# Safe Harbor Statement and Non-GAAP Financial Measures

All statements in this communication, other than those relating to historical facts, are "forward-looking statements." Forward-looking statements can generally be identified by their use of terms such as "anticipate," "estimate," "believe," "expect," "could," "forecast," "may," "intend," "plan," "predict," "project," "will," or "would," and similar terms and phrases, including references to assumptions. Forward-looking statements are not guarantees of future performance and are subject to a number of assumptions, risks and uncertainties, many of which are beyond our control, which could cause actual results to differ materially from such statements. Forward-looking statements include, but are not limited to, statements about future strategic plans and future financial and operating results. Important factors that could cause actual results to differ materially from those presented or implied in the forward-looking statements include, without limitation: inflation, higher product costs or other expenses, including operational and administrative expenses; the impact of macroeconomic pressures and geopolitical trends, changes and events; a major loss of customers; loss or disruption of sources of supply; changes in customer or product mix; increased competitive pricing pressures; changes in third party practices regarding digital advertising; failure to enter into or sustain contractual arrangements on a satisfactory basis with group purchasing organizations; failure to develop, manage or implement new technology initiatives or business strategies, including with respect to Grainger's eCommerce platforms; failure to adequately protect intellectual property or successfully defend against infringement claims; fluctuations or declines in Grainger's gross profit margin; Grainger's responses to market pressures; the outcome of pending and future litigation or governmental or regulatory proceedings, including with respect to wage and hour, anti-bribery and corruption, environmental, regulations related to advertising, marketing and the Internet, consumer protection, pricing (including disaster or emergency declaration pricing statutes), product liability, compliance or safety, trade and export compliance, general commercial disputes, or privacy and cybersecurity matters; investigations, inquiries, audits and changes in laws and regulations; failure to comply with laws, regulations and standards, including new or stricter environmental laws or regulations; government contract matters; the impact of any government shutdown; disruption or breaches of information technology or data security systems involving Grainger or third parties on which Grainger depends; general industry, economic, market or political conditions; general global economic conditions including tariffs and trade issues and policies; currency exchange rate fluctuations; market volatility, including price and trading volume volatility or price declines of Grainger's common stock; commodity price volatility; facilities disruptions or shutdowns; higher fuel costs or disruptions in transportation services; outbreaks of pandemic disease or viral contagions; natural or human induced disasters, extreme weather and other catastrophes or conditions; effects of climate change; failure to execute on our efforts and programs related to environmental, social and governance matters; competition for, or failure to attract, retain, train, motivate and develop executives and key employees; loss of key members of management or key employees; loss of operational flexibility and potential for work stoppages or slowdowns if employees unionize or join a collective bargaining arrangement; changes in effective tax rates; changes in credit ratings or outlook; Grainger's incurrence of indebtedness or failure to comply with restrictions and obligations under its debt agreements; and other factors that can be found in our filings with the Securities and Exchange Commission, including our most recent periodic reports filed on Form 10-K and Form 10-Q, which are available on our Investor Relations website. Forward-looking statements are given only as of the date of this communication and we disclaim any obligation to update or revise any forward-looking statement, whether as a result of new information, future events or otherwise, except as required by law.

Additional information relating to certain non-GAAP financial measures referred to in this presentation is available in the appendix to this presentation, including: adjusted return on invested capital; adjusted gross profit, adjusted operating earnings, adjusted EBITDA; adjusted SG&A; daily sales; daily, organic daily sales; constant currency sales; daily, organic constant currency sales; net leverage ratio; and free cash flow. This communication also includes certain non-GAAP forward-looking information (including, but not limited to slides 25-26 & 33). The Company believes that a quantitative reconciliation of such forward-looking information to the most comparable financial measure calculated and presented in accordance with GAAP cannot be made available without unreasonable efforts. A reconciliation of these non-GAAP financial measures would require the Company to predict the timing and likelihood of future restructurings, asset impairments, and other charges. Neither these forward-looking measures, nor their probable significance, can be quantified with a reasonable degree of accuracy. Accordingly, the most directly comparable forward-looking GAAP measures are not provided. Forward-looking non-GAAP financial measures provided without the most directly comparable GAAP financial measures may vary materially from the corresponding GAAP financial measures.

