

West Pharmaceutical Services, Inc. Animal Testing Policy Statement

Commitment

West is committed to conducting its business ethically in compliance with all applicable laws, rules and regulations and meeting its obligations to its shareholders. This commitment is embodied in our Code of Conduct and reiterated here.

West is committed, where permitted by applicable legal requirements, to reducing, refining or replacing animal testing.

West is committed to fully complying with the laws, rules and regulations of the countries where we operate. West Team Members, suppliers and business partners are responsible for complying with all applicable laws, rules, regulations and company policies.

Policy Obligations

West designs, manufactures and provides high-quality products that are safe and effective for their intended use.

West adheres to regulatory and generally accepted good manufacturing and laboratory practices, and quality system requirements.

West does not conduct live animal testing.

At times, regulatory, compendia and safety standards require us to utilize animal tissues in the testing of our products. When animal testing must be undertaken to comply with these requirements, West contracts with a third-party testing service provider certified by the American Association for Accreditation of Laboratory Animal Care (AAALAC), United States Department of Agriculture (USDA).

Consistent with the West Code of Conduct, team members are encouraged to identify and improve testing practices (including animal testing practices) that would not impair product quality, or safety.
