IMPORTANT NOTICE:

Statements included herein may constitute “forward-looking statements,” which may relate to future events or the future performance or financial condition of Ares Capital Corporation (“ARCC”), its investment adviser Ares Capital Management LLC (“ACM”), a subsidiary of Ares Management Corporation (“Ares Management”), or of Ares Management. These statements are not guarantees of future results or financial condition and involve a number of risks and uncertainties. Actual results and conditions may differ materially from those in the forward-looking statements as a result of a number of factors, including those described from time to time in the filings of ARCC and Ares Management with the Securities and Exchange Commission (“SEC”).

The information contained in this presentation is summary information that is intended to be considered in the context of the SEC filings of ARCC and Ares Management and other public announcements that ARCC or Ares Management may make, by press release or otherwise, from time to time. Neither ARCC nor Ares Management undertakes any duty or obligation to publicly update or revise the forward-looking statements or other information contained in this presentation. These materials contain information about ARCC, ACM and Ares Management, and certain of their respective personnel and affiliates, information about their respective historical performance and general information about the market. You should not view information related to the past performance of ARCC, ACM or Ares Management or information about the market, as indicative of future results, the achievement of which cannot be assured.

Nothing in these materials should be construed as a recommendation to invest in any securities that may be issued by ARCC or Ares Management or as legal, accounting or tax advice. None of ARCC, ACM, Ares Management or any affiliate of ARCC, ACM or Ares Management makes any representation or warranty, express or implied, as to the accuracy or completeness of the information contained herein and nothing contained herein shall be relied upon as a promise or representation whether as to the past or future performance. Certain information set forth herein includes estimates and projections and involves significant elements of subjective judgment and analysis. Further, such information, unless otherwise stated, is before giving effect to management and incentive fees and deductions for taxes. No representations are made as to the accuracy of such estimates or projections or that all assumptions relating to such estimates or projections have been considered or stated or that such estimates or projections will be realized.

These materials may contain confidential and proprietary information, and their distribution or the divulgence of any of their contents to any person, other than the person to whom they were originally delivered and such person's advisers, without the prior consent of ARCC, ACM or Ares Management, as applicable, is prohibited. You are advised that United States securities laws restrict any person who has material, non-public information about a company from purchasing or selling securities of such company (and options, warrants and rights relating thereto) and from communicating such information to any other person under circumstances in which it is reasonably foreseeable that such person is likely to purchase or sell such securities. You agree not to purchase or sell such securities in violation of any such laws.

These materials are not intended as an offer to sell, or the solicitation of an offer to purchase, any security, the offer and/or sale of which can only be made by definitive offering documentation. Any offer or solicitation with respect to any securities that may be issued by ARCC, Ares Management or any of their affiliates will be made only by means of definitive offering memoranda or an effective registration statement, which will be provided to prospective investors and will contain material information that is not set forth herein, including risk factors relating to any such investment.

Risk Factors

An investment in a fund managed by Ares Management, strategy, account or vehicle entails a significant degree of risk and, therefore, should be undertaken only by investors capable of evaluating the risks of that investment and bearing the risks it represents. General risks about making an investment are provided below. This is a non-exhaustive list of risk factors and conflicts of interest that should be considered in evaluating before making an investment. Investors should review a more complete list of risks, conflicts and or other considerations as described in offering documentation involved in connection with making an investment. Prospective investors should carefully review that additional information for other risks regarding such an investment.

No Assurance of Investment Return

Neither ARCC, ACM or Ares Management can provide assurance that it will be able to choose, make and/or realize investments in any particular company, portfolio of companies or asset. Further, there can be no assurance that ARCC will be able to generate returns for its investors or that the returns will be commensurate with the risks of investing in the types of companies, assets and transactions described. A prospective investor could lose the entire amount of its investment, and therefore an investor should only invest if the investor can withstand a total loss of its investment.

Past Performance Not Indicative of Future Results

Past performance may be not indicative of the future results that ARCC will achieve.