# Our Purpose:

We Keep the World Working®

A leading broad line distributor of MRO products and services determined to Keep the World Working® through innovative technology solutions and deep customer relationships

**1927** 

Company founded

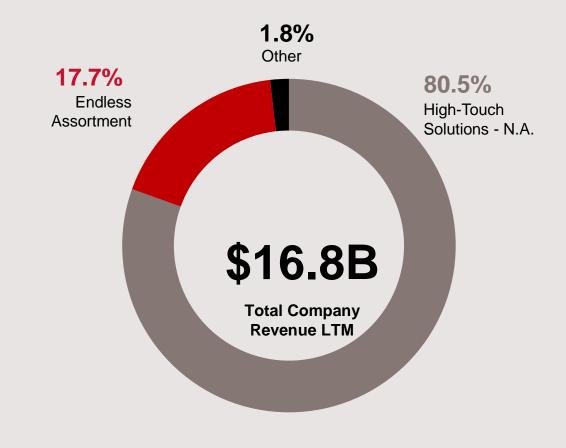

# Largest

MRO distributor in North America

On-track for

# MRO customers have two basic needs ...

# Customers looking for a partner that can deliver

# Flawless experience

- Have what I need
- Make it easy to find
- Get it to me fast, accurately
- Make it easy for me to receive, pay, return

# Tangible value

- Know my business
- Simplify my purchasing process
- Provide tangible cost savings
- ✓ Help me reduce my inventory

# ... but these needs show up differently across customers

# Large customers with high complexity

E.g., a global manufacturer looking for a multi-channel, end-to-end MRO partner

# Small customers with low complexity

E.g., a local job shop looking for a one-stop, online platform

# Our two go-tomarket models serve these varied customers needs

## **HIGH-TOUCH SOLUTIONS N.A.**

### **CUSTOMER TYPE**

Large to mid-size customers with highly complex operations/processes

### **SEGMENT VALUE PROPOSITION**

Compelling value-added MRO solutions delivered through our team of specialists and curated digital experiences

### **PRIMARY GEOGRAPHIES**

North America

# ENDLESS ASSORTMENT

### **CUSTOMER TYPE**

Smaller customers with less complex operations/processes

### **SEGMENT VALUE PROPOSITION**

Business purchasing made easy through a streamlined and transparent online relationship that provides access to everything a customer needs

### **PRIMARY GEOGRAPHIES**

Japan, U.S.

# Each segment has a unique delivery model ...

- (3) Based on U.S. selling days: 256 and 254 selling days in 2024 and 2023, respectively.
- (4) Reflects the divestiture of Grainger's subsidiary, E & R Industrial Sales, Inc., completed in the fourth quarter of 2023.
- (5) Excludes the impact of year-over-year foreign currency exchange rate fluctuations.

# Senior Note Debt Maturity Schedule

The first material debt maturity is 2025 with majority of debt not due until 2045 and beyond

# **Definitions & Calculations**

### Basis of presentation:

The Company has a controlling ownership interest in MonotaRO, which is part of our Endless Assortment segment. MonotaRO's results are fully consolidated, reflected in U.S. GAAP, and reported one-month in arrears. Results will differ from MonotaRO's externally reported financials which follow Japanese GAAP.

### Non-GAAP financial measures:

The Company believes these non-GAAP financial measures provide meaningful information to assist investors in understanding financial results and assessing prospects for future performance as they provide a better baseline for analyzing the ongoing performance of its business by excluding items that may not be indicative of core operating results.

"Adjusted gross profit", "adjusted SG&A", "adjusted operating earnings", "adjusted EBITDA", "adjusted EPS (diluted)"— exclude certain non-recurring items, like restructuring charges, asset impairments, gains and losses associated with business divestitures and other non-recurring, infrequent or unusual gains and losses (together referred to as "non-GAAP adjustments"), from the Company's most directly comparable reported U.S. GAAP figures (reported gross profit, SG&A, operating earnings, net earnings and EPS). The Company believes these non-GAAP adjustments provide meaningful information to assist investors in understanding financial results and assessing prospects for future performance as they provide a better baseline for analyzing the ongoing performance of its business by excluding items that may not be indicative of core operating results.

