#### Note 1 - Summary of Significant Accounting Policies and Going Concern

#### A. Accounting practices

The financial statements of ProAssurance Specialty Insurance Company (the Company) are presented on the basis of accounting practices prescribed or permitted by the Vermont Department of Financial Regulation (the Department).

The Department recognizes only statutory accounting practices (SAP) prescribed or permitted by the State of Vermont for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under the Vermont insurance law. The National Association of Insurance Commissioners' (NAIC) Accounting Practices and Procedures Manual has been adopted as a component of prescribed or permitted practices by the State of Vermont.

Although the Vermont Commissioner of Insurance has the right to permit other specific practices that deviate from prescribed practices, no prescribed or permitted practices were used in the preparation of the accompanying financial statements.

The term "none" or "no significant change" is used in the following notes to indicate that the Company does not have any items requiring disclosure under the respective note.

- B. Use of estimates in the preparation of the financial statements No significant change.
- C. Accounting policy
  - (1) (5) No significant change.
  - (6) Loan-backed securities are reported at amortized cost provided that the SVO's designation is 1 or 2. If the SVO's designation is 3 or greater, the security is reported at the lower of amortized cost or fair value. The Company uses the prospective method to make valuation adjustments when necessary.
  - (7) (13) No significant change.
- D. Going Concern

Management has concluded that there is no doubt regarding the Company's ability to continue as a going concern.

Note 2 - Accounting Changes and Corrections of Errors - None.

Note 3 - Business Combinations and Goodwill - None.

Note 4 - Discontinued Operations - None.

#### Note 5 - Investments

- A. Mortgage loans, including mezzanine real estate loans None.
- B. Debt restructuring None.
- C. Reverse mortgages None.
- D. Loan-backed securities
  - (1) Prepayment assumptions for single-class and multi-class mortgage-backed/asset-backed securities were obtained from broker dealer survey values or internal estimates.
  - (2) The Company has recognized no other-than-temporary impairments of loan-backed securities for intent to sell or for inability to hold to recovery as of June 30, 2024.
  - (3) No loan-backed securities, held as of June 30, 2024, have incurred other-than-temporary impairments recognized in earnings based on the fact that the present value of projected cash flows expected to be collected was less than the amortized cost of the securities.
  - (4) For all loan-backed securities held at June 30, 2024 for which fair value is less than cost, but which have had no other-than-temporary impairment recognized in earnings, the following table displays balances, according to duration of the loss position:
    - a. The aggregate amount of unrealized losses:

1. Less than 12 Months \$ (34,646)

2. 12 Months or Longer \$ (6,833,996)

b. The aggregate related fair value of securities with unrealized losses:

Less than 12 Months \$ 7,362,699
 12 Months or Longer \$37,257,155

- (5) The Company used pricing services in determining the fair value of its loan-backed securities. In determining that a security is not other-than-temporarily impaired, securities are analyzed for future cash flows by using current and expected losses, historical and expected prepayment speeds (based on Bloomberg and broker dealer survey values), and assumptions about recoveries relative to the seniority or subordination in the capital structure. If the results indicate that the Company will be able to maintain the current book yield, no other-than-temporary impairment is warranted.
- E. Dollar repurchase agreements and/or securities lending transactions None.
- F. Repurchase agreements transactions accounted for as secured borrowing None.
- G. Reverse repurchase agreements transactions accounted for as secured borrowing None.
- H. Repurchase agreements transactions accounted for as a sale None.
- I. Reverse repurchase agreements transactions accounted for as a sale None.
- J. Real estate None.
- K. Low-income housing tax credits (LIHTC) None.
- L. Restricted assets No significant change.
- M. Working capital finance investments None.
- N. Offsetting and netting of assets and liabilities None.
- O. 5GI Securities None.
- P. Short sales None.
- Q. Prepayment penalty and acceleration fees No significant change.

#### Note 6 - Joint Ventures, Partnerships and Limited Liability Companies

Total statutory income taxes

- 1. The Company, the domestic entities listed in Schedule Y (except ProAssurance American Mutual, A Risk Retention Group), and segregated portfolio P18, a segregated portfolio cell of Inova Re Ltd., S.P.C., are included in the consolidated federal income tax return of ProAssurance Corporation, the ultimate parent.
- 2. Except for the segregated portfolio P18, the method of allocation among companies is subject to a written agreement, approved by the Board of Directors, whereby allocation is made based upon separate return calculations in proportion to the total positive separate company taxable income of the group. Segregated portfolio P18 is subject to a separate written agreement with ProAssurance Corporation whereby allocation is made based upon a calculation of its separate company taxable income and the prohibition against the consolidated group's use of the segregated portfolio cell's loss against the income of other group members.
- G. The Company believes it is reasonably possible that the liability related to any federal or foreign tax loss contingencies may change within the next twelve months. However, an estimate of the change cannot be made at this time.