Valuation of Investments

A vast majority of ARCC's portfolio is expected to be in private investments that will be valued by the manager given the lack of public market information. As such, the fair value of such investments may not be readily determinable. The investments are generally expected to be valued at a fair value as determined in good faith and in accordance with U.S. generally accepted accounting principles. The types of factors that may be considered in valuing such investments include any restrictions on the marketability of such investments, the lack of a market for such investments, the control premium if any associated with such investments, the anticipated impact of immediate sale, the length of time before any such sales may become possible and the cost and complexity of any such sales and other relevant factors. Because such valuations are inherently uncertain, may fluctuate over short periods of time and may be based on estimates, the manager's determinations of fair value may differ materially from the values that would have been used if a ready market for these investments existed and from valuations of third parties and may differ materially from the values that ARCC may ultimately realize.

Allocation of Investment Opportunities

Certain investment opportunities appropriate for ARCC may also be appropriate for other funds managed by Ares Management or strategies, including those funds or strategies not within the same investment team and can range across the Ares Management investment platform. It is generally intended that, subject to Ares Management's allocation policy, ARCC and other Ares Management funds or strategies, as applicable, which share common investment opportunities as determined in the sole discretion of the manager, allocate over time in a fair and equitable manner, taking into account relevant facts and circumstances and to the extent practicable, including but not limited to, pro-rata based on available capital, subject to the investment objectives, investment restrictions, liquidity, available capital, remaining investment period, leverage, diversification and other limitations applicable to ARCC and such other Ares Management funds or strategies and as may otherwise be agreed by the respective Investment Committee of such funds or strategies. There can be no assurance that proportional allocations between ARCC and any such other Ares Management funds or strategies will be achieved.

Ares Management and its affiliates may, from time to time, be presented with investment opportunities that fall within ARCC's investment objectives and the investment objectives of one or more other Ares Management funds or strategies. While Ares Management will seek to manage such conflicts of interest in good faith, there may be situations in which the interests of ARCC with respect to a particular investment or other matter conflict with the interests of one or more of the other Ares Management funds and strategies. Neither the manager or Ares Management has any affirmative obligation to offer any investments to a particular fund strategy, or to inform the respective fund or strategy before offering investments to any other Ares fund or strategy.

Conflicts of Interest

Ares Management manages various funds and strategies and the management of these funds and strategies can give rise to conflicts of interest between the investors of a single fund or strategy and differing fund or strategy. Because Ares Management provides concurrent advisory services to our investors for which the investment mandates, compensation and fee arrangements (including with respect to performance fees and fee offsets) and other circumstances differ from strategy to strategy, the potential for Ares Management to receive greater fees from certain funds or strategies creates a potential conflict of interest with respect to the allocation of investment opportunities, as funds or strategies that pay higher fees may create incentives to direct investment ideas to, and/or to allocate investments in favor of such a fund or strategy. In addition, Ares Management, from time to time, also enters into accounts directly or indirectly with single or multiple investors that commit significant capital into a particular fund or strategy and or across the broader Ares Management platform. Such arrangements often include Ares Management granting certain preferential terms to these specific investors, including co-investment rights, a waiver or reduction of management fees or performance fees or carried interest, a blended management fee, and/or performance fee or carried interest rates that are lower than those applicable to respective fund or strategy in which those investors are currently invested.

Strong Coverage Ratios

» ARCC noteholders may benefit from conservative liability structure and significant unencumbered assets

Strong Asset Coverage for Unsecured Notes^{1*}

Significant Fixed Charge Coverage from Earnings²

Note: The use of leverage magnifies the potential for gain or loss on the amount invested and may increase the risk of investments.

1. Calculated as cash and cash equivalents plus investments at fair value pledged to secured facilities and SBA debentures plus unencumbered investments at fair value less debt outstanding in secured facilities, all divided by unsecured notes outstanding. As of the end of each given period.
2. Calculated as the ratio of earnings to fixed charges excluding total unrealized and realized gains/(losses) where earnings represent net investment income excluding interest and facility fees, income taxes and capital gains incentive fees accrued in accordance with GAAP, and fixed charges represent interest and facility fees. As of the end of each given period.

Differentiated Approach

Pro-active portfolio management approach allows us to seek most favorable outcomes that we believe ultimately leads to stronger returns

Focus on **larger, franchise businesses** that we believe will be resilient through market cycles

Focus on **lead agent** positions allows us the ability to positively influence outcomes

In-house **restructuring capabilities** with strong track record and limited loss rates

Deep sources of liquidity provide ability to be **patient** which we believe leads to better recoveries

Since inception, we have realized total proceeds on non-accrual investments equal to ~90% of the capital extended²

Past performance is not indicative of future results. All investments involve risk, including the loss of principal.

