaders in reducing methane emissions. As a founding partner, NW Natural is adopting practices such as alternative blowdown methods. Instead of venting gas into the atmosphere when we depressurize pipelines, we flare gas or reroute it to stay on a pipeline—a process known as cross-compression. With these practices, we're able to reduce potential greenhouse gas emissions by 90% to as much as 100%. We also use line isolation and drawdown to reduce volume before venting. These are recognized as industry best practices.

- Northwest Energy Efficiency Alliance (NEEA) is a non-profit collaborative that works to advance energy efficiency on behalf of more than 13 million consumers in Oregon, Washington, Idaho and Montana. NEEA supports accelerated adoption of highly efficient space and water heat equipment designed to reduce carbon emissions. After a long history of success stories in the electric sector, NEEA began the nation's first natural gas market transformation effort in 2015. Holly Braun, Business Development Manager at NW Natural, currently serves as vice chair of NEEA's board of directors, which includes representatives of energy efficiency organizations, public interest groups and state governments.
- Through our partnerships with GTI Energy, Low Carbon Resources Initiative and Northwest Energy Efficiency Alliance we seek to transform the market for innovative products like gas heat pumps, net zero energy homes, fuel cells and other progressive energy-saving technologies. We co-founded the North American Gas Heat Pump Collaborative to support accelerated adoption of highly efficient space and water heat equipment that are designed to reduce carbon emissions.

- NW Natural is a member of the Coalition for Renewable Natural Gas, a member-led nonprofit representing nearly 300 companies, municipalities, universities, and organizations dedicated to advancing RNG through policy and education. NW Natural is also a member of the American Biogas Council, a national trade association representing the entire U.S. biogas industry and dedicated to maximizing the production and use of biogas from organic waste.

HYREADY

- HyReady is a worldwide collaboration developing research, best practices and practical standards for adding hydrogen into natural gas pipeline networks.
- Renewable Hydrogen Alliance, a cross-industry coalition that advocates for creating hydrogen from surplus renewable electricity as a critical step to reducing dependence on fossil fuels. The alliance has successfully backed legislation and policies in Oregon and Washington to advance the development and use of renewable hydrogen. NW Natural is one of five founding members.

Current Utility Commissioners

NW Natural Holdings Debt Maturity Profile

Debt Maturity Profile

- Interest rate volatility impact mitigated by predominately fixed-rate debt
- Manageable debt repayment schedule with no significant maturities in any particular year

Diverse Resource Portfolio

Gas Supply

- 60% supply from Canada
- 40% supply from the Rockies
- Natural gas serves territory through one bi-directional pipeline

