Appendix A – NON-GAAP FINANCIAL MEASURES

The Company supplements its condensed consolidated financial statements prepared in accordance with U.S. generally accepted accounting principles (“US GAAP”) by using the following non-GAAP financial measures, which management believes are useful in properly understanding the Company’s short-term and long-term financial trends. Management uses these non-GAAP financial measures to forecast and evaluate the operational performance of the Company as well as to compare results of current periods to prior periods on a consolidated basis.

- Adjusted EBITDA
- Adjusted EBITDA margin
- Constant currency results
- Net Debt

Management believes presenting the non-GAAP financial measures used in this presentation provides investors greater transparency to the information used by management for financial and operational decision-making and allows investors to see the Company’s results “through the eyes” of management. Management also believes providing this information better enables our investors to understand the Company’s operating performance and evaluate the methodology used by management to evaluate and measure such performance.

The adjustments made to U.S. GAAP financial measures result from facts and circumstances that vary in frequency and impact on the Company’s results of operations. The following is an explanation of each of the adjustments that management excludes in calculating its non-GAAP financial measures.

Appendix A – NON-GAAP FINANCIAL MEASURES

The Company defines Adjusted EBITDA as net earnings (loss) attributable to Century Casinos, Inc. shareholders before interest expense (income), net, income taxes (benefit), depreciation, amortization, non-controlling interest (earnings) losses and transactions, pre-opening expenses, acquisition costs, non-cash stock-based compensation charges, asset impairment costs, (gain) loss on disposition of fixed assets, discontinued operations, (gain) loss on foreign currency transactions and other, gain on business combination and certain other one-time items, such as acquisition costs. Intercompany transactions consisting primarily of management and royalty fees and interest, along with their related tax effects, are excluded from the presentation of net earnings (loss) and Adjusted EBITDA reported for each segment and property. Not all of the aforementioned items occur in each reporting period, but have been included in the definition based on historical activity. These adjustments have no effect on the consolidated results as reported under US GAAP. Adjusted EBITDA is not considered a measure of performance recognized under US GAAP. Management believes that Adjusted EBITDA is a valuable measure of the relative performance of the Company and its properties. The gaming industry commonly uses Adjusted EBITDA as a method of arriving at the economic value of a casino operation. Management uses Adjusted EBITDA to compare the relative operating performance of separate operating units by eliminating the above mentioned items associated with the varying levels of capital expenditures for infrastructure required to generate revenue, and the often high cost of acquiring existing operations. Adjusted EBITDA is used by the Company's lending institution to gauge operating performance. The Company's computation of Adjusted EBITDA may be different from, and therefore may not be comparable to, similar measures used by other companies within the gaming industry. Please see the reconciliation of Adjusted EBITDA to net earnings (loss) attributable to Century Casinos, Inc. shareholders below.

The Company defines Adjusted EBITDA margin as Adjusted EBITDA divided by net operating revenue. Management uses this margin as one of several measures to evaluate the efficiency of the Company's casino operations.

Appendix A – NON-GAAP FINANCIAL MEASURES

The impact of foreign exchange rates is highly variable and difficult to predict. The Company uses a Constant Currency basis to show the impact from foreign exchange rates on current period revenue compared to prior period revenue using the prior period's foreign exchange rates. In order to properly understand the underlying business trends and performance of the Company's ongoing operations, management believes that investors may find it useful to consider the impact of excluding changes in foreign exchange rates from the Company's net operating revenue, net earnings (loss) attributable to Century Casinos, Inc. shareholders and Adjusted EBITDA.

The Company defines Net Debt as total long-term debt (including current portion) plus deferred financing costs minus cash and cash equivalents. Net Debt is not considered a liquidity measure recognized under US GAAP. Management believes that Net Debt is a valuable measure of our overall financial situation. Net Debt provides investors with an indication of our ability to pay off all of our long-term debt if it became due simultaneously.