Rigorous Underwriting and Credit Management

» Our in-depth process typically spans several months, allowing for thoughtful decision making

Ares' Approach:²

- Seek to invest in leading, non-cyclical businesses with attractive growth prospects and high free cash flows
- Use direct origination and scale to provide greater influence on loan structures to maintain high selectivity
- Seek to be the lead lender with voting control to have the ability to impact outcomes
- Use incumbent positions to support growth of leading portfolio companies and to help enhance credit quality
- Be proactive managing investments and use our robust process to help preserve capital and pursue value

1. Not every investment meets each of the criteria.

2. For illustrative purposes only. Subject to change at any time.

Benefits of BDC Structure

» We believe creditors benefit from the leverage restrictions and diversification requirements of the BDC/RIC structure

BDCs are closed-end investment companies regulated by the SEC

- Created to encourage investment in small and middle market companies
- As of September 30, 2024, there were 52 publicly listed/active BDCs with a total combined market capitalization of \$71.7 billion¹
- Make debt and equity investments with ability to invest across a company's capital structure
- Must generally invest at least 70% of assets in U.S. private companies or U.S. public companies with market capitalizations under \$250 million

The BDC/RIC structure provides limitation on leverage and requires portfolio diversification

- Portfolio must be well diversified
 - No single investment can account for more than 25% of total assets
 - At least 50% of total assets must be comprised of individual holdings of less than 5% of total assets each
- ARCC has an asset coverage ratio requirement of at least 150% (maximum debt to equity of approximately 2:1) in order to borrow or pay dividends
- Required to pay at least 90% of investment company taxable income as dividends to shareholders to qualify as a Registered Investment Company
 - Portfolio must generate sufficient cash flows to pay interest as well as dividends to equity investors junior to debt holders

Ares Capital Corporation is the Largest Publicly Traded BDC²

Diversification does not assure profit or protect against market loss.

See Note 13 to Ares Capital's consolidated financial statements included in the annual report on Form 10-K for the year ended December 31, 2020 for information regarding the Ares Reimbursement.
2. Core Earnings is a non-GAAP financial measure. Core Earnings is the net increase (decrease) in stockholders' equity resulting from operations, and excludes net realized and unrealized gains and losses, any capital gains incentive fees attributable to such net realized and unrealized gains and losses and any income taxes related to such net realized gains and losses, professional fees and other costs related to the American Capital Acquisition, and expense reimbursement from Ares Capital Management LLC (the "Ares Reimbursement"). GAAP net income (loss) is the most directly comparable GAAP financial measure. Ares Capital believes that Core Earnings provides useful information to investors regarding financial performance because it is one method Ares Capital uses to measure its financial condition and results of operations. The presentation of this additional information is not meant to be considered in isolation or as a substitute for financial results prepared in accordance with GAAP.

Index & ETF Definitions

Index Definitions

Indices are provided for illustrative purposes only and not indicative of any investment. They have not been selected to represent appropriate benchmarks or targets for ARCC. Rather, the indices shown are provided solely to illustrate the performance of well known and widely recognized indices. Any comparisons herein of the investment performance of ARCC to an index are qualified as follows: (i) the volatility of such index will likely be materially different from that of ARCC; (ii) such index will, in many cases, employ different investment guidelines and criteria than ARCC and, therefore, holdings in ARCC will differ significantly from holdings of the securities that comprise such index and ARCC may invest in different asset classes altogether from the illustrative index, which may materially impact the performance of ARCC relative to the index; and (iii) the performance of such index is disclosed solely to allow for comparison on ARCC's performance to that of a well known index. Comparisons to indices have limitations because indices have risk profiles, volatility, asset composition and other material characteristics that will differ from ARCC. The indices do not reflect the deduction of fees or expenses. You cannot invest directly in an index. No representation is being made as to the risk profile of any benchmark or index relative to the risk profile of ARCC. There can be no assurance that the future performance of any specific investment, or product will be profitable, equal any corresponding indicated historical performance, or be suitable for a portfolio.