LNG Peaking Facilities

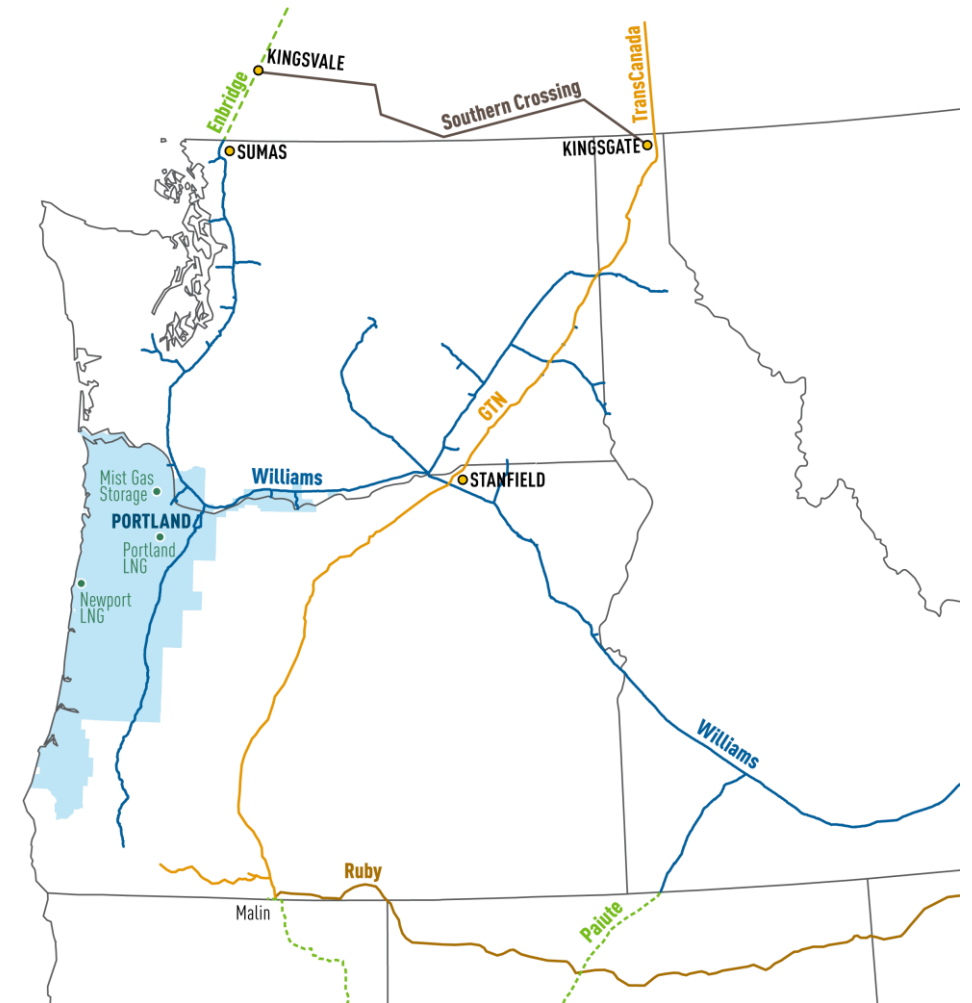

- Portland LNG – 0.6 Bcf
- Newport LNG – 1.0 Bcf

Mist Gas Storage Facility

- Valuable asset – limited storage in the Pacific Northwest
- 17.5 Bcf facility with 12.8 Bcf serving utility customers and 4.7 Bcf primarily under long-term contracts
- Utility can recall 4.7 Bcf to support customer demand

North Mist Storage Expansion

- 4.1 Bcf expansion serves a single customer under long-term contract

Mist Storage Facility

Overview

- In operation since 1989
- Storage capacity at Mist 17.5 Bcf
 - 12.8 Bcf Core Utility
 - 4.7 Bcf Interstate Storage Services

Unique, Valuable Asset

- Limited storage options in Pacific Northwest
- Part of utility's diverse, reliable gas supply strategy
- Utility can recall Interstate portion for Core Utility demand
- Optimize and share revenues with utility customers
- 4.7 Bcf under high-value contracts with the majority long-term