- 2. Fair value measurements in (Level 3) of the fair value hierarchy None.
- 3. The Company's policy is to recognize transfers between levels at the end of the reporting period.
- 4. The Company values securities in the Level 1 category using unadjusted quoted prices for identical assets and liabilities in active markets accessible at the measurement date.

The Company values securities in the Level 2 category using market data obtained from sources independent of the reporting entity (observable inputs). Level 2 inputs generally include quoted prices in markets that are not active, quoted prices for similar assets or liabilities, and results from pricing models that use observable inputs such as interest rates and yield curves that are generally available at commonly quoted intervals.

The fair values for securities included in the Level 2 category have been developed by third party, nationally recognized pricing services. These services use complex methodologies to determine values for securities and subject the values they develop to quality control reviews. Management reviews service-provided values for reasonableness by comparing data among pricing services and to available market and trade data. Values that appear inconsistent are further reviewed for appropriateness. If a value does not appear reasonable, the valuation is discussed with the service that provided the value and would be adjusted, if necessary. No such adjustments have been necessary to date.

The Company values assets classified as Level 3 in the Fair Value Hierarchy using the Company's own assumptions about market participant assumptions based on the best information available in the circumstances (non-observable inputs). Level 3 inputs are used in situations where little or no Level 1 or 2 inputs are available or are inappropriate given the particular circumstances. Level 3 inputs include results from pricing models for which some or all of the inputs are not observable, discounted cash flow methodologies, single non-binding broker quotes and adjustments to externally quoted prices that are based on management judgment or estimation.

Additional information regarding the valuation methodologies used by the pricing services by security type is included in *C. Fair values of financial instruments* below.

- 5. Fair value of derivative assets and liabilities None.
- B. Additional fair value disclosures None.

The following methods are used to estimate fair value for the instruments included in the above table and for fair value measurements in the financial statements in the table *A1. Fair value measurements at reporting date*, above.

Cash equivalents in Level 1 are comprised of money market mutual funds that are reported at fair value using net asset value as a practical expedient as prescribed by the NAIC.

#### Level 2 Valuation Methodologies

Below is a summary description of the valuation methodologies primarily used by the pricing services for the bonds included in the Level 2 category, by security type:

- *U.S.* Government obligations, including treasury bills classified as cash equivalents and/or short term investments, are valued based on quoted prices for identical assets, or, in markets that are not active, quotes for similar assets, taking into consideration adjustments for variations in contractual cash flows and yields to maturity.
- *U.S. Government-sponsored enterprise obligations* are valued using pricing models that consider current and historical market data, normal trading conventions, credit ratings, and the particular structure and characteristics of the security being valued, such as yield to maturity, redemption options, and contractual cash flows. Adjustments to model inputs or model results are included in the valuation process when necessary to reflect recent events, such as regulatory, government or corporate actions or significant economic, industry or geographic events that would affect the security's fair value.

State and municipal bonds are valued using a series of matrices that consider credit ratings, the structure of the security, the sector in which the security falls, yields, and contractual cash flows. Valuations are further adjusted, when necessary, to reflect recent events such as significant economic or geographic events or rating changes that would affect the security's fair value.

Corporate debt consists primarily of corporate bonds, but also includes a small number of bank loans and certificates of deposit with original maturities greater than one year. The methodology used to value Level 2 corporate bonds is the same as the methodology previously described for U.S. Government-sponsored enterprise obligations. Bank loans are valued by an outside vendor based upon a widely distributed, loan-specific listing of average bid and ask prices published daily by an investment industry group. The publisher of the listing derives the averages from data received from multiple market-makers for bank loans.

Residential and commercial mortgage backed securities. Agency pass-through securities are valued using a matrix, considering the issuer type, coupon rate and longest cash flows outstanding. The matrix is developed daily based on available market information. Agency and non-agency collateralized mortgage obligations are both valued using models that consider the structure of the security, current and historical information regarding prepayment speeds, ratings and ratings updates, and current and historical interest rate and interest rate spread data. Evaluations of Alt-A mortgages include a review of collateral performance data, which is generally updated monthly.