1. **The ICE BofA US High Yield Master II Index ("HOAO")** tracks the performance of US dollar denominated below investment grade corporate debt publicly issued in the US domestic market. Qualifying securities must have a below investment grade rating (based on an average of Moody's, S&P and Fitch), at least 18 months to final maturity at the time of issuance, at least one year remaining term to final maturity as of the rebalancing date, a fixed coupon schedule and a minimum amount outstanding of \$100 million. Index constituents are capitalization-weighted based on their current amount outstanding times the market price plus accrued interest. Accrued interest is calculated assuming next-day settlement. Cash flows from bond payments that are received during the month are retained in the index until the end of the month and then are removed as part of the rebalancing. Cash does not earn any reinvestment income while it is held in the index. The index is rebalanced on the last calendar day of the month, based on information available up to and including the third business day before the last business day of the month. No changes are made to constituent holdings other than on month end rebalancing dates. Inception date: August 31, 1986.
2. **The BofA US High Yield Master II Constrained Index ("HUCO")** tracks the performance of US Dollar denominated below investment grade corporate debt publicly issued in the US domestic market with a maximum issuer exposure of 2%. Indices are for comparison purposes only. Returns include the reinvestment of income and other earnings and reflect the deduction of all trading expenses. Gross returns do not reflect the deduction of investment advisory fees or any other expenses that may be incurred in the management of the account. The representative management fee schedule currently in effect is as follows: 0.50% per annum. Actual fees may vary depending on, among other things, the applicable fee schedule and portfolio size. Investment management fees are described in Part 2 of the adviser's Form ADV. All returns are expressed in U.S. Dollars. Past performance is not indicative of future results. As with any investment there is always the potential for gains as well as the possibility of losses.
3. **The Credit Suisse Institutional Leveraged Loan Index ("CSLLI")** is designed to mirror the investable universe of the \$US-denominated leveraged loan market. The index inception is January 1992. The index frequency is daily, weekly and monthly. New loans are added to the index on their effective date if they qualify according to the following criteria: 1) Loan facilities must be rated "5B" or lower. That is, the highest Moody's/S&P ratings are Baa1/BB+ or Ba1/BBB+. If unrated, the initial spread level must be Libor plus 125 basis points or higher. 2) Only fully-funded term loan facilities are included. 3) The tenor must be at least one year. 4) Issuers must be domiciled in developed countries; issuers from developing countries are excluded.
4. **The Standard & Poor's 500 Index ("S&P 500")** is a market capitalization-weighted index of the 500 largest U.S. publicly traded companies. The S&P 500 is a float-weighted index, meaning company market capitalizations are adjusted by the number of shares available for public trading. The S&P 500 is considered to be a proxy of the U.S. equity market.
5. **The S&P BDC Index** includes leading business development companies that trade on major U.S. exchanges, including ARCC.
6. **The KBW Nasdaq Bank Index ("BKX")** is designed to track the performance of the leading banks and thrifts that are publicly traded in the U.S. The Index includes banking stocks representing the largest U.S. national money centers, regional banks and thrift institutions.
7. **The Morningstar LSTA Leveraged Loan Index ("Morningstar LSTA LLI")** reflect the market-weighted performance of institutional leveraged loans in the U.S. loan market based upon real-time market weightings, spreads and interest payments. Facilities are eligible for inclusion in the index if they are senior secured institutional term loans with a minimum initial spread of 125 and term of one year. They are retired from the index when there is no bid posted on the facility for at least 12 successive weeks or when the loan is repaid.