Mist Storage Capacity

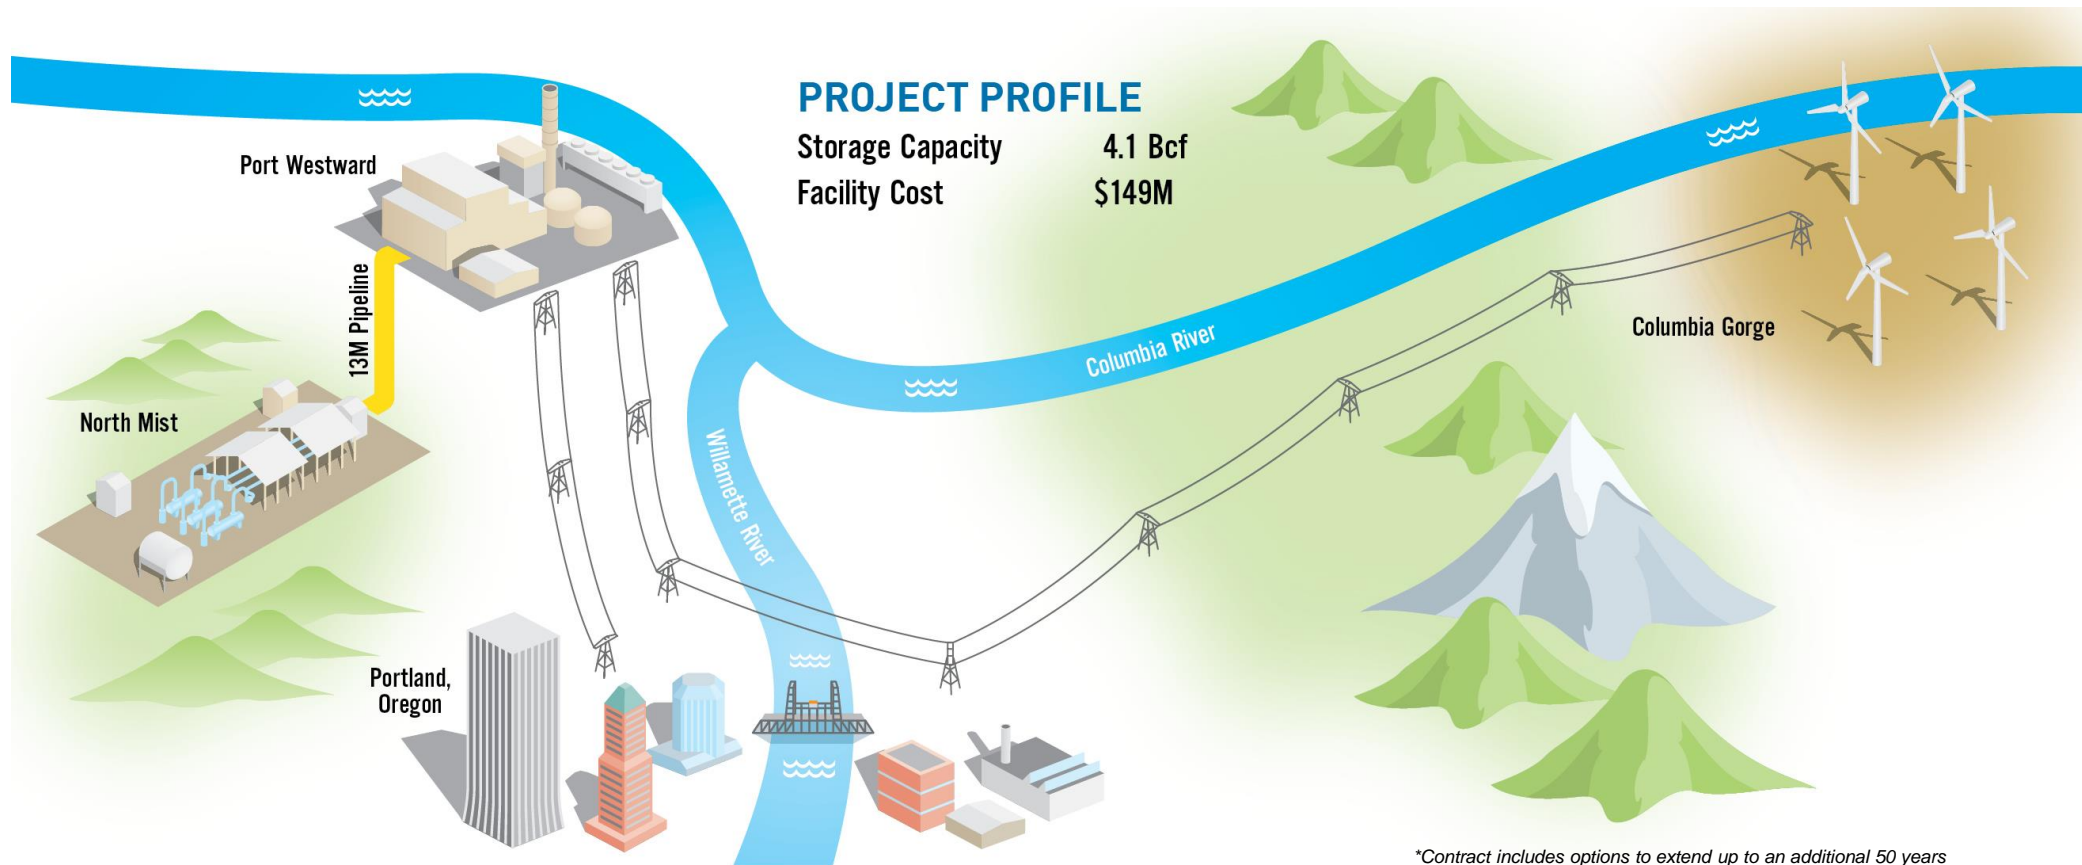

Mist Storage Deliverability

North Mist Facility

- Unique no-notice 24/7 storage service supporting gas-fired electric generating facilities that are integrating wind into energy generation mix
- \$149 million investment was immediately included in rate base once placed into service in May 2019
- Contracted under 30-year agreement with single-customer (Portland General Electric)*