Short term investments in Level 2 consists of short term corporate and government bonds purchased with less than one year remaining until maturity. The methodology used to value Level 2 short term investments is the same as the methodology previously described for U.S. Government-sponsored enterprise obligations.

## Level 3 Valuations

The Company values assets and liabilities classified as Level 3 in the Fair Value Hierarchy using the Company's own assumptions about market participant assumptions based on the best information available in the circumstances (non-observable inputs). Level 3 inputs are used in situations where little or no Level 1 or 2 inputs are available or are inappropriate given the particular circumstances. Level 3 inputs include results from pricing models for which some or all of the inputs are not observable, discounted cash flow methodologies, single non-binding broker quotes and adjustments to externally quoted prices that are based on management judgment or estimation.

#### Level 3 Valuation Processes

- Level 3 securities are priced by ProAssurance Group's Chief Investment Officer, who reports to ProAssurance Group's Chief Financial Officer.
- Level 3 valuations are computed quarterly. Prices are evaluated quarterly against prior period prices and the expected change in price.
- The Company's Level 3 valuations are not overly sensitive to changes in the unobservable inputs used. The
  securities noted in the disclosure are primarily investment grade debt where comparable market inputs are
  commonly available for evaluating the securities in question.

#### Level 3 Valuation Methodologies

Below is a summary description of the valuation methodologies primarily used by the pricing services for bonds included in the Level 3 category, by security type:

State and municipal bonds consists of auction rate municipal bonds valued internally using published quotes for similar securities or by using a model based on discounted cash flows using yields currently available on fixed rate securities with a similar term and collateral, adjusted to consider the effect of a floating rate and a premium for illiquidity.

Corporate debt consists of corporate bonds. Valuations are determined using dealer quotes for similar securities or discounted cash flow models using yields currently available for similar securities. Similar securities are defined as securities having like terms and payment features that are of comparable credit quality. Assessments of credit quality are based on nationally recognized statistical rating organization (NRSRO) ratings, if available, or are subjectively determined by management if not available.

Other asset-backed securities consists of securitizations of receivables valued using dealer quotes for similar securities or discounted cash flow models using yields currently available for similar securities.

- D. Items for which it is not practicable to estimate fair value None.
- E. Investments measured using the NAV practical expedient None.

#### Note 21 - Other Items

- A. Unusual or infrequent items None.
- B. Troubled debt restructuring: debtors None.
- C. Other disclosures

Agents' Balances Certification, Section 625.012(5), Florida Statutes

At June 30, 2024 the Company had admitted assets of \$1,927,651 in accounts receivable for amounts due from policyholders and agents. The Company routinely assesses the collectibility of these receivables and establishes an allowance for uncollectible amounts. There are no amounts due from "controlled" or "controlling" persons included in this balance.

- D. Business interruption insurance recoveries None.
- E. State transferable and non-transferable tax credits None.
- F. Subprime-mortgage-related risk exposure
  - 1. The Company defines subprime by the description of the underlying assets as provided by Bloomberg data, using a combination of: higher than average interest rates on underlying loans, credit scores, and high loan-to-value ratios.

- (3) The Company does not use protected cells as an alternative to traditional reinsurance.
- D. Uncollectible reinsurance None.
- E. Commutation of ceded reinsurance None.
- F. Retroactive reinsurance
  - (1) The Company entered into loss portfolio transfers with large healthcare organizations that cover a specific inventory of known claims plus future claims, all covered claims having been incurred by a healthcare organization prior to its acquisition. Under the agreement, the Company will direct and control the claims settlement processes. As the contract included both prospective coverage and retroactive coverage, the Company bifurcated the provisions of the contract, thereby accounting separately for each of the prospective and retroactive components. The retroactive portion of the two contracts totaled \$18,977,000, which was recorded as a retroactive insurance reserve.

Under the quota share reinsurance agreement between the Company and ProAssurance Casualty Company n/k/a ProAssurance Indemnity Company, Inc. (Indemnity), this retroactive coverage was ceded 100% to Indemnity. This cession was recorded as a retroactive insurance reserve ceded and reported as a contra-liability in the write-in line in accordance with statutory accounting guidance.