Slide 4: Market Leading Company in Direct Lending

1. By market capitalization as of September 30, 2024.
2. As of December 31, 2023. Includes capital deployed by ARCC, the Senior Direct Lending Program ("SDLP"), funds and SMAs. For investments made through the SDLP, invested capital represents the total facility amount funded by the SDLP. Excludes capital deployed by Ares Commercial Finance and Ivy Hill Asset Management. Excludes \$1.8 billion of assets acquired as part of ARCC's acquisition of Allied Capital Corporation on April 1, 2010. Excludes \$2.5 billion of assets acquired as part of ARCC's acquisition of American Capital on January 3, 2017. Invested capital represents the book value of investments net of OID and syndications within one year of investment closing and excludes warrants, CLO investments, LP/vehicles and investments inherited from portfolio acquisitions.
3. Based on original cash invested, net of syndications, of approximately \$47.2 billion and total proceeds from such exited investments of approximately \$60.4 billion from inception on October 8, 2004 through December 31, 2023. Internal rate of return ("IRR") is the discount rate that makes the net present value of all cash flows related to a particular investment equal to zero. Internal rate of return is gross of expenses related to investments as these fees and expenses are not allocable to specific investments. The effect of such expenses may reduce, maybe materially, the IRR's shown herein. Investments are considered to be exited when the original investment objective has been achieved through the receipt of cash and/or non-cash consideration upon the repayment of Ares Capital Corporation's debt investment or sale of an investment, or through the determination that no further consideration was collectible and, thus, a loss may have been realized. These IRR results are historical results relating to Ares Capital Corporation's past performance and are not necessarily indicative of future results, the achievement of which cannot be assured.
4. Calculated as an average of the historical annual net realized gain/loss rates (where annual net realized gain/loss rate is calculated as the amount of net realized gains/losses for a particular period from Ares Capital IPO in October 2004 to September 30, 2024 divided by the average quarterly investments at amortized cost in such period). Excludes \$196 million one-time gain on the acquisition of Allied Capital Corporation in Q2-10 and gains/losses from extinguishment of debt and other transactions.
5. Source: S&P Capital IQ. As of September 30, 2024. Ares Capital Corporation's stock price-based total return is calculated assuming dividends are reinvested at the end of the day stock price on the relevant quarterly ex-dividend dates. Total return is calculated assuming investors did not participate in Ares Capital Corporation's rights offering issuance as of March 20, 2008. S&P 500 returns measured by the S&P 500 Index, which measures the performance of the large-cap segment of the market. The S&P 500 is considered to be a proxy of the U.S. equity market and is composed of 500 constituent companies.

Slide 6: ARCC is Well Positioned in a Growing Market

1. AUM amounts include funds managed by Ivy Hill Asset Management, L.P., a wholly owned portfolio company of Ares Capital Corporation and registered investment adviser.
2. Traditional middle market total addressable market is based on the following: estimated Enterprise Value of Middle Market Companies of \$9.3 trillion is based on data from NAICS Association on Companies with \$100 million to \$1 billion in revenue (January 2024), J.P. Morgan's 2023 Next Street: The Middle Matters Report, Capstone Partners (March 2024), GF Data an ACG Company (Association for Corporate Growth), and Ares' view of the market. The financing opportunity on the \$9.3 trillion total Middle Market Enterprise Value is estimated to be 40%. This results in an estimated \$3.7 trillion debt opportunity, which is further reduced by \$0.7 trillion in estimated investment grade loans with \$100 million - \$1 billion in revenues held at banks based on data reported by the FDIC Shared National Credit Review and Ares' view of the market. This results in a \$3 trillion estimated middle market private debt opportunity.
3. Additional addressable liquid market private debt opportunity of \$2.4 trillion is based on the Face value of the ICE BofA U.S. High Yield Index (HOAO) and Credit Suisse Leveraged Loan Index (CSLLI) of \$2.7 trillion as of 12/31/23 less the percent of U.S. High Yield and Leveraged Loan Market with Revenues <\$1 billion based on Ares' view of the market.

- Lipper Rankings reported in Lipper Marketplace Best Money Managers, June 30, 2024. Lipper Marketplace is the source of the long-only and multi-strategy credit rankings. Lipper’s Best Money Managers rankings consider only those funds that meet the following qualification: performance must be calculated “net” of all fees and commissions; must include cash; performance must be calculated in U.S. dollars; asset base must be at least \$10 million in size for “traditional” U.S. asset classes (equity, fixed income, and balanced accounts); and the classification of the product must fall into one of the categories which they rank. Lipper defines Short Duration as 1-5 years. Lipper’s Active Duration definition does not specify a time period but rather refers to an Active rather than Passive strategy. Ares Institutional Loan Fund was ranked 5 out of 51 for the 40 quarters ended June 30, 2024. Composites for Ares U.S. Bank Loan Aggregate and Ares U.S. High Yield additionally received rankings of 2 of 51 and 4 of 31, respectively, for the 40 quarters ended June 30, 2024.