"Adjusted return on invested capital" (ROIC) — is calculated using the Company's annualized adjusted operating earnings (defined above) divided by average net working assets for the period. Average net working assets is calculated using a two-point average for Q1, a three-point average for Q2, a four-point average for Q3 and a five-point average for Q4. Net working assets are working assets minus working liabilities and defined as follows: working assets equal total assets less cash equivalents, deferred and prepaid income taxes and operating lease right-of-use assets plus any LIFO reserves. Working liabilities are the sum of trade payables, accrued compensation and benefits, accrued contributions to employees' retirement savings plans and accrued expenses. The Company believes the presentation of adjusted ROIC provides useful information regarding how effectively the Company is using capital to generate financial returns.

"Free cash flow" (FCF) — is calculated using total cash provided by operating activities less capital expenditures. The Company believes the presentation of FCF allows investors to evaluate the capacity of the Company's operations to generate free cash flow.

"Net leverage ratio" — is calculated by dividing the Company's net debt (total debt outstanding less debt issuance costs less cash and cash equivalents) by adjusted EBITDA. Adjusted EBITDA is defined as EBITDA less the Company's non-GAAP adjustments for the last twelve months. The Company believes the presentation of its net debt to adjusted EBITDA ratio provides useful information regarding the Company's liquidity and leverage.

"Daily sales" — refers to net sales for the period divided by the number of U.S. selling days for the period.

"Daily, constant currency sales" — refers to the daily sales adjusted for changes in foreign currency exchange rates.

"Daily, constant currency sales in local days" — refers to daily sales adjusted for changes in foreign currency exchange rates and local selling days for the business unit.

"Daily, organic sales" — refers to daily sales excluding the net sales of certain divested businesses in the comparable prior year period post date of divestiture.

"Daily, organic constant currency sales" — refers to daily sales excluding the sales of certain divested businesses in the comparable prior year period post date of divestiture and changes in foreign currency exchange rates.

"Daily, organic constant currency sales in local days" — refers to daily sales excluding the net sales of certain divested businesses in the comparable prior year period post date of divestiture, changes in foreign currency exchange rates and local selling days for the business unit.

"Foreign currency exchange" — impact is calculated by dividing current period local currency daily sales by current period average exchange rate and subtracting the current period local currency daily sales divided by the prior period average exchange rate.

"U.S. market outgrowth" — a relative metric using HTS - U.S. daily, organic sales growth less estimated U.S. MRO market growth. U.S. MRO market growth is based on Company estimates using a compilation of IP - NAICS Manufacturing sub-index (volume component) and PPI – Final Demand, Private Capital sub-index (price component) as the primary inputs.

Note: All adjustments to reported results apply to SG&A costs, unless otherwise noted. Business divestiture adjustments above reflect the loss (gain) on the divestiture of E & R Industrial Sales, Inc. (E&R) (Q4 2023), Cromwell's enterprise software business (Cromwell's subsidiary) (Q4 2022), Grainger China (Q3 2020) and Fabory (Q2 2020). For further detail on Grainger's restructuring and impairment charges recorded in 2020 and 2019, refer to Grainger's 2020 Form 10-K filed on February 24, 2021. "LTM" represents the last twelve months ending June 30,

- (1) Total Company includes Grainger's other businesses that do not meet the criteria of a reportable segment.
- (2) Reflects restructuring costs incurred in the second quarter of 2024 of \$15M and \$1M in Grainger's HTS-N.A. segment and Other businesses, respectively.

Note: All adjustments to reported results apply to SG&A costs, unless otherwise noted. "LTM" represents the last twelve months ending June 30, 2024.

- (1) See slide 38 for segment impact and a description of Grainger's pretax earnings adjustments as well as a reconciliation of adjusted operating earnings to its directly comparable GAAP measure.
- (2) Reflects one-time tax benefits recognized upon the divestiture of certain businesses recorded in the respective period of divestiture as noted above.
- (3) Adjusted annualized ROIC is calculated using the Company's annualized operating earnings. Annualized operating earnings are calculated by multiplying the YTD average daily operating based off U.S. selling days by the total U.S. selling days in the full year period.
  - Defined as sum of trade accounts payables, accrued compensation and benefits, accrued contributions to employee retirement savings plans and accrued expenses.
