John Bean Products Part of Competition at 2024 WorldSkills

Award-Winning Tru-Point Showcased in Global Finals

Lyon, France – Oct. 7, 2024 – John Bean® had several of its products, including the award-winning Tru-Point™ advanced driver assistance system (ADAS) calibration system, featured in the competition at the recent WorldSkills Lyon 2024 event held at the Eurexpo Lyon in France. *John Bean* was supporting Skill 33-Automotive Technology, which featured 36 competitors from five continents.

“We are honored that innovative John Bean equipment, such as Tru-Point, was included in the competition at WorldSkills,” said Roger Marti, senior director product management for Snap-on Equipment. “It was a great opportunity to share these industry-leading repair solutions with the next generation of automotive service professionals and demonstrate how John Bean enhances shop productivity and efficiency.”

A one-stop solution for ADAS calibration, [Tru-Point](#) uses highly accurate advanced camera technology, targets and top-of-the-line software to quickly uncover core ADAS-specific vehicle alignment issues, enabling users to perform precise ADAS calibrations. *Tru-Point* performs a check of the ADAS-related wheel alignment values and closely monitors each step of the setup procedure, ensuring that OEM safety specifications are met before an ADAS calibration is performed.

Two additional *John Bean* products were part of the competition: the 4-Post [JLF 4000](#) lift and the [V2380](#) imaging diagnostic wheel alignment system. The JLF 4000 lift provides a lifting capacity of 4,000 kg for wheel alignment of passenger cars, SUVs and transporters up to mid-size vans with a wheelbase range of 193-415 cm. The *John Bean* V2380 features a classic post and beam design and offers users productivity-boosting technology to give them the edge in performing efficient wheel alignment services.