2. The portfolio weighted average EBITDA and average EBITDA for the underlying borrowers includes information solely in respect of corporate investments in Ares Capital’s portfolio and the weighted average total net leverage multiple and interest coverage ratio data includes information solely in respect of corporate portfolio companies in which Ares Capital has a debt investment (in each case, subject to the exclusions described in the following sentence). Excluded from the data above is information in respect of the following: (i) the SDLP (and the underlying borrowers in the SDLP), (ii) portfolio companies that do not report EBITDA, including IHAM, (iii) portfolio companies with negative or de minimis EBITDA, (iv) investment funds/vehicles, (v) discrete projects in the project finance/power generation sector, (vi) certain oil and gas companies, (vii) venture capital backed companies and (viii) commercial real estate finance companies.
3. Weighted average EBITDA amounts are weighted based on the fair value of the portfolio company investments. EBITDA amounts are estimated from the most recent portfolio company financial statements, have not been independently verified by Ares Capital and may reflect a normalized or adjusted amount. Accordingly, Ares Capital makes no representation or warranty in respect of this information.
4. EBITDA is a non-GAAP financial measure. For a particular portfolio company, EBITDA is generally defined as net income before net interest expense, income tax expense, depreciation and amortization. EBITDA amounts are estimated from the most recent portfolio company financial statements, have not been independently verified by Ares Capital and may reflect a normalized or adjusted amount. Accordingly, Ares Capital makes no representation or warranty in respect of this information.

Morgan’s 2023 Next Street: The Middle Matters Report, Capstone Partners (March 2024), GF Data an ACG Company (Association for Corporate Growth), and Ares’ view of the market. The financing opportunity on the \$9.3 trillion total Middle Market Enterprise Value is estimated to be 40%. This results in an estimated \$3.7 trillion debt opportunity, which is further reduced by \$0.7 trillion in estimated investment grade loans with \$100 million - \$1 billion in revenues held at banks based on data reported by the FDIC Shared National Credit Review and Ares’ view of the market. This results in a \$3 trillion estimated middle market private debt opportunity.
6. Additional addressable liquid market private debt opportunity of \$2.4 trillion is based on the Face value of the ICE BofA U.S. High Yield Index (HOAO) and Credit Suisse Leveraged Loan Index (CSLLI) of \$2.7 trillion as of 12/31/23 less the percent of U.S. High Yield and Leveraged Loan Market with Revenues <\$1 billion based on Ares’ view of the market.

Slide 13: Key Elements to Our Investment Approach

1. The portfolio median EBITDA includes information solely in respect of corporate investments in Ares Capital's portfolio. Excluded from the data is information in respect of the following: (i) the SDLP (and the underlying borrowers in the SDLP), (ii) portfolio companies that do not report EBITDA, including IHAM, (iii) portfolio companies with negative or de minimis EBITDA, (iv) investment funds/vehicles, (v) discrete projects in the project finance/power generation sector, (vi) certain oil and gas companies, (vii) venture capital backed companies and (viii) commercial real estate finance companies.
2. EBITDA is a non-GAAP financial measure. For a particular portfolio company, EBITDA is generally defined as net income before net interest expense, income tax expense, depreciation and amortization. EBITDA amounts are estimated from the most recent portfolio company financial statements, have not been independently verified by Ares Capital and may reflect a normalized or adjusted amount. Accordingly, Ares Capital makes no representation or warranty in respect of this information.

Slide 18: ARCC Has Delivered Compelling Long Term Performance

1. As of December 31, 2023. Includes capital deployed by ARCC, the Senior Direct Lending Program (“SDLP”), funds and SMAs. For investments made through the SDLP, invested capital represents the total facility amount funded by the SDLP. Excludes capital deployed by Ares Commercial Finance and Ivy Hill Asset Management. Excludes \$1.8 billion of assets acquired as part of ARCC’s acquisition of Allied Capital Corporation on April 1, 2010. Excludes \$2.5 billion of assets acquired as part of ARCC’s acquisition of American Capital on January 3, 2017. Invested capital represents the book value of investments net of OID and syndications within one year of investment closing and excludes warrants, CLO investments, LP/vehicles and investments inherited from portfolio acquisitions.
2. Calculated as an average of the historical annual net realized gain/loss rates (where annual net realized gain/loss rate is calculated as the amount of net realized gains/losses for a particular period from Ares Capital IPO in October 2004 to September 30, 2024 divided by the average quarterly investments at amortized cost in such period). Excludes \$196 million one-time gain on the acquisition of Allied Capital Corporation in Q2-10 and gains/losses from extinguishment of debt and other transactions.
3. Based on original cash invested, net of syndications, of approximately \$47.2 billion and total proceeds from such exited investments of approximately \$60.4 billion from inception on October 8, 2004 through September 30, 2024. Internal rate of return (“IRR”) is the discount rate that makes the net present value of all cash flows related to a particular investment equal to zero. Internal rate of return is gross of expenses related to investments as these fees and expenses are not allocable to specific investments. The effect of such expenses may reduce, maybe materially, the IRR’s shown herein. Investments are considered to be exited when the original investment objective has been achieved through the receipt of cash and/or non-cash consideration upon the repayment of Ares Capital Corporation’s debt investment or sale of an investment, or through the determination that no further consideration was collectible and, thus, a loss may have been realized. These IRR results are historical results relating to Ares Capital Corporation’s past performance and are not necessarily indicative of future results, the achievement of which cannot be assured.
4. BDC peer group consists of BDCs with a total portfolio at fair value greater than \$1.7 billion or a combined portfolio at fair value greater than \$2 billion if under common management and have been publicly traded for at least one year, as of December 31, 2023. Measured as the annualized average returns of dividends paid plus changes in net asset value over the five year period ended March 31, 2024.
5. Based on invested capital from inception on October 8, 2004 through June 30, 2024. Includes investments made through Ares Capital Corporation, the Senior Secured Loan Program and the Senior Direct Lending Program. Excludes syndications within one year of origination, \$1.8 billion of investments acquired from Allied Capital on April 1, 2010 and \$2.5 billion of investments acquired from American Capital on January 3, 2017.
6. Source: S&P Capital IQ. As of September 30, 2024. Ares Capital Corporation’s stock price-based total return is calculated assuming dividends are reinvested at the end of the day stock price on the relevant quarterly ex-dividend dates. Total return is calculated assuming investors did not participate in Ares Capital Corporation’s rights offering issuance as of March 20, 2008. S&P 500 returns measured by the S&P 500 Index, which measures the performance of the large-cap segment of the market, assuming dividends are reinvested. The S&P 500 is considered to be a proxy of the U.S. equity market and is composed of 500 constituent companies.
7. As of September 30, 2024. Total returns are calculated assuming dividends are reinvested. The S&P 500 is considered to be a proxy of the U.S. equity market and is composed of 500 constituent companies. BDC returns measured by SNL U.S. Registered Investment Companies (RICs) Index, which includes all publicly traded (NYSE, NYSE American, NASDAQ, OTC) Regulated Investment Companies in SNL’s coverage universe. Bank returns measured by the KBW Nasdaq Bank Index (BKX), which is a modified market capitalization weighted index designed to track the performance of leading banks and thrifts that are publicly traded in the U.S. The BKX index includes banking stocks representing large U.S. national money centers, regional banks and thrift institutions.

Slide 19: ARCC Has a Compelling Track Record of Credit Performance

1. Includes invested capital from inception on October 8, 2004 through June 30, 2024. Includes investments made through Ares Capital Corporation, the Senior Secured Loan Program and the Senior Direct Lending Program. Excludes syndications within one year of origination, \$1.8 billion of investments acquired from Allied Capital on April 1, 2010 and \$2.5 billion of investments acquired from American Capital on January 3, 2017.
2. Defined as realized gains/(losses) on assets with a payment default as a percentage of total invested capital since inception, divided by number of years since inception for all first lien and unitranche loans. This number includes interest, fees, principal proceeds, and net of related expenses.
3. Defined as realized gains/(losses) on assets with a payment default as a percentage of total invested capital since inception, divided by number of years since inception for all second lien and subordinated loans. This number includes interest, fees, principal proceeds, and net of related expenses.
4. Represents the average loss rate from October 8, 2004 through June 30, 2024. Source for First Lien is Credit Suisse Institutional Leveraged Loan Index (“CSLLI”) as of June 30, 2024. Source for High Yield Bond Data is the ICE BofA US High Yield Master II Constrained Index (“HUCO”) as of March 31, 2024. The loss rate is calculated by taking the default rate * (1 - the recovery rate). The default methodology is calculated by taking the price of the index on the day of default.
